APPROXIMATE DATE OF COMMENCEMENT OF PROPOSED SALE TO THE PUBLIC: As soon as
practicable after the effective date of this Registration Statement.

If any of the securities being registered on this Form are to be offered on
a delayed or continuous basis pursuant to Rule 415 under the Securities Act of
1933, check the following box. ☐

If this Form is filed to register additional securities for an offering
pursuant to Rule 462(b) under the Securities Act of 1933, check the following
box and list the Securities Act registration statement number of the earlier
effective registration statement for the same offering. ☐ _____

If this Form is a post-effective amendment filed pursuant to Rule 462(c)
under the Securities Act of 1933, check the following box and list the
Securities Act registration statement number of the earlier effective
registration statement for the same offering. ☐ _____

If this Form is a post-effective amendment filed pursuant to Rule 462(d)
under the Securities Act of 1933, check the following box and list the
Securities Act registration statement number of the earlier effective
registration statement for the same offering. ☐ _____

If delivery of the prospectus is expected to be made pursuant to Rule 434,
please check the following box. ☐

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(a) OF THE SECURITIES ACT OF 1933 OR UNTIL THE REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATE AS THE COMMISSION, ACTING PURSUANT TO SAID SECTION 8(a), MAY DETERMINE.

THE INFORMATION IN THIS PRELIMINARY PROSPECTUS IS NOT COMPLETE AND MAY BE CHANGED. THESE SECURITIES MAY NOT BE SOLD UNTIL THE REGISTRATION STATEMENT FILED WITH THE SECURITIES AND EXCHANGE COMMISSION IS EFFECTIVE. THIS PRELIMINARY PROSPECTUS IS NOT AN OFFER TO SELL NOR DOES IT SEEK AN OFFER TO BUY THESE SECURITIES IN ANY JURISDICTION WHERE THE OFFER OR SALE IS NOT PERMITTED.

SUBJECT TO COMPLETION. DATED MAY 5, 2000.

6,000,000 Shares

LOGO
MARVELL TECHNOLOGY GROUP LTD.

Common Stock

This is an initial public offering of shares of common stock of Marvell Technology Group Ltd. All of the 6,000,000 shares of common stock are being sold by Marvell.

Prior to this offering, there has been no public market for the common stock. Marvell estimates that the initial public offering price per share will be between \$9.00 and \$11.00. Marvell has applied to include the common stock for quotation on the Nasdaq National Market under the symbol "MRVL".

See "Risk Factors" beginning on page 7 to read about factors you should consider before buying shares of the common stock.

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY OTHER REGULATORY BODY HAS APPROVED OR DISAPPROVED OF THESE SECURITIES OR PASSED UPON THE ACCURACY OR ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

	Per Share	Total
	-----	-----
Initial public offering price.....	\$	\$
Underwriting discount.....	\$	\$
Proceeds, before expenses, to Marvell.....	\$	\$

To the extent that the underwriters sell more than 6,000,000 shares of common stock, the underwriters have the option to purchase up to an additional 900,000 shares from Marvell at the initial public offering price less the underwriting discount.

The underwriters expect to deliver the shares against payment in New York, New York on , 2000.

GOLDMAN, SACHS & CO.

J.P. MORGAN & CO.

ROBERTSON STEPHENS

Prospectus dated , 2000.

Inside Front Cover:

The inside front cover contains graphics. The upper third of the page contains the following words in white letters on dark blue background: "SILICON SOLUTIONS FOR BROADBAND COMMUNICATIONS." Under the caption are six pictures, arranged in a circular pattern, surrounding a picture of one of our integrated circuits containing the Marvell logo. All of the pictures are set on a blue background of blurred, digital data, i.e., 1's and 0's. The picture at the top of the circle is a picture of the earth, circumscribed by red, yellow and green circles. Immediately down and to the right of the earth picture is a picture of network storage equipment. Immediately under that picture is a picture of a partially-opened notebook computer. Down and to the left of the picture of the notebook computer is a fiber optic cable, with glowing fiber optics set against a black background. Up and to the left of the fiber optic cable picture is a picture of a worker in a communications control room. Above that picture is a picture of a large communications receiving dish set against a blue sky with some clouds. Down and to the left of the pictures is a black Marvell logo with the name "MARVELL" underneath in yellow type. Down and to the right of the pictures is the Marvell trademark "MOVING FORWARD FASTER." The words "MOVING FORWARD" are set in black type, and the word "FASTER" is set in red type. The word "FASTER" is slightly larger than the other words in the trademark.

Front Cover Gatefold

The inside front cover gatefold contains two pages of graphics. The top 1/10th of the two pages contains the following words in white letters on dark blue background: "A BROAD PERSPECTIVE ON APPLICATIONS FOR OUR TECHNOLOGY." On the right hand side of the gatefold, beginning underneath the dark blue background, is a graphic depicting an analog signal transitioning to blurred digital data, i.e., 1's and 0's. The transition is represented by a red elliptical line. Under the graphic are the words "Marvell designs, develops and markets integrated circuits that provide critical communication functions in high performance data storage and data communications equipment." Under the words is a picture of one of our integrated circuits containing the Marvell logo. To the left of the words and the analog-to-digital graphic is a graphic depicting applications and potential future applications of our technology. In the upper left corner of the graphic is a legend containing four boxes. The first box is blue. Next to the blue box is the phrase "Current Applications." Immediately under the blue box is a smaller white box with a "C" in the center of the box. Next to this box is the phrase "Equipment incorporating recently introduced data communications integrated circuits." Immediately under that box is a white box of the same size with an "S" in the center. Next to this box is the phrase "Equipment incorporating currently shipping data storage integrated circuits." Immediately under this box is a beige box the same size as the first box. Next to the beige box is the phrase "Potential Future Applications for our data communications integrated circuits." The graphics depicting applications are joined by heavy gray lines, depicting communication media, containing digital data, i.e., 0's and 1's. Starting from the left side of the gatefold, the first graphic is a blue depiction of a storage area network switch with the words "Storage Area Network (SAN) Switch and to the right of the words, a white box with a "C" in the center." Immediately under the SAN switch graphic, connected by a gray line, is a blue graphic from left to right depicting a redundant array of independent drives. Underneath the graphic from left to right is the phrase "Redundant Array of Independent Disks," the acronym "RAID and a white box with a "C" in the center." To the right of the graphic depicting the SAN switch, connected by a gray line, is a blue graphic depicting a local area network switch. Under the graphic is the phrase "Local Area Network (LAN) Switch and to the right of the phrase a white box with a "C" in the center." Down and slightly to the left of the graphic depicting the LAN Switch, connected by a gray line, is a blue graphic depicting a router. Under the graphic is the word "Router" and to the right of the word, a white box with a "C" in the center." To the right of the graphic depicting the router, connected by a gray line, is a graphic depicting a beige cable head. Over the graphic are the words "Cable Head." Under the cable head graphic is a beige graphic depicting a home. The home graphic is connected to the cable head graphic by a gray line. To the right of the home are the stacked words "Cable Modem," "Web Based Television Storage" and "Wireless Network." To the right of the LAN switch graphic, connected by a gray line, is a blue graphic depicting a work group switch. Under the graphic are the words "Work Group Switch and to the right of the words, a white box with a "C" in the center." Under the work group switch graphic, connected by a gray line, is a blue graphic depicting a partially open laptop computer. Under the graphic are the words "Laptop" a white box with a "C" in the center and a white box with a "S" in the center. Above the work group switch graphic, connected by a gray line, is a blue graphic depicting a small office/home office switch. Above the graphic are the words "Small Office/Home Office (SoHo) and a white box with a "C" in the center." To the right of the SoHo switch, connected by a gray line, is a blue graphic depicting a work station personal computer. Over the graphic are the words "Work Station," a white box with a "C" in the center and a white box with a "S" in the center. To the right of the work station PC graphic, connected by the same gray line, is a blue graphic depicting a desktop personal computer. Above the graphic is the word "Desktop," a white box with a "C" in the center and a white box with a "S" in the center. Down and to the right of the work group switch graphic, connected by a gray line, is a beige graphic depicting a wireless hub. Under the graphic are the words "Wireless Hub." Down

and to the right of the wireless hub graphic is an open laptop computer, connected to the wireless hub by concentric semi-circles depicting wireless communication. To the right of the laptop computer are the stacked words "Laptop" and "Wireless connectivity." To the right of the work group switch graphic, connected by a gray line, is a blue graphic depicting an enterprise server. Under the graphic from left to right are the words "Enterprise Server," a white box with a "C" in the center and a white box with a "S" in the center. Underneath the entire applications graphic is a blue line. Under the blue line are four headings: "High Performance Storage," "High Speed Networking," "Wireless Networking" and "Cable Modem." Under the heading "High Performance Storage," in black letters, is the following text: "Our integrated circuits for data storage applications allow enterprises and consumers to reliably store, transmit and rapidly access large volumes of data." Under the heading "High Speed Networking," in black letters, is the following text: "Our integrated circuits enable networking devices for high speed data communications throughout the home and business enterprise. Under the heading "Wireless Networking," in black letters, is the following text: "Our core technologies can be applied to the wireless networking market. We are developing products to enable high bandwidth data communication over wireless networks. Under the heading "Cable Modem," in black letters, is the following text: "Our core technologies can be applied to the cable modem market. We are developing products to connect personal computers to cable networks and the Internet at much faster speeds than possible through today's analog modems." On the lower left side of the gatefold is a black Marvell logo with the name "MARVELL" underneath in orange type. On the lower right side of the gatefold is the Marvell trademark "MOVING FORWARD FASTER." The words "MOVING FORWARD" are set in black type and the word "FASTER" is set in orange type. The word "FASTER" is slightly larger than the other words in the trademark.

PROSPECTUS SUMMARY

The following summary highlights information found in greater detail elsewhere in this prospectus. It may not contain all of the information that is important to you. You should read the entire prospectus, including "Risk Factors" and the financial statements and notes to those statements, before you decide to buy our common stock. Except as otherwise noted, all information in this prospectus gives effect to the conversion of all outstanding shares of preferred stock, and assumes no exercise of the underwriters' option to purchase additional shares of common stock in the offering. The share information in this prospectus reflects the approval by our shareholders on March 17, 2000 of two common stock dividends in which, in each case, our shareholders received an additional share of our common stock for each share held by them.

OUR BUSINESS

We design, develop and market integrated circuits for communications-related markets. Our products provide the critical interface between real world, analog signals and the digital information used in computing and communications systems. Our products enable our customers to store and transmit digital information reliably and at high speeds. We initially focused our core technology on the data storage market, where we believe our products provide industry leading performance for Seagate, Samsung, Hitachi, Fujitsu and Toshiba, who as a group accounted for 99% of our sales in fiscal 1999 and 98% of our sales in fiscal 2000. Recently, we applied our technology to the high speed, or broadband, data communications market by introducing products that are used in network access equipment to provide the interface between communications systems and data transmission media. We believe that our core technology can be used to improve performance across a wide range of data communications applications. For example, we are actively developing products for the Gigabit Ethernet, a networking protocol, or format, for connecting devices at data rates of 1,000 megabits per second. In addition, we are committing resources to the development of products for the wireless communications and cable modem markets. For the fiscal year ended January 31, 2000, we generated \$81.4 million in net revenue and \$13.1 million in net income.

The advent of new, data-intensive computing and communications applications is driving business and consumer demand for broadband access to large volumes of information in multiple forms, including voice, video and data. Data storage and communications systems providers must consistently introduce higher capacity and higher performance equipment to satisfy this demand. Often the new equipment must operate using existing communications infrastructures that were not designed to support the desired levels of performance. These challenges are creating the need for a new generation of integrated circuit solutions capable of reliably supporting higher data transmission rates over existing media infrastructures.

We believe that our products enable our customers to introduce higher performance data storage and broadband data communications products rapidly and at competitive prices. Our products consist of proprietary integrated circuits incorporating custom digital signal processing algorithms, which are formulas that permit the mathematical manipulation of digital data converted from analog form. Our products are designed for the complementary metal oxide semiconductor, or CMOS, manufacturing process. CMOS provides numerous benefits over other manufacturing processes, including lower manufacturing costs, faster time to market and greater worldwide foundry capacity. We believe we have achieved a level of integrated circuit performance in CMOS that has typically only been achieved with more expensive, less widely available, fabrication techniques.

The following are key elements of our strategy:

- Expand our market position by developing new signal processing technologies for broadband data communications-related applications and by continuing to invest in research and development;

- Leverage our core technology in the broadband data communications market by introducing advanced products, including Gigabit Ethernet products;
- Extend our leadership position in the high performance and portable computing segments of the data storage market by continuing to introduce advanced products for these market segments and further penetrate the general purpose personal computer segment by developing cost-effective solutions for that market segment;
- Strengthen and expand our relationships with current and potential customers by customizing products to meet their specific needs and by jointly developing highly integrated products; and
- Use independent manufacturers to fabricate our integrated circuits using CMOS, thereby decreasing time to market and cost while foregoing the necessity for a major investment in manufacturing capacity.

OUR CORPORATE INFORMATION

We incorporated in Bermuda on January 11, 1995. Our registered address in Bermuda is Clarendon House, 2 Church Street, Hamilton, HMCX Bermuda, and our telephone number there is (441) 296-6395. The address of our principal location in the United States is Marvell Semiconductor, Inc., 645 Almanor Avenue, California, 94086, and our telephone number there is (408) 222-2500. We also have offices in Singapore and Japan.

The Marvell name, logo, and the phrase "Moving Forward Faster" are our trademarks. We have applied for federal registration of these trademarks. All other trademarks or trade names appearing elsewhere in this prospectus are the property of their respective owners.

Information contained on our website is not intended to be part of this prospectus.

THE PERMISSION OF THE BERMUDA MONETARY AUTHORITY MUST BE OBTAINED FOR THE ISSUANCE OF THE COMMON STOCK IN THIS OFFERING. THE PROSPECTUS MUST ALSO BE FILED WITH THE REGISTRAR OF COMPANIES IN BERMUDA. IN GRANTING SUCH PERMISSION AND IN ACCEPTING THIS PROSPECTUS FOR FILING, THE BERMUDA MONETARY AUTHORITY AND THE REGISTRAR OF COMPANIES IN BERMUDA WILL ACCEPT NO RESPONSIBILITY FOR THE FINANCIAL SOUNDNESS OF ANY PROPOSAL OR FOR THE CORRECTNESS OF ANY OF THE STATEMENTS MADE OR OPINIONS EXPRESSED WITH REGARD TO THEM. THE WITHHOLDING OF PERMISSION BY THE BERMUDA MONETARY AUTHORITY WOULD RESULT IN OUR INABILITY TO COMPLETE THE SALE OF COMMON STOCK AS CONTEMPLATED IN THIS PROSPECTUS.

THE OFFERING

Shares offered.....	6,000,000 shares
Shares to be outstanding after this offering.....	82,211,425 shares
Use of proceeds.....	General corporate purposes, including working capital, capital expenditures and potential acquisitions of, or investments in, complementary businesses, technologies or services.
Proposed Nasdaq National Market Symbol.....	"MRVL"

The information in the above table is based on shares of common stock outstanding as of April 30, 2000. This information excludes:

- 11,492,809 shares issuable upon the exercise of outstanding stock options, at a weighted average exercise price of \$1.27 per share;
- 5,225,270 shares available for future issuance under our 1995 Stock Option Plan and 1997 Directors' Stock Option Plan; and
- 1,152,250 shares issuable upon the exercise of outstanding stock options, at a weighted average exercise price of \$5.00 per share, granted subsequent to January 31, 2000 and through April 30, 2000.

SUMMARY CONSOLIDATED FINANCIAL DATA

	YEAR ENDED JANUARY 31,

RISK FACTORS

You should carefully consider these risk factors, together with all of the other information included in this prospectus, before you decide to purchase shares of our common stock. Investing in our common stock involves a high degree of risk. If any of the following risks actually occurs, our business could be seriously harmed and the trading price of our common stock could decline. In those circumstances, you may lose part or all of your investment.

RISKS RELATED TO OUR BUSINESS

WE HAVE ONLY RECENTLY BEGUN OFFERING FOR SALE OUR FIRST DATA COMMUNICATIONS PRODUCT. OUR FUTURE SUCCESS IS DEPENDENT ON OUR ABILITY TO ACHIEVE RAPID AND WIDESPREAD MARKET ACCEPTANCE FOR THIS PRODUCT AND OTHER DATA COMMUNICATIONS PRODUCTS WE DEVELOP AND OFFER FOR SALE.

Prior to March 2000, all of our products were sold for use in data storage devices, a market where we expect our rate of sales growth to slow considerably in fiscal 2001 and going forward. In March 2000, we shipped and generated revenue from our first high speed, or broadband, data communications product, an Ethernet product for Fast Ethernet applications, and we began customer sampling of a second Fast Ethernet product. Ethernet is the predominant networking protocol, or format, for connecting devices at data rates of 10, 100 and 1,000 megabits per second. Ethernet connecting devices at data rates of 100 megabits per second are known as Fast Ethernet, and Ethernet connecting devices at data rates of 1,000 megabits per second are known as Gigabit Ethernet. We are developing other broadband data communications products, including a Gigabit Ethernet product for use with copper twisted pair wiring, a type of wiring widely used in today's large business, or high performance, networks. We have a limited history in developing, marketing and selling our products in the broadband data communications market. Even if we successfully develop and manufacture products for this market, they may not achieve market acceptance in the near term or at all. If our Fast Ethernet products or other broadband data communications products do not achieve rapid and widespread market acceptance, our growth prospects could be seriously harmed.

WE HAVE DEPENDED ON SALES OF OUR READ CHANNEL AND PREAMPLIFIER PRODUCTS FOR SUBSTANTIALLY ALL OF OUR REVENUE TO DATE, AND SIGNIFICANT REDUCTIONS IN ORDERS FOR THESE PRODUCTS, OR THE DATA STORAGE DEVICES INTO WHICH SUCH PRODUCTS ARE INCORPORATED, WOULD SIGNIFICANTLY REDUCE OUR REVENUES.

Substantially all of our revenue to date has been derived from sales of our read channel and preamplifier products. A read channel transmits and receives the analog data that is stored on a magnetic disk and converts it to and from digital data for use in computing systems. A preamplifier amplifies the low level electrical signal transmitted to and from the recording mechanisms in a disk drive device. In fiscal 1999 and 2000, we experienced rapid growth in sales of our data storage products and anticipate our rate of sales growth for these products will slow considerably in 2001 and going forward. Unless we are able to diversify our sales through the introduction of new products, we will continue to be dependent on sales of our read channel and preamplifier products. Our read channel and preamplifier products are incorporated into data storage devices by our customers primarily for sale to the personal computer and computer server markets. Any reduction in the demand for data storage devices that incorporate our products would likely result in reduced demand for our products and would harm our sales. The data storage market is rapidly evolving and is subject to substantial fluctuation. For example, the data storage market may be affected by:

- shifts in market share among data storage device manufacturers, driven by technological advances, price reductions, the level of end-user satisfaction with the data storage devices and the level of support provided to the end-users; and

- fluctuations in the market for computing devices and products containing data storage devices.

WE DEPEND ON A SMALL NUMBER OF LARGE CUSTOMERS FOR A SUBSTANTIAL MAJORITY OF OUR SALES. THE LOSS OF, OR A SIGNIFICANT REDUCTION OR CANCELLATION IN SALES TO, ANY KEY CUSTOMER WOULD SERIOUSLY HARM OUR ABILITY TO GROW AND BE PROFITABLE.

In fiscal 2000, our five largest customers accounted for approximately 98% of our sales. Of these customers, Samsung accounted for 36%, Seagate for 24%, Hitachi for 14%, Fujitsu for 14% and Toshiba for 10%. Sales to these large customers have fluctuated significantly from year-to-year and will likely continue to fluctuate dramatically in the future. The loss of any of our largest customers, or a significant reduction in sales we make to them, or any problems we encounter collecting amounts they owe us, would likely seriously harm our results of operations and financial condition. Our operating results in the foreseeable future will continue to depend on sales to a relatively small number of customers, as well as the ability of these customers to sell products that incorporate our products. In the future, these customers may decide not to purchase our products at all, to purchase fewer products than they did in the past, or to alter their purchasing patterns, particularly because:

- we do not have any long-term purchase arrangements or contracts with these or any of our other customers or exclusive arrangements with any customers; and
- substantially all of our sales are made on a purchase order basis, which permits our customers to cancel, change or delay product purchase commitments with little or no notice to us and without penalty.

IF WE ARE UNABLE TO DEVELOP NEW AND ENHANCED PRODUCTS THAT ACHIEVE MARKET ACCEPTANCE IN A TIMELY MANNER, OUR OPERATING RESULTS AND COMPETITIVE POSITION WILL BE HARMED.

Our future success will depend on our ability, in a timely and cost effective manner, to develop new products for the broadband data communications markets and to introduce product enhancements to our read channel and preamplifier products. We must also achieve market acceptance for these products and enhancements. If we do not successfully develop and achieve market acceptance for new and enhanced products, our ability to maintain or increase revenues will suffer. The development of our products is highly complex. We occasionally have experienced delays in completing the development and introduction of new products and product enhancements, and we could experience delays in the future. In particular, we have a limited history in developing products for the broadband data communications market and may encounter technical difficulties in developing Gigabit Ethernet or other products for this market that could prevent or delay the successful introduction of these products. Unanticipated problems in developing broadband data communications products could also require the diversion of substantial engineering resources, which may impair our ability to develop new products for the data storage market, and could substantially increase our costs. Even if the new and enhanced products are introduced to the market, we may not be able to achieve market acceptance of these products in a timely manner.

Successful product development and market acceptance of our products depends on a number of factors, including:

- timely and cost-effective completion and introduction of new product designs;
- adoption of our products by customers that are among the first to adopt new technologies and by customers perceived to be market leaders;
- timely qualification and certification of our products for use in our customers' products;
- the level of acceptance of our products by existing and potential customers;
- cost and availability of foundry, assembly and testing capacity;

- availability, price, performance, power use and size of our products and competing products and technologies;
- our customer service and support capabilities and responsiveness;
- successful development of our relationships with existing and potential customers and strategic partners; and
- our ability to predict and respond to changes in technology, industry standards or end-user preferences.

WE ARE A RELATIVELY SMALL COMPANY WITH LIMITED RESOURCES COMPARED TO SOME OF OUR CURRENT AND POTENTIAL COMPETITORS, AND WE MAY NOT BE ABLE TO COMPETE EFFECTIVELY AND INCREASE OR MAINTAIN REVENUES AND MARKET SHARE.

We may not be able to compete successfully against current or potential competitors. If we do not compete successfully, our market share and revenues may not increase or may decline. In addition, some of our current and potential competitors have longer operating histories, significantly greater resources and name recognition and a larger base of customers than we have. As a result, these competitors may have greater credibility with our existing and potential customers. Moreover, our competitors may foresee the course of market developments more accurately than we do. They also may be able to adopt more aggressive pricing policies and devote greater resources to the development, promotion and sale of their products than we can to ours, which would allow them to respond more quickly than us to new or emerging technologies or changes in customer requirements. In addition, new competitors or alliances among existing competitors could emerge. We expect to face competition in the future from our current competitors, other manufacturers and designers of integrated circuits, and innovative start-up integrated circuit design companies. Many of our customers are also large, established integrated circuit suppliers. Our sales to and support of such customers may enable them to become a source of competition to us, despite our effort to protect our intellectual property rights.

As we begin to enter the broadband data communications market, we face competition from a number of additional competitors who have a long history of serving that market. Many of these competitors have established reputations in that market and long-standing relationships with the customers to whom we intend to sell our products that could prevent us from competing successfully.

Competition could increase pressure on us to lower our prices and lower our margins.

DUE TO OUR LIMITED OPERATING HISTORY, WE MAY HAVE DIFFICULTY IN ACCURATELY PREDICTING OUR FUTURE SALES AND APPROPRIATELY BUDGETING FOR OUR EXPENSES, AND WE MAY NOT BE ABLE TO MAINTAIN OUR EXISTING GROWTH RATE.

We were incorporated in 1995, did not begin generating any meaningful sales until June 1998 and did not become profitable on an annual basis until fiscal 2000. This limited operating experience, combined with the rapidly changing nature of the markets in which we sell our products, limits our ability to accurately forecast quarterly or annual sales. Additionally, because many of our expenses are fixed in the short term or incurred in advance of anticipated sales, we may not be able to decrease our expenses in a timely manner to offset any shortfall of sales. For example, in the last quarter of fiscal 1999 we failed to achieve budgeted revenues, due to slower than anticipated design wins for our products. We are currently expanding our staffing and increasing our expense levels in anticipation of future sales growth. If our sales do not increase as anticipated, significant losses could result due to our higher expense levels.

Although we have experienced sales and earnings growth in prior quarterly and annual periods, we may not be able to sustain these growth rates. Accordingly, you should not rely on the results of any prior quarterly or annual periods as an indication of our future performance.

BECAUSE WE DO NOT HAVE LONG-TERM COMMITMENTS FROM OUR CUSTOMERS, WE MUST ESTIMATE CUSTOMER DEMAND, AND ERRORS IN OUR ESTIMATES CAN HAVE NEGATIVE EFFECTS ON OUR INVENTORY LEVELS AND SALES.

Our sales are made on the basis of individual purchase orders rather than long-term purchase commitments. In addition, our customers may cancel or defer purchase orders. We have historically placed firm orders for products with our suppliers up to 16 weeks prior to the anticipated delivery date and typically prior to receiving an order for the product. Therefore our order volumes are based on our forecasts of demand from our customers. This process requires us to make multiple demand forecast assumptions, each of which may introduce error into our estimates. If we overestimate customer demand, we may allocate resources to manufacturing products that we may not be able to sell when we expect or at all. As a result, we would have excess inventory, which would harm our financial results. Conversely, if we underestimate customer demand or if insufficient manufacturing capacity is available, we would forego revenue opportunities, lose market share and damage our customer relationships. On occasion, we have been unable to adequately respond to unexpected increases in customer purchase orders, and therefore, were unable to benefit from this increased demand.

WE RELY ON INDEPENDENT FOUNDRIES AND SUBCONTRACTORS FOR THE MANUFACTURE, ASSEMBLY AND TESTING OF OUR INTEGRATED CIRCUIT PRODUCTS, AND THE FAILURE OF ANY OF THESE THIRD-PARTY VENDORS TO DELIVER PRODUCTS OR OTHERWISE PERFORM AS REQUESTED COULD DAMAGE OUR RELATIONSHIPS WITH OUR CUSTOMERS AND DECREASE OUR SALES AND LIMIT OUR GROWTH.

We do not have our own manufacturing, assembly or testing facilities. Therefore, we must rely on third-party vendors to manufacture, assemble and test the products we design. We currently rely on Taiwan Semiconductor Manufacturing Company to produce substantially all of our integrated circuit products. We also currently rely on third-party assembly and test subcontractors to assemble, package and test our products. If these vendors do not provide us with high quality products and services in a timely manner, or if one or more of these vendors terminates their relationship with us, we may be unable to obtain satisfactory replacements to fulfill customer orders on a timely basis, our relationships with our customers could suffer, our sales could decrease and our growth could be limited. Other significant risks associated with relying on these third-party vendors include:

- our customers or their end customers may fail to approve or delay in approving our selected supplier;
- we have reduced control over product cost, delivery schedules and product quality;
- the warranties on wafers or products supplied to us are limited; and
- we face increased exposure to potential misappropriation of our intellectual property.

We currently do not have long-term supply contracts with any of our third-party vendors. They therefore are not obligated to perform services or supply products to us for any specific period, in any specific quantities, or at any specific price, except as may be provided in a particular purchase order. None of our third-party foundry or assembly and test subcontractors has provided contractual assurances to us that adequate capacity will be available to us to meet future demand for our products. These foundries may allocate capacity to the production of other companies' products while reducing deliveries to us on short notice. In particular, foundry customers that are larger and better financed than we are or that have long-term agreements with these foundries may cause these foundries to reallocate capacity to those customers, decreasing the capacity available to us. If we need another integrated circuit foundry or assembly and test contractor because of increased demand or the inability to obtain timely and adequate deliveries from our providers at the time, we might not be able to develop relationships with other vendors who are able to satisfy our requirements. Even if other integrated circuit foundries or assembly and test contractors are available at that time to satisfy our requirements, it would likely take several months to acquire a new provider. Such a change may

also require the approval of our customers, which would take time to effect and could cause our customers to cancel orders or fail to place new orders.

IF OUR FOUNDRIES DO NOT ACHIEVE SATISFACTORY YIELDS OR QUALITY, OUR RELATIONSHIPS WITH OUR CUSTOMERS AND OUR REPUTATION WILL BE HARMED.

The fabrication of integrated circuits is a complex and technically demanding process. Our foundries have from time to time experienced manufacturing defects and reduced manufacturing yields. In the fourth quarter of fiscal 2000, we experienced low yields in the production of our newly introduced read channel product, which decreased our gross profits for the quarter. Changes in manufacturing processes or the inadvertent use of defective or contaminated materials by our foundries could result in lower than anticipated manufacturing yields or unacceptable performance. Many of these problems are difficult to detect at an early stage of the manufacturing process and may be time consuming and expensive to correct. Poor yields from our foundries, or defects, integration issues or other performance problems in our products could cause significant customer relations and business reputation problems, harm our financial results and result in financial or other damages to our customers. Our customers could also seek damages from us for their losses. A product liability claim brought against us, even if unsuccessful, would likely be time consuming and costly to defend. In addition, defects in our existing or new products could result in significant warranty, support and repair costs, and divert the attention of our engineering personnel from our product development efforts.

BECAUSE FOUNDRY CAPACITY IS LIMITED, WE MAY TAKE VARIOUS ACTIONS TO TRY TO SECURE CAPACITY, WHICH MAY BE COSTLY AND HARM OUR OPERATING RESULTS.

Foundry capacity is limited and competition for capacity is increasing. In order to secure foundry capacity as competition increases, we may enter into various arrangements with suppliers that could be costly and harm our operating results. This year, as we have increased our orders with Taiwan Semiconductor Manufacturing Company, Taiwan Semiconductor has tightened its credit policy applicable to us by determining whether our credit limit has been reached when we place orders, rather than when it begins production of our orders. This action required us to obtain additional credit facilities, which reduces our financial flexibility. As competition for foundry space increases, additional arrangements may be required, including:

- option payments or other prepayments to a foundry;
- nonrefundable deposits with or loans to foundries in exchange for capacity commitments;
- contracts that commit us to purchase specified quantities of integrated circuits over extended periods;
- issuance of our equity securities to a foundry;
- investment in a foundry;
- joint ventures; and
- other partnership relationships with foundries.

We may not be able to make any such arrangement in a timely fashion or at all, and any arrangements may be costly, reduce our financial flexibility, and not be on terms favorable to us. Moreover, if we are able to secure foundry capacity, we may be obligated to use all of that capacity or incur penalties. These penalties may be expensive and could harm our financial results.

WE DEPEND ON KEY PERSONNEL WITH WHOM WE DO NOT HAVE EMPLOYMENT AGREEMENTS TO MANAGE OUR BUSINESS IN A RAPIDLY CHANGING MARKET, AND IF WE ARE UNABLE TO RETAIN OUR CURRENT PERSONNEL AND HIRE ADDITIONAL PERSONNEL, OUR ABILITY TO DEVELOP AND SUCCESSFULLY MARKET OUR PRODUCTS COULD BE HARMED.

We believe our future success will depend in large part upon our ability to attract, integrate and retain highly skilled managerial, engineering and sales and marketing personnel. The loss of any key employees or the inability to attract or retain qualified personnel, including engineers and sales and marketing personnel, could delay the development and introduction of, and harm our ability to sell, our products. Due to the relatively early stage of our company's business, we believe that our future success is highly dependent on the contributions of Sehat Sutardja, our co-founder, President and Chief Executive Officer, Pantas Sutardja, our co-founder and Vice-President, and Chief Technology Officer of Marvell Semiconductor, and Weili Dai, our co-founder and Executive Vice President, and General Manager of Data Communications Group of Marvell Semiconductor. We do not have employment contracts with these or any other key personnel, and their knowledge of the business and industry would be extremely difficult to replace.

There is currently a shortage of qualified technical personnel with significant experience in the design, development, manufacture, marketing and sales of integrated circuits for use in communications products. In particular, there is a shortage of engineers who are familiar with the intricacies of the design and manufacture of products based on analog technology, and competition for these engineers is intense. Our key technical personnel represent a significant asset and serve as the source of our technological and product innovations. We may not be successful in attracting, integrating and retaining sufficient numbers of technical personnel to support our anticipated growth.

OUR RAPID GROWTH HAS STRAINED OUR RESOURCES AND OUR INABILITY TO MANAGE ANY FUTURE GROWTH COULD HARM OUR PROFITABILITY.

During the past year, we have significantly increased the scope of our operations and expanded our workforce from 101 employees at January 31, 1999 to 256 employees at April 30, 2000. This growth has placed, and any future growth of our operations will continue to place, a significant strain on our management personnel, systems and resources. We anticipate that we will need to implement a variety of new and upgraded operational and financial systems, procedures and controls, including the improvement of our accounting and other internal management systems. We also expect that we will need to continue to expand, train, manage and motivate our workforce. All of these endeavors will require substantial management effort. If we are unable to effectively manage our expanding operations, our profitability could be harmed.

As a result of this growth, we believe that our current facilities will be inadequate to meet our requirements past 2000. We expect we will need to locate additional space in California, and may find it necessary to vacate our current locations. If we relocate, we may have to pay rent on two leases for a period of time. Because of the competition for space in the area of California in which we are located, additional space may cost substantially more than our existing facilities. We may also incur significant additional capital expenditures for construction of tenant improvements. These relocations could also result in temporary disruptions of our operations and diversion of managements's attention and resources.

WE FACE FOREIGN BUSINESS, POLITICAL AND ECONOMIC RISKS, WHICH MAY HARM OUR RESULTS OF OPERATIONS, BECAUSE A MAJORITY OF OUR PRODUCTS AND OUR CUSTOMERS' PRODUCTS ARE MANUFACTURED AND SOLD OUTSIDE OF THE UNITED STATES.

A substantial portion of our business is conducted outside of the United States and as a result, we are subject to foreign business, political and economic risks. All of our products are manufactured outside of the United States. Our current qualified integrated circuit foundries are located in the same region within Taiwan, and our primary assembly and test subcontractors are located in the Pacific Rim

region. In addition, many of our customers are located outside of the United States, primarily concentrated in Singapore, Korea, the Philippines and Japan, which further exposes us to foreign risks. Sales outside of the United States accounted for 99% of our revenues in fiscal 1999 and fiscal 2000. We anticipate that our manufacturing, assembly, testing and sales outside of the United States will continue to account for a substantial portion of our operations and revenue in future periods. Accordingly, we are subject to international risks, including:

- difficulties in obtaining governmental approvals and permits and complying with foreign laws;
- difficulties in staffing and managing foreign operations;
- trade restrictions or higher tariffs;
- transportation delays;
- difficulties of managing distributors;
- political and economic instability; and
- inadequate local infrastructure.

Because sales of our products have been denominated to date exclusively in United States dollars, increases in the value of the United States dollar will increase the price of our products so that they become relatively more expensive to customers in the local currency of a particular country, potentially leading to a reduction in sales and profitability for us in that country. A portion of our international revenue may be denominated in foreign currencies in the future, which will subject us to risks associated with fluctuations in exchange rates for those foreign currencies.

OUR THIRD PARTY FOUNDRIES AND SUBCONTRACTORS ARE CONCENTRATED IN TAIWAN AND ELSEWHERE IN THE PACIFIC RIM, AN AREA SUBJECT TO SIGNIFICANT EARTHQUAKE RISKS. ANY DISRUPTION TO THE OPERATIONS OF THESE FOUNDRIES AND SUBCONTRACTORS RESULTING FROM EARTHQUAKES OR OTHER NATURAL DISASTERS COULD CAUSE SIGNIFICANT DELAYS IN THE PRODUCTION OR SHIPMENT OF OUR PRODUCTS.

Substantially all of our products are produced by Taiwan Semiconductor Manufacturing Company located in Taiwan. Currently our only alternative manufacturing source is also located in Taiwan. In addition, substantially all of our assembly and testing facilities are located in Singapore, Taiwan and the Philippines. The risk of an earthquake in Taiwan and elsewhere in the Pacific Rim region is a significant risk due to the proximity of major earthquake fault lines to the facilities of our foundries and subcontractors. In September 1999, a major earthquake in Taiwan affected the facilities of several of these third party contractors. As a consequence of this earthquake, these contractors suffered power outages and disruptions that impaired their production capacity. The occurrence of an earthquake or other natural disaster could result in the disruption of our foundry or assembly and test capacity. Any disruption resulting from such events could cause significant delays in the production or shipment of our products until we are able to shift our manufacturing, assembling or testing from the affected contractor to another third party vendor. We may not be able to obtain alternate capacity on favorable terms, if at all.

WE MAY NEED ADDITIONAL FUNDS TO EXECUTE OUR BUSINESS PLAN, AND IF WE ARE UNABLE TO OBTAIN THESE FUNDS, OR IF ADDITIONAL FUNDS ARE NOT AVAILABLE ON ACCEPTABLE TERMS WE WILL NOT BE ABLE TO EXPAND OUR BUSINESS AS PLANNED.

We may require substantial additional capital to finance our future growth, secure additional independent foundry capacity and fund our ongoing research and development activities beyond fiscal 2000. Our capital requirements will depend on many factors, including:

- acceptance of and demand for our products;
- the types of arrangements that we may enter into with our independent foundries; and

- the extent to which we invest in or acquire new technology and research and development projects and increase our sales and marketing or other operating expenses.

To the extent that the net proceeds from this offering, together with our existing sources of liquidity and cash flow from operations are insufficient to fund our activities, we may need to raise additional funds. Additional financing may not be available to us on terms favorable to us or at all. If we can raise additional funds through the issuance of equity securities, the percentage of ownership of our existing shareholders would be reduced. Any equity securities we issue may have rights, preferences or privileges senior to those of our common stock. If we issue debt securities, we may incur significant interest expense, which would harm our profitability. The issuance of debt securities may also require us to agree to various restrictions common to debt securities, including limitations on further borrowings and on our right to pay dividends. If additional funds are not available, we may be required to limit our research and development and sales and marketing activities and the expansion of our business.

OUR FAILURE TO SUCCESSFULLY INTEGRATE ANY ACQUISITIONS WE MAKE COULD DISRUPT OUR BUSINESS AND HARM OUR FINANCIAL CONDITION.

As part of our growth strategy, we may consider opportunities to acquire other businesses or technologies that would complement our current product offerings, expand the breadth of our markets or enhance our technical capabilities. To date, we have not made any acquisitions and we are currently not subject to any agreement or letter of intent with respect to potential acquisitions. Acquisitions entail a number of risks that could harm our business and result in the acquired business not performing as expected, including:

- problems integrating the acquired operations, personnel, technologies or products with our existing business and products;
- diversion of management's time and attention from our core business;
- difficulties in retaining business relationships with suppliers and customers of the acquired company;
- risks associated with entering markets in which we lack prior experience; and
- potential loss of key employees of the acquired company.

RISKS RELATED TO OUR INDUSTRY

THE AVERAGE SELLING PRICES OF PRODUCTS IN OUR MARKETS HAVE HISTORICALLY DECREASED RAPIDLY AND WILL LIKELY DO SO IN THE FUTURE, WHICH COULD HARM OUR GROSS PROFITS AND SALES.

The products we develop and sell are used for high volume applications. As a result, the prices of those products have historically decreased rapidly. For example, from fiscal 1999 to fiscal 2000, the average selling price of our data storage products decreased by approximately 20%. Our gross profits and financial results will suffer if we are unable to offset any reductions in our average selling prices by increasing our sales volumes, reducing our costs, or developing new or enhanced products on a timely basis with higher selling prices or gross profits. We expect that as a result of pricing pressure from our customers our gross profits on our data storage products are also likely to decrease over the next fiscal year below levels we have historically experienced. Because we do not operate our own manufacturing, assembly or testing facilities, we may not be able to reduce our costs as rapidly as companies that operate their own facilities, and our costs may even increase. In the past, we have reduced the average unit price of our products in anticipation of future competitive pricing pressures, new product introductions by us or our competitors and other factors. We expect that we will have to do so again in the future.

WE HAVE A LENGTHY AND EXPENSIVE SALES CYCLE, WHICH DOES NOT ASSURE PRODUCT SALES, AND WHICH IF UNSUCCESSFUL MAY HARM OUR OPERATING RESULTS.

The sales cycle for our products is long and requires us to invest significant resources with each potential customer without any assurance of sales to that customer. Our sales cycle typically begins with a three to six month evaluation and test period, also known as qualification, during which our products undergo rigorous reliability testing by our customers. Qualification is followed by a twelve to eighteen month development period by our customers and an additional three to six month period before a customer commences volume production of equipment incorporating our products. This lengthy sales cycle creates the risk that our customer will decide to cancel or change product plans for products incorporating our integrated circuits. During our sales cycle, our engineers assist our customers in implementing our solutions into their product. We incur significant research and development and selling, general and administrative expenses as part of this process and we may never generate related revenues. We derive revenue from this process only if our design is selected. Once a customer selects a particular integrated circuit for use in a data storage product, the customer generally uses solely that integrated circuit for a full generation of its product. Therefore, if we do not achieve a design win for a product we will be unable to sell our integrated circuit to our customer until our customer develops a new product or a new generation of its product. Even if we achieve a design win with a customer, our customer may not ultimately ship products incorporating our products or may cancel orders after we have achieved a sale. In addition, we will have to begin the qualification process again when a customer develops a new generation of a product for which we were the successful supplier.

Also, during the final production of a mature product, our customers typically exhaust their existing inventory of our integrated circuits. Consequently, orders for our products may decline in those circumstances, even if our products are incorporated into both our customer's mature and replacement products. A delay in the customer's transition to commercial production of a replacement product may cause them to lose sales, which would delay our ability to recover the lost sales from the discontinued mature product. Also customers may defer orders in anticipation of new products or product enhancements from us or our competitors.

WE ARE SUBJECT TO THE CYCLICAL NATURE OF THE INTEGRATED CIRCUIT INDUSTRY. ANY FUTURE DOWNTURNS WILL LIKELY REDUCE OUR REVENUE AND RESULT IN OUR HAVING EXCESS INVENTORY.

The integrated circuit industry is highly cyclical and is characterized by constant and rapid technological change, rapid product obsolescence and price erosion, evolving standards, short product life cycles and wide fluctuations in product supply and demand. The industry has experienced significant downturns, often connected with, or in anticipation of, maturing product cycles of both integrated circuit companies' and their customers' products and declines in general economic conditions. These downturns have been characterized by diminished product demand, production overcapacity, high inventory levels and accelerated erosion of average selling prices. Any future downturns will likely reduce our revenue and result in our having excess inventory. Furthermore, any upturn in the integrated circuit industry could result in increased competition for access to third-party foundry, assembly and test capacity.

WE ARE DEPENDENT UPON THE HARD DISK DRIVE INDUSTRY, WHICH IS HIGHLY CYCLICAL AND EXPERIENCES RAPID TECHNOLOGICAL CHANGE.

Prior to March, 2000, all of our sales were to customers in the hard disk drive industry. The hard disk drive industry is intensely competitive and the technology changes rapidly. As a result, this industry is highly cyclical, with periods of increased demand and rapid growth followed by periods of oversupply and subsequent contraction. These cycles may affect us as our customers are suppliers to this industry. Hard disk drive manufacturers tend to order more components than they may need during growth periods, and sharply reduce orders for components during periods of contraction. In

addition, advances in existing technologies and the introduction of new technologies may result in lower demand for disk drive storage devices, thereby reducing demand for our products.

Rapid technological changes in the hard disk drive industry often result in significant and rapid shifts in market share among the industry's participants. If the hard disk drive manufacturer supplied by our customers do not retain or increase market share, our sales may decrease.

THE DEVELOPMENT AND EVOLUTION OF MARKETS FOR OUR INTEGRATED CIRCUITS ARE DEPENDENT ON FACTORS, SUCH AS INDUSTRY STANDARDS, OVER WHICH WE HAVE NO CONTROL. FOR EXAMPLE, IF OUR CUSTOMERS ADOPT NEW OR COMPETING INDUSTRY STANDARDS WITH WHICH OUR PRODUCTS ARE NOT COMPATIBLE OR FAIL TO ADOPT STANDARDS WITH WHICH OUR PRODUCTS ARE COMPATIBLE, OUR EXISTING PRODUCTS WOULD BECOME LESS DESIRABLE TO OUR CUSTOMERS AND OUR SALES WOULD SUFFER.

The emergence of markets for our integrated circuits is affected by a variety of factors beyond our control. In particular, our products are designed to conform to current specific industry standards. Our customers may not adopt or continue to follow these standards, which would make our products less desirable to our customers and reduce our sales. Also, competing standards may emerge that are preferred by our customers, which could also reduce our sales and require us to make significant expenditures to develop new products.

We have made a significant investment in the development and production of our Gigabit Ethernet products. However, the Gigabit Ethernet technology is relatively new compared to the more established 10 and 100 megabits per second Ethernet technologies. If the Gigabit Ethernet technology does not achieve widespread market acceptance, our Gigabit Ethernet products may never be profitable.

WE MAY BE UNABLE TO PROTECT OUR INTELLECTUAL PROPERTY, WHICH WOULD NEGATIVELY AFFECT OUR ABILITY TO COMPETE.

We believe one of our key competitive advantages results from our collection of proprietary technologies that we have developed since our inception. If we fail to protect these intellectual property rights, competitors could sell products based on technology that we have developed, which could harm our competitive position and decrease our revenues. We believe that the protection of our intellectual property rights is and will continue to be important to the success of our business. We rely on a combination of patent, copyright, trademark and trade secret laws, as well as nondisclosure agreements and other methods, to protect our proprietary technologies. We also enter into confidentiality or license agreements with our employees, consultants and business partners, and control access to and distribution of our documentation and other proprietary information. As of April 30, 2000, we had been issued nine United States patents and had a number of pending United States patent applications. However, a patent may not be issued as a result of any applications or, if issued, claims allowed may not be sufficiently broad to protect our technology. In addition, it is possible that existing or future patents may be challenged, invalidated or circumvented. Despite our efforts, unauthorized parties may attempt to copy or otherwise obtain and use our products or proprietary technology. Monitoring unauthorized use of our technology is difficult, and the steps that we have taken may not prevent unauthorized use of our technology, particularly in foreign countries where the laws may not protect our proprietary rights as fully as in the United States.

SIGNIFICANT LITIGATION OVER INTELLECTUAL PROPERTY IN OUR INDUSTRY MAY CAUSE US TO BECOME INVOLVED IN COSTLY AND LENGTHY LITIGATION, WHICH COULD SUBJECT US TO LIABILITY, REQUIRE US TO STOP SELLING OUR PRODUCTS OR FORCE US TO REDESIGN OUR PRODUCTS.

Litigation involving patents and other intellectual property is widespread in the high-technology industry and is particularly prevalent in the integrated circuit industry, where a number of companies aggressively bring numerous infringement claims to protect their patent portfolios. We may become a party to litigation in the future either to protect our intellectual property or as a result of an alleged

infringement of others' intellectual property. These lawsuits could subject us to significant liability for damages and invalidate our proprietary rights. These lawsuits, regardless of their success, would likely be time-consuming and expensive to resolve and would divert management time and attention. Any potential intellectual property litigation also could force us to do one or more of the following:

- stop selling products or using technology that contain the allegedly infringing intellectual property;
- pay damages to the party claiming infringement;
- attempt to obtain a license to the relevant intellectual property, which license may not be available on reasonable terms or at all; and
- attempt to redesign those products that contain the allegedly infringing intellectual property.

RISKS RELATED TO THIS OFFERING

WE ARE INCORPORATED IN BERMUDA, AND, AS A RESULT, IT MAY NOT BE POSSIBLE FOR SHAREHOLDERS TO ENFORCE CIVIL LIABILITY PROVISIONS OF THE SECURITIES LAWS OF THE UNITED STATES.

We are organized under the laws of Bermuda. As a result, it may not be possible for our shareholders to effect service of process within the United States upon us, or to enforce against us in United States courts judgments based on the civil liability provisions of the securities laws of the United States. Our executive officers and directors are all residents of the United States. However, there is significant doubt as to whether the courts of Bermuda would recognize or enforce judgments of United States courts obtained against us or our directors or officers based on the civil liabilities provisions of the securities laws of the United States or any state or hear actions brought in Bermuda against us or those persons based on those laws. We have been advised by our legal advisor in Bermuda, Conyers, Dill & Pearman, that the United States and Bermuda do not currently have a treaty providing for the reciprocal recognition and enforcement of judgments in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States based on civil liability, whether or not based solely on United States federal or state securities laws, would not be automatically enforceable in Bermuda.

OUR BYE-LAWS CONTAIN A WAIVER OF CLAIMS OR RIGHTS OF ACTION BY OUR SHAREHOLDERS AGAINST OUR OFFICERS AND DIRECTORS, WHICH WILL SEVERELY LIMIT YOUR RIGHT TO ASSERT A CLAIM AGAINST OUR OFFICERS AND DIRECTORS UNDER BERMUDA LAW.

Our Bye-laws contain a broad waiver by our shareholders of any claim or right of action, individually or on behalf of the Company, against any of our officers and directors. The waiver applies to any action taken by an officer or director, or the failure of an officer or director to take any action, in the performance of his or her duties with or for us, other than with respect to any matter involving any fraud or dishonesty on the part of such officer or director. This waiver will limit your right to assert claims against our officers and directors unless the act complained of involves actual fraud or dishonesty. Thus, so long as acts of business judgment do not involve actual fraud or dishonesty, they will not be subject to shareholder claims under Bermuda law. For example, shareholders will not have claims against officers and directors for a breach of trust, unless the breach rises to the level of actual fraud or dishonesty.

BERMUDA LAW DIFFERS FROM THE LAWS IN EFFECT IN THE UNITED STATES AND MAY AFFORD LESS PROTECTION TO SHAREHOLDERS.

Our shareholders may have more difficulty in protecting their interests than would shareholders of a corporation incorporated in a jurisdiction of the United States. We are a Bermuda company and, accordingly, are governed by The Companies Act, 1981 of Bermuda. The Companies Act, 1981 of Bermuda differs in material respects from laws applicable to United States corporations and

shareholders, including the provisions relating to interested directors, mergers and similar arrangements, takeovers, shareholder lawsuits, indemnification of directors and inspection of corporate records. Further information on the differences between the laws of Bermuda and the United States are described in this prospectus under the heading "Certain Foreign Issuer Considerations".

TAX BENEFITS WE RECEIVE MAY BE TERMINATED OR REDUCED IN THE FUTURE, WHICH WOULD INCREASE OUR COSTS.

We will be subject to United States federal income tax at regular corporate rates and to United States branch profits tax on our income that is effectively connected with the conduct of a trade or business in the United States. We intend to conduct our business so as to limit the amount of our income that is United States effectively connected income. As an example, we have developed sales offices in Singapore and Japan that handle foreign sales activities. The Internal Revenue Service may not agree with our past or future positions as to the amount of effectively connected income that we earn. A disallowance of our positions could subject us to significant liabilities for back taxes and interest. We currently accrue for taxes at a rate of 25%. We expect to pay taxes at an effective tax rate of approximately 5%. The maximum federal income tax rate is 35% and the branch profits tax rate is 30%. We have filed federal income tax returns since 1996. The Internal Revenue Service examined our 1996 United States federal income tax return and made no adjustment; however, we had losses for that year. Dividends from our United States subsidiary will be subject to a 30% United States withholding tax. We do not anticipate paying any such dividends in the foreseeable future.

The Economic Development Board of Singapore has informed us that it intends to recommend us for pioneer status. We believe that we will shortly receive official approval of pioneer status for a period of at least six years, commencing July 1, 1999. As a result, we anticipate that a significant portion of the income we earn in Singapore during this period will be exempt from the 26% Singapore tax rate. We are required to meet several requirements as to investment, headcount and activities in Singapore to retain this status. If we do not receive pioneer status or if our status is terminated early, our financial results could be harmed.

Under current Bermuda law, we are not subject to tax on our income or capital gains. We have obtained from the Minister of Finance of Bermuda under the Exempt Undertakings Tax Protection Act 1966, as amended, an undertaking that, in the event that Bermuda enacts any legislation imposing tax computed on income or capital gains, those taxes should not apply to us until March 28, 2016. However, this exemption may not be extended beyond this date.

IF WE ARE CLASSIFIED AS A PASSIVE FOREIGN INVESTMENT COMPANY, OUR SHAREHOLDERS MAY SUFFER ADVERSE TAX CONSEQUENCES.

Because we are incorporated in Bermuda and have operations in the United States and Singapore, we are subject to special rules and regulations, including rules regarding passive foreign investment company or PFIC. We believe that we are not a PFIC, and we expect to continue to manage our affairs so that we will not become a PFIC. However, whether we should be treated as a PFIC is a factual determination that is made annually and is subject to change. If we are classified as a PFIC, then each United States holder of our common stock would, upon qualifying distributions by us or upon the pledge or sale of their shares of common stock at a gain, be liable to pay tax at the then prevailing rates on ordinary income plus an interest charge, generally as if the distribution or gain had been earned ratably over the shareholder's holding period. In addition to the risks related to PFIC status, we and our shareholders could also suffer adverse tax consequences if we are classified as a foreign personal holding company, a personal holding company or a controlled foreign corporation, each of which is described in this prospectus under the heading "Taxation".

EXISTING SHAREHOLDERS OWN A LARGE PERCENTAGE OF OUR VOTING STOCK, AND THREE EXISTING DIRECTORS, WHO ARE ALSO SIGNIFICANT SHAREHOLDERS, ARE RELATED BY BLOOD OR MARRIAGE. THESE FACTORS MAY ALLOW THE EXISTING SHAREHOLDERS OR THE THREE RELATED DIRECTORS TO CONTROL THE ELECTION OF DIRECTORS AND THE APPROVAL OR DISAPPROVAL OF SIGNIFICANT CORPORATE ACTIONS FOLLOWING THIS OFFERING.

Immediately after this offering, we anticipate that our executive officers, directors and other principal shareholders will beneficially own or control, directly or indirectly, approximately 66% of the outstanding shares of common stock. Additionally, Sehat Sutardja and Weili Dai are husband and wife and Sehat Sutardja and Pantas Sutardja are brothers. All three are directors and together they will hold approximately 44% of our outstanding common stock after the completion of this offering. As a result, if the existing shareholders or any of Sehat Sutardja, Pantas Sutardja and Weili Dai act together, they will significantly influence, and will likely control, the election of our directors and approval or disapproval of our significant corporate actions. This influence over our affairs might be adverse to the interests of other shareholders. In addition, the voting power of these shareholders or directors could have the effect of delaying or preventing an acquisition of our company on terms that other shareholders may desire.

We have been informed by Conyers Dill & Pearman, our Bermuda counsel, that under Bermuda law majority shareholders have no fiduciary duties to minority shareholders. As a result, the minority shareholders will not have a direct claim against the majority shareholders in the event the majority shareholders take actions that damage the interests of minority shareholders.

OUR COMMON STOCK HAS NOT BEEN PUBLICLY TRADED, AND WE EXPECT THAT THE PRICE OF OUR STOCK MAY FLUCTUATE SUBSTANTIALLY.

Recently, the stock prices of technology companies similar to Marvell have been quite volatile. Moreover, prior to this offering, there has been no public market for our common stock. The initial public offering price will be determined through negotiations between the underwriters and us. If you purchase shares of common stock, you may not be able to resell your shares at or above the initial offering price. The market price of our common stock may fluctuate significantly in response to numerous factors, many of which are beyond our control and are difficult or impossible to forecast, including the following:

- actual or anticipated fluctuations in our sales and operating results;
- changes in recommendations or financial estimates by securities analysts or our failure to perform in line with such estimates;
- changes in market valuations of other technology companies, particularly those that design, manufacture and/or sell integrated circuits;
- announcements by us or our competitors of significant technical innovations, acquisitions, strategic partnerships, joint ventures or capital commitments;
- introduction of technologies or product enhancements that reduce the need for our products;
- departures of key personnel; and
- sales of our common stock in the future.

CLASS ACTION LITIGATION DUE TO STOCK PRICE VOLATILITY COULD CAUSE US TO INCUR SUBSTANTIAL COSTS AND DIVERT OUR MANAGEMENT'S ATTENTION AND RESOURCES.

In the past, securities class action litigation often has been brought against a company following periods of volatility in the market price of its securities. Companies in the integrated circuit industry and other technology industries are particularly vulnerable to this kind of litigation due to the high volatility of their stock prices. Accordingly, we may in the future be the target of securities litigation.

Securities litigation could result in substantial costs and could divert our management's attention and resources.

FUTURE SALES OF OUR COMMON STOCK IN THE PUBLIC MARKET MAY DEPRESS OUR STOCK PRICE.

After this offering, we will have outstanding 82,211,425 shares of common stock. Sales of a substantial number of shares of our common stock in the public market following this offering could cause our stock price to decline. Substantially all the shares sold in this offering will be freely tradable. Of the remaining 76,211,425 shares of common stock outstanding after this offering, approximately _____ shares will be subject to lock-up agreements with the underwriters ending 180 days after the date of this prospectus, but will then be eligible for sale in the public market. The remaining _____ shares will become freely tradable at various times after the date of this prospectus. Goldman, Sachs & Co. can waive the restrictions of the lock-up agreements at an earlier time without prior notice or announcement and allow shareholders to sell their shares. As restrictions on resale end, the market price of our stock could drop significantly if the holders of restricted shares sell them or are perceived by the market as intending to sell them. In addition, the sale of these shares could impair our ability to raise capital through the sale of additional stock.

WE INTEND TO ADOPT PROVISIONS IN OUR BYE-LAWS THAT COULD DELAY OR PREVENT A CHANGE IN CORPORATE CONTROL, EVEN IF THE CHANGE IN CORPORATE CONTROL WOULD BENEFIT OUR SHAREHOLDERS.

At our annual general meeting of shareholders in May 2000, we intend to seek the approval of our shareholders of an amendment and restatement of our Bye-laws, which would include the adoption of change in corporate control provisions. These change in corporate control provisions would include:

- authorizing the issuance of preferred stock without shareholder approval;
- providing for a classified board of directors with staggered, three-year terms;
- prohibiting cumulative voting in the election of directors; and
- requiring two-thirds of the outstanding shares to approve amendments to some provisions of our Bye-laws.

The adoption of these change in corporate control provisions could make it more difficult for a third party to acquire us, even if doing so would be a benefit to our shareholders.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

In this prospectus we have made statements under the headings "Prospectus Summary," "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations," "Business" and in other sections that are forward-looking statements. In some cases, you can identify these statements by forward-looking words such as "may," "might," "will," "should," "intends," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "projects," "potential" or "continue," the negative of these terms and other comparable expressions. These forward-looking statements, which are subject to risks, uncertainties, and assumptions about us, may include, among other things, projections of our future financial performance, our anticipated growth strategies, anticipated product introductions and anticipated trends in our business. These statements are only predictions based on our current expectations and projections about future events. Because these forward-looking statements involve risks and uncertainties, there are important factors that could cause our actual results, level of activity, performance or achievements to differ materially from the results, level of activity, performance or achievements expressed or implied by the forward-looking statements, including those factors discussed under the heading "Risk Factors". You should specifically consider the numerous risks described under the heading "Risk Factors".

USE OF PROCEEDS

The net proceeds to us from the sale of the 6,000,000 shares of common stock offered by us will be approximately \$54.3 million, or approximately \$62.6 million if the underwriters' option to purchase additional shares is exercised in full. The amount of net proceeds has been calculated based on an assumed initial public offering price of \$10.00 per share and after deducting an assumed underwriting discount and the estimated offering expenses payable by us. The primary purposes of this offering are to obtain additional equity capital, create a public market for our common stock and facilitate future access to public markets.

We intend to use the net proceeds from this offering primarily for general corporate purposes, including working capital and capital expenditures. We may use a portion of the net proceeds from this offering to acquire or invest in businesses, technologies or services that are complementary to our existing business. However, we have no present plans or commitments and are not engaged in any negotiations with respect to any material transactions of this type. Pending these uses, we intend to invest the net proceeds in short-term, investment-grade, interest-bearing securities, certificates of deposit or guaranteed obligations of the United States.

DIVIDEND POLICY

We have never declared or paid cash dividends on our capital stock. We currently expect to retain earnings, if any, to finance the growth and development of our business. Therefore, we do not anticipate declaring or paying cash dividends on our common stock in the foreseeable future. The decision whether to pay dividends will be made by our Board of Directors from time to time in light of conditions then existing including, among other things, our results of operations, financial condition and anticipated cash requirements. Our loan agreement with our bank contains restrictions on the payment of dividends.

CAPITALIZATION

The following table sets forth our capitalization as of January 31, 2000:

- on an actual basis;
- on a pro forma basis giving effect to the automatic conversion of all outstanding shares of preferred stock into common stock, resulting in the issuance of 26,439,500 shares of common stock upon the closing of this offering; and
- on a pro forma as adjusted basis to reflect the sale of 6,000,000 shares of common stock in this offering at an assumed initial public offering price of \$10.00 per share, after deducting an assumed underwriting discount and the estimated offering expenses payable by us and the application of the net proceeds from the offering.

	JANUARY 31, 2000

	=====	=====	=====

This information should be read in conjunction with our financial statements and the notes relating to those statements appearing elsewhere in this prospectus.

- - - - -

The number of shares of common stock outstanding set forth in the table above excludes the following:

- 12,385,924 shares issuable upon the exercise of outstanding stock options, at a weighted average exercise price of \$0.87 per share;
- 180,000 shares issuable upon the exercise of a warrant to purchase common stock that at the closing of this offering will be issued to replace a warrant to purchase 45,000 shares of Series D preferred stock;
- 60,000 shares issuable upon the exercise of an outstanding warrant to purchase common stock;
- 365,412 shares issuable upon the automatic conversion of Series D preferred stock that we expect to issue upon the exercise of warrants that would otherwise expire upon the closing of this offering;
- 5,082,520 shares available for future issuance under our 1995 Stock Option Plan and 1997 Directors' Stock Option Plan; and
- 1,152,250 shares issuable upon the exercise of outstanding stock options, at a weighted average exercise price of \$5.00 per share, granted subsequent to January 31, 2000 and through April 30, 2000.

DILUTION

As of January 31, 2000, our pro forma net tangible book value was approximately \$30,293,000, or \$0.40 per share of common stock. Pro forma net tangible book value per share represents the amount of our total tangible assets less total liabilities, divided by 75,371,060 shares of common stock outstanding giving effect to the conversion of all outstanding shares of preferred stock into shares of common stock upon completion of this offering. Dilution in net tangible book value per share represents the difference between the amount per share paid by purchasers of shares of our common stock in this offering and the net tangible book value per share of our common stock immediately following this offering.

Purchasers of common stock in this offering will experience immediate dilution. Without taking into account any changes in net tangible book value after January 31, 2000, other than to give effect to the sale of the shares of common stock offered by us at an assumed initial public offering price of \$10.00 per share, and after deducting an assumed underwriting discount and estimated offering expenses payable by us, our pro forma net tangible book value as of January 31, 2000 would have been approximately \$84,568,000 or \$1.04 per share of common stock. This amount represents an immediate increase in pro forma net tangible book value of \$0.64 per share to the existing shareholders and an immediate dilution in pro forma net tangible book value of \$8.96 per share to new investors purchasing shares in this offering. If the initial public offering price is higher or lower, the dilution to new investors will be greater or less. The following table illustrates the dilution in pro forma net tangible book value per share to new investors.

Assumed initial public offering price per share.....	\$10.00
Pro forma net tangible book value per share as of January 31, 2000.....	\$ 0.40
Increase per share attributable to new investors.....	0.64

Pro forma net tangible book value per share after this offering.....	1.04

Dilution per share to new investors.....	\$ 8.96
	=====

The following table summarizes as of January 31, 2000, on the pro forma basis described above, the number of shares of common stock purchased from us, the total consideration paid to us and the average price per share paid by existing shareholders and by new investors purchasing shares of common stock in this offering, before deducting underwriting discounts and commissions and the estimated offering expenses:

	SHARES PURCHASED		TOTAL CONSIDERATION		AVERAGE PRICE
	NUMBER	PERCENT	AMOUNT	PERCENT	PER SHARE
Existing shareholders.....	75,371,060	92.6%	\$26,605,000	30.7%	\$ 0.35
New investors.....	6,000,000	7.4	60,000,000	69.3	\$10.00
		-----		-----	
Total.....	81,371,060	100.0%	\$86,605,000	100.0%	
	=====	=====	=====	=====	

The above information excludes:

- 12,385,924 shares issuable upon the exercise of outstanding stock options, at a weighted average exercise price of \$0.87 per share;
- 180,000 shares issuable upon the exercise of a warrant to purchase common stock that at the closing of this offering will be issued to replace a warrant to purchase 45,000 shares of Series D preferred stock;
- 60,000 shares issuable upon the exercise of an outstanding warrant to purchase common stock;
- 365,412 shares issuable upon the automatic conversion of Series D preferred stock that we expect to issue upon the exercise of warrants that would otherwise expire upon the closing of this offering;

- 5,082,520 shares available for future issuance under our 1995 Stock Option Plan and 1997 Directors' Stock Option Plan; and

- 1,152,250 shares issuable upon the exercise of outstanding stock options, at a weighted average exercise price of \$5.00 per share, granted subsequent to January 31, 2000 and through April 30, 2000.

To the extent any of these options is exercised, there will be further dilution to new investors. Assuming the exercise of all outstanding options and warrants as of January 31, 2000, our pro forma net tangible book value at January 31, 2000 would have been \$41,750,000, or \$0.47 per share. Without taking into account any changes in net tangible book value after January 31, 2000, other than to give effect to the sale of the shares of common stock offered by us at an assumed initial public offering price of \$10.00 per share, and after deducting an assumed underwriting discount and estimated offering expenses payable by us, our pro forma net tangible book value as of January 31, 2000 would have been approximately \$96,025,000 or \$1.02 per share of common stock. This amount represents an immediate increase in pro forma net tangible book value of \$0.55 per share to the existing shareholders and an immediate dilution in pro forma net tangible book value of \$8.98 per share to new investors purchasing shares in this offering.

SELECTED CONSOLIDATED FINANCIAL DATA

The following selected consolidated financial data should be read in conjunction with, and are qualified by reference to, our consolidated financial statements and related notes and "Management's Discussion and Analysis of Financial Condition and Results of Operations" appearing elsewhere in this prospectus. The statements of operations data for the years ended January 31, 1998, 1999 and 2000, and the balance sheet data as of January 31, 1999 and 2000, are derived from, and are qualified by reference to, our audited consolidated financial statements which are included elsewhere in this prospectus. The statements of operations data for the years ended January 31, 1996 and 1997, and the balance sheet data as of January 31, 1996, 1997 and 1998 are derived from financial statements that are not included in this prospectus. The historical results presented below are not necessarily indicative of future results. See Note 1 of the notes to our consolidated financial statements for an explanation of the determination of the number of shares used to compute per share amounts.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results may differ significantly from the results discussed in these forward-looking statements. We assume no obligation to update the forward-looking statements or such risk factors. Our fiscal year-end financial reporting periods end on the Saturday closest to January 31st. For purposes of presentation, we have indicated our fiscal year as ending on January 31.

OVERVIEW

We design, develop and market integrated circuits for the communications-related markets of high speed, high density data storage and broadband data communications. We were founded in 1995, and our business has grown rapidly since our inception. We are a fabless integrated circuit company, which means that we rely on independent, third-party contractors to perform manufacturing, assembly and test functions. This approach allows us to focus on designing, developing and marketing our products and significantly reduces the amount of capital we need to invest in manufacturing products.

From January 1995 until early calendar 1998, we were in a development stage and engaged primarily in research and development. To develop our business quickly, we initially focused our efforts on applying our core technology to develop products for the data storage market. All our product revenues from inception through February 2000 were derived from sales of our read channel and preamplifier products to customers in the data storage market.

We began shipping our first generation read channel products in volume in June 1998. We began volume shipments of preamplifier products in June 1999. Read channels have historically accounted for more than 85% of our quarterly sales and virtually all of the balance has been derived from sales of preamplifier products. We expect to remain dependent on continued sales of read channel and preamplifier products for a majority of our revenue until we are able to diversify revenue through the addition of new products. We have introduced two new generations of read channel products and one new generation of preamplifier products since we first started shipping read channel and preamplifier products.

The data storage market is highly competitive and is dominated by a small number of large companies, including Seagate, Quantum, Western Digital, Samsung, Hitachi, Fujitsu and Toshiba. These companies have historically experienced marginal profit levels from sales of their data storage products and are under enormous pricing pressure from their customers, which they typically pass through to their integrated circuit suppliers.

We have achieved successive quarterly growth in revenues and profitability in fiscal 2000 from sales of our data storage products. However, the data storage industry is an old, matured industry with rapidly declining average selling prices, short product life cycles and cyclical nature of demand for its products. We were able to penetrate this market by offering integrated circuits we believe were more technologically advanced than our competitors. However, we believe this market offers limited opportunities for continued future growth in revenues and profitability. We believe that the data communications sector is an emerging market which we believe offers greater opportunities for growth.

In December 1999, we introduced our first generation product for Fast Ethernet applications, which began shipping and generating revenue in March 2000. In March 2000, we introduced another product for Fast Ethernet applications, which customers are now sampling. We expect to introduce additional broadband data communications products during calendar year 2000. Our future broadband data communications revenue will depend upon completion of our product development and acceptance by our customers.

We recognize product revenue upon shipment of our products to customers, net of accruals for estimated sales returns and allowances. We have not experienced any significant sales returns from customers to date. Substantially all of our sales have been generated through our direct sales force. In March 2000, we entered into our first distribution agreement to support our sales and marketing activities in the broadband data communications market, and we plan to enter into other distribution agreements during calendar year 2000. We defer recognition of product revenue on sales made through a distributor until the distributor sells our product to its customer.

Historically, a relatively small number of customers have accounted for a significant portion of our revenue. Our top five customers accounted for 90%, 99% and 98% of our revenue for the years ended January 31, 1998, 1999 and 2000. We anticipate that sales to distributors will increase as a percentage of our revenue in future periods. However, we expect to continue to experience significant customer concentration from direct sales to key customers.

In addition, a significant portion of our products is sold to customers overseas. Sales to customers in Asia accounted for 99% of our revenue in each of the years ended January 31, 1999 and 2000. Because many manufacturers and subcontractors of data storage and broadband data communications devices are located in Asia, we expect that a majority of our revenue will continue to be represented by sales to customers in that region. All of our sales have been denominated in U.S. dollars.

Our sales have historically been made on the basis of purchase orders rather than long-term agreements. In addition, the sales cycle for our products is long, which may cause us to experience a delay between the time we incur expenses and the time we generate revenue from these expenditures. We expect to increase our research and development, marketing and selling, and general and administrative expenditures as we seek to expand our operations. We anticipate the rate of new orders may vary significantly from quarter to quarter. Consequently, if anticipated sales and shipments in any quarter do not occur when expected, expenses and inventory levels could be disproportionately high, seriously harming our operating results for that quarter and, potentially, future quarters.

We will incur substantial stock compensation expense in future periods which represents non-cash charges incurred as a result of the issuance of stock options to employees and directors. These charges are recorded based on the difference between the deemed fair value of the common stock and the option exercise price of such options at the date of grant and are amortized under an accelerated method over the option vesting period. At January 31, 2000, the amount of the deferred charge to be amortized over future periods was \$11.9 million. We will incur an additional deferred charge of \$5.8 million for options granted subsequent to January 31, 2000 and through February 29, 2000 to be amortized in future periods. Of the aggregate \$17.8 million remaining to be amortized, \$8.2 million is expected to be charged in fiscal 2001, \$4.7 million in fiscal 2002, \$2.7 million in fiscal 2003 and the balance in future years.

We have accrued income taxes at an effective tax rate of 25% since achieving consolidated profitability in fiscal 2000. The difference between this rate and the federal tax rate of 35% is due to the lower tax rates imposed on our operations in Bermuda and Singapore and to the benefits realized from research and development credits in the United States. Our operations in Singapore are subject to a statutory tax rate of 26%. The Economic Development Board of Singapore has informed us that it intends to recommend us for pioneer status. We believe that we will shortly receive official approval of pioneer status for a period of at least six years, commencing July 1, 1999. As a result, we currently believe that approximately 60% of our Singapore profits will not be subject to tax prior to July 31, 2005. During the year ended January 31, 2000, Singapore profits represented approximately 6% of our total income before taxes. This percentage will fluctuate from period to period depending upon the relative growth of our Singapore operations as compared to our overall operations. We have an undertaking from the government of Bermuda that we will not be subject to tax on our income and capital gains in Bermuda until March 28, 2016.

RESULTS OF OPERATIONS

The following table sets forth the statements of operations data expressed as a percentage of net revenue for the periods indicated.

	YEAR ENDED JANUARY 31,		
	1998	1999	2000
	-----	-----	-----
Net revenue.....	100.0%	100.0%	100.0%
Cost of product revenue.....	49.9	47.5	41.5
	-----	-----	-----
Gross profit.....	50.1	52.5	58.5
Operating expenses:			
Research and development.....	802.9	27.5	17.8
Marketing and selling.....	267.4	21.8	12.8
General and administrative.....	164.5	5.6	4.2
Amortization of stock compensation.....	--	0.2	2.7

	-----	-----	-----
Operating income (loss).....	(1184.7)	(2.6)	21.0
Interest income.....	27.2	0.8	0.6
Interest expense.....	(26.2)	(0.5)	(0.2)
	-----	-----	-----
Income (loss) before income taxes.....	(1183.7)	(2.3)	21.4
Provision for income taxes.....	(7.4)	(2.3)	(5.4)
	-----	-----	-----
Net income (loss).....	(1191.1)%	(4.6)%	16.0%
	=====	=====	=====

YEARS ENDED JANUARY 31, 1998, 1999 AND 2000

NET REVENUE. We recognize revenue upon shipment of product to our customers, net of accruals for estimated sales returns and allowances. Net revenue increased from \$625,000 in fiscal 1998 to \$21.3 million in fiscal 1999, and to \$81.4 million in fiscal 2000. Fiscal 1998 revenue included approximately \$197,000 of revenue derived from a research and development contract. Revenue in fiscal 1999 reflects commencement of volume shipments of our read channel products. Revenue increased from fiscal 1999 to fiscal 2000 primarily as a result of continued market acceptance of our read channel products and commencement of volume shipment of our preamplifier products. Although average selling prices declined by approximately 20% from fiscal 1999 to fiscal 2000, the volume of units shipped increased from approximately 5.1 million units in fiscal 1999 to 24.9 million units in fiscal 2000. Sales of read channel products increased from \$21.2 million in fiscal 1999 to \$76.0 million in fiscal 2000, while sales of preamplifier products increased from \$8,000 in fiscal 1999 to \$5.4 million in fiscal 2000. We expect that the rate of growth of our revenue from sales of data storage products will be considerably lower in fiscal 2001 than the rate of growth we experienced in fiscal 1999 and fiscal 2000.

COST OF PRODUCT REVENUE. Cost of product revenue consists primarily of the costs of manufacturing, assembly and test of our integrated circuit devices and related overhead costs, and compensation and associated costs related to manufacturing support, logistics and quality assurance personnel. Gross profit, which equals product revenue, excluding \$197,000 in revenue for the year ended January 31, 1998 related to a research and development contract, less cost of product revenue, as a percentage of revenue, increased from 27.1% in fiscal 1998, to 52.5% in fiscal 1999, and to 58.5% in fiscal 2000. The increase in gross profit in fiscal 1999 was primarily due to the substantial increase in sales from \$625,000 in fiscal 1998 to \$21.3 million in fiscal 1999. The increase in gross profit in fiscal 2000 was primarily due to the substantial increase in sales from \$21.3 million in fiscal 1999 to \$81.4 million in fiscal 2000, and a reduction in product costs per unit in fiscal 2000 of approximately 15%. We expect our gross profit to decrease as a percentage of revenue due to increased pricing pressures from our customers as well as from our competitors and due to potential cost increases resulting from limited foundry capacity.

Product costs per unit declined in fiscal 2000 due to a general decrease in the prices charged by contract manufacturers of integrated circuits because of the availability of capacity within the integrated circuit manufacturing industry, as well as improvements in the manufacturing yields achieved through the third quarter of fiscal 2000. We experienced a decline in our yields in the fourth quarter of fiscal 2000 due to the initial production ramp up of our newest, more complex, read channel products.

RESEARCH AND DEVELOPMENT. Research and development expense consists primarily of compensation and associated costs relating to development personnel, prototype costs, depreciation expenses and allocated occupancy costs for these operations. Research and development expense was \$5.0 million, or 802.9% of revenue, for fiscal 1998, \$5.8 million, or 27.5% of revenue, for fiscal 1999, and \$14.5 million, or 17.8% of revenue, for fiscal 2000. The fiscal 1999 to fiscal 2000 increases in absolute dollars were primarily due to increases of \$3.6 million for the hiring of additional development personnel, \$813,000 for prototype wafer costs and services, \$593,000 for mask and reticle costs and \$537,000 for depreciation expense arising from significant purchases of computer aided design software tools. We expect that research and development expense will increase substantially in absolute dollars in future periods and as a percentage of revenue in fiscal 2001 as we develop new products, engage in other product development initiatives and increase our number of research and development personnel.

MARKETING AND SELLING. Marketing and selling expense consists primarily of compensation and associated costs relating to marketing and selling personnel, sales commissions to independent sales representatives, promotional and other marketing expenses, and allocated occupancy costs for these operations. Marketing and selling expense was \$1.7 million, or 267.4% of revenue, for fiscal 1998, \$4.6 million or 21.8% of revenue, for fiscal 1999, and \$10.4 million, or 12.8% of revenue, for fiscal 2000. The year-to-year increases in absolute dollars were due primarily to the hiring of additional personnel and a resulting increase in salary and related costs of approximately \$2.3 million from fiscal 1999 to fiscal 2000, increased sales commissions of approximately \$1.8 million from fiscal 1999 to fiscal 2000, and increased costs of approximately \$627,000 from fiscal 1999 to fiscal 2000 related to expanding our sales and marketing activities as we broadened our customer and product base. We expect that marketing and selling expense will increase substantially in absolute dollars and as a percentage of revenue in fiscal 2001 as we hire additional personnel, expand our sales and marketing efforts, particularly in broadband data communications, and pay increased sales commissions.

GENERAL AND ADMINISTRATIVE. General and administrative expense consists primarily of compensation and associated costs relating to general and administrative personnel, professional fees and allocated occupancy costs for these operations. General and administrative expense was \$1.0 million, or 164.5% of revenue, for fiscal 1998, \$1.2 million, or 5.6% of revenue, for fiscal 1999, and \$3.4 million or 4.2% of revenue, for fiscal 2000. The year-to-year increases in absolute dollars were due primarily to the hiring of additional personnel and a resulting increase in salary and related costs of approximately \$1.6 million from fiscal 1999 to fiscal 2000, and increased legal, accounting and consulting fees of approximately \$403,000 from fiscal 1999 to fiscal 2000. We expect that general and administrative expense will continue to increase in absolute dollars as we hire additional personnel and incur costs associated with being a public company. We also expect our consulting expenses to increase as a result of post implementation support costs associated with our new enterprise resource planning system which is currently being installed. We expect general and administrative expense to fluctuate as a percentage of revenue due to changes in our sales volume and the fluctuating use of consultants for post implementation support associated with our enterprise resource planning system.

AMORTIZATION OF STOCK COMPENSATION. In connection with the grant of stock options to our employees and directors, we recorded deferred stock compensation of approximately \$14.1 million, which is being amortized under the accelerated method over the option vesting period. Amortization expense was \$42,000, or 0.2% of total revenue for fiscal 1999, and \$2.2 million, or 2.7% of total

revenue for fiscal 2000. The increase in expense was due to deferred stock compensation recorded in fiscal 2000.

INTEREST INCOME. Interest income reflects interest earned on cash and cash equivalents and investment balances. Interest income was \$170,000 in fiscal 1998, \$175,000 in fiscal 1999, and \$486,000 in fiscal 2000. In each year, the increase in interest income was primarily due to interest earned on higher invested cash balances.

INTEREST EXPENSE. Interest expense consists of interest on our notes payable to bank and capital lease obligations. Interest expense was \$164,000 in fiscal 1998, \$101,000 in fiscal 1999, and \$156,000 in fiscal 2000. The changes in interest expense were primarily due to fluctuating average debt balances.

QUARTERLY RESULTS OF OPERATIONS

The following tables present unaudited quarterly results, in dollars and as a percentage of net revenue, for each of the eight quarters in the period ended January 31, 2000. We believe this information reflects all adjustments, consisting only of normal recurring adjustments, that we consider necessary for a fair presentation of such information in accordance with generally accepted accounting principles. The results for any quarter are not necessarily indicative of results for any future period.

	QUARTER ENDED

Our quarterly results of operations have varied from quarter-to-quarter in the past and we expect them to vary from quarter-to-quarter in future periods. These fluctuations may occur due to a number of factors, including:

- the cyclical nature of the integrated circuit industry;
- the timing and volume of orders and order cancellations from our customers;
- the level of acceptance of our products by existing and potential customers;
- the demand for, seasonality of the markets for, and life cycles of, products incorporating our products;
- our ability to fund, develop, introduce, ship and support new products and product enhancements, and the related timing and costs associated with those activities;
- deferrals of customer orders in anticipation of new products or product enhancements from us or our competitors;
- the loss of one or more of our major customers;
- fluctuations in our manufacturing yields;
- the introduction of competing products by us or our competitors;
- changes in our product mix;
- competitive pricing pressures;
- the cost and availability of capacity at our integrated circuit manufacturers and subcontractors;
- the rate at which new markets emerge for products we are currently developing or for which our design expertise can be utilized to develop new products;
- transition of our markets to new technologies or standards; and
- departures of key personnel.

Net revenue increased from the preceding quarter in each of the eight quarters in the period ended January 31, 2000. All of our sales in each of the eight quarters in the period ended January 31, 2000 have been derived from sales of our read channel and preamplifier products. Gross profit increased in each quarter in fiscal 1999, primarily due to substantial increases in product sales. Gross profit decreased slightly in the first quarter of fiscal 2000, to 55.9% of net revenue, primarily due to increased test and rework costs related to a product design issue with a significant customer. The increases in gross profit in the second and third quarter of fiscal 2000 were primarily due to a reduction in product costs. The decrease in gross profit in the fourth quarter of fiscal 2000, to 57.1% of net revenue, was due primarily to a decline in yields of our newest, more complex read channel product. Our gross profit may decline in future periods due to the expected introduction of competitive products and increased demand for wafer capacity within the integrated circuit industry.

LIQUIDITY AND CAPITAL RESOURCES

Since our inception, we have financed operations through a combination of private sales of convertible preferred stock, bank loan and capital lease financing and, in fiscal 2000, net cash flow from operations. At January 31, 2000, we had \$22.6 million in working capital and \$16.6 million in cash and cash equivalents.

We used cash in our operating activities in the amount of \$6.8 million in fiscal 1998 and \$2.9 million in fiscal 1999. In fiscal 1998, cash used for operating activities was attributable primarily to our net loss. In fiscal 1999, cash used for operating activities was attributable to our net loss and a significant increase in accounts receivable and inventory, partially offset by increases in accounts payable and accrued liabilities. Accounts receivable and inventory increased as a result of the significant increase in revenue in fiscal 1999, particularly in the fourth quarter. Accounts payable and accrued liabilities increased as a result of an overall increase in our inventory levels and operating expenses as our business has grown. Our operating activities provided cash in the amount of \$12.6 million in fiscal 2000. The increase in cash was primarily a result of our net income for the period and increases in accounts payable, accrued liabilities and income taxes payable, partially offset by increases in accounts receivable and inventory. Accounts receivable and inventory increased as a result of the significant increase in revenue in fiscal 2000. Accounts payable increased as a result of an overall increase in our inventory levels and operating expenses as our business has grown. The increase in income taxes payable is due to the increasing amount of income earned in Singapore and Bermuda, both of which have tax rates lower than the U.S. federal tax rate. The balance of our accounts receivable at each period-end varies, primarily due to the timing of our shipments within the period. We have not experienced any material collection difficulties.

We used cash in our investing activities in the amount of \$1.0 million in fiscal 1998, \$1.6 million in fiscal 1999 and \$6.8 million in fiscal 2000, in each case attributable to purchases of property and equipment.

Net cash provided by financing activities was \$6.4 million in fiscal 1998, \$6.7 million in fiscal 1999 and \$5.3 million in fiscal 2000. In fiscal 1998, cash provided by financing activities was primarily attributable to proceeds from the issuance of convertible preferred stock. In fiscal 1999, cash provided by financing activities was primarily attributable to proceeds from the issuance of convertible preferred stock, the financing of property and equipment, and the exercise of stock options. In fiscal 2000, cash provided by financing activities was primarily attributable to proceeds from the issuance of convertible preferred stock and the exercise of warrants to purchase convertible preferred stock and the exercise of stock options, partially offset by the repayment of notes payable to our bank.

In May 1998, we entered into a loan agreement, which was amended in July 1999, and provides for borrowings of up to \$8.0 million in the form of line of credit advances based on eligible accounts receivable and inventory, and \$3.1 million available in the form of equipment advances. Borrowings accrue interest at the bank's prime rate plus 0.125%, which equaled 8.625% on January 31, 2000, and are secured by our tangible assets. In fiscal 1999 and 2000 we borrowed \$3.6 million under this

agreement, which we repaid in full in fiscal 2000. On January 31, 2000, we were in compliance with all line of credit covenants, no amounts were outstanding and \$8.0 million was available for borrowing. This loan agreement expired in April 2000.

In March 2000, we invested \$3 million in a certificate of deposit with a U.S. bank as security for a standby letter of credit with a foundry. The standby letter of credit expires on September 1, 2000.

We lease equipment and software under leases with three-year terms. We intend to exercise purchase options at the end of the lease terms for a minimal cost. We also plan to spend up to approximately \$12.0 million during the next 12 months for test and other equipment and software. We lease our facilities under a non-cancelable operating lease, which expires in February 2002. We currently intend to either relocate our headquarters to larger facilities or secure additional leased space within the next 12 months. We will incur additional costs related to any relocation or increase in leased facilities, and may have to pay rent on two leases for a period of time if we relocate.

Our relationships with our foundries allow us to cancel all outstanding purchase orders, but require us to pay the foundries for expenses they have incurred in connection with the purchase orders through the date of cancellation. As of January 31, 2000, our foundries had incurred approximately \$5.6 million of manufacturing expenses on our outstanding purchase orders.

We believe that the net proceeds from this offering, together with existing cash balances, will be sufficient to meet our capital requirements for at least the next 12 months. After this period, capital requirements will depend on many factors, including the rate of sales growth, market acceptance of our products, costs of securing access to adequate manufacturing capacity, the timing and extent of research and development projects and increases in our operating expenses. To the extent that funds generated by this offering, together with existing cash balances and cash from operations, are insufficient to fund our future activities, we may need to raise additional funds through public or private equity or debt financing. Although we are currently not a party to any agreement or letter of intent with respect to a potential acquisition or strategic arrangement, we may enter into acquisitions or strategic arrangements in the future, which also could require us to seek additional equity or debt financing. Additional funds may not be available on terms favorable to us or at all.

QUANTITATIVE AND QUALITATIVE DISCLOSURE OF MARKET RISKS

INTEREST RATE RISK. Our cash equivalents are exposed to financial market risk due to fluctuation in interest rates, which may affect our interest income. As of January 31, 2000, our cash included money market securities. Due to the short term nature of our investment portfolio, we would not expect our operating results or cash flows to be affected to any significant degree by the effect of a sudden change in market interest rates. We do not use our investment portfolio for trading or other speculative purposes.

FOREIGN CURRENCY EXCHANGE RISK. Substantially all of our sales and expenses are denominated in U.S. dollars, and, as a result, we have relatively little exposure to foreign currency exchange risk. We do not currently enter into forward exchange contracts to hedge exposures denominated in foreign currencies or any other derivative financial instruments for trading or speculative purposes. However, in the event our exposure to foreign currency risk increases, we may choose to hedge those exposures.

INFLATION

The impact of inflation on our business has not been material for the fiscal years ended January 31, 1998, 1999 and 2000.

RECENT ACCOUNTING PRONOUNCEMENTS

In June 1998, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended by Statement of Financial Accounting Standards No. 137, "Accounting for

Derivative Instruments and Hedging Activities -- Deferral of the Effective Date of FASB Statement No. 133- an amendment of FASB Statement No. 133". SFAS 133 requires that all derivative instruments be recorded on the balance sheet at their fair market value. Changes in the fair market value of derivatives are recorded each period in current earnings or comprehensive income, depending on whether a derivative is designed as part of a hedge transaction, and if so, the type of hedge transaction. Substantially all of our revenue and the majority of our costs are denominated in U.S. dollars, and to date we have not entered into any derivative contracts. We do not expect that the adoption of SFAS 133 will have a material effect on our financial statements. The effective date of SFAS 133 as amended by SFAS 137 is for fiscal quarters of fiscal years beginning after June 15, 2000.

In December 1999, the Securities and Exchange Commission staff released Staff Accounting Bulletin (SAB) No. 101, "Revenue Recognition in Financial Statements," which provides guidance on the recognition, presentation and disclosure of revenue in financial statements. The application of SAB No. 101 did not have a material impact on our financial statements.

BUSINESS

This prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results may differ significantly from the results discussed in these forward-looking statements. Factors that may cause such a difference include, but are not limited to, those discussed in "Risk Factors".

OUR BUSINESS

We design, develop and market integrated circuits for communications-related markets. Our products provide the critical interface between real world, analog signals and the digital information used in computing and communications systems. We enable our customers to store and transmit digital information reliably and at high speeds. Our products initially focused our core technology on the data storage market, where we believe our products provide industry leading performance for Seagate, Samsung, Hitachi, Fujitsu and Toshiba, who as a group accounted for 99% of our sales in fiscal 1999 and 98% of our sales in fiscal 2000. Recently, we applied our technology to the high speed, or broadband, data communications market by introducing products that are used in network access equipment to provide the interface between communications systems and data transmission media. We believe that our core technology can be used to improve performance across a wide range of data communications applications. For example, we are actively developing products for the Gigabit Ethernet, a networking protocol, or format, for connecting devices at data rates of 1,000 megabits per second. In addition, we are committing resources to the development of products for the wireless communications and cable modem markets. For the fiscal year ended January 31, 2000, we generated \$81.4 million in net revenue and \$13.1 million in net income.

INDUSTRY BACKGROUND

SATISFYING BANDWIDTH DEMAND

Businesses and consumers today are creating a rapidly growing demand for broadband access to large volumes of information in multiple forms, including voice, video and data. Ryan Hankin Kent, a telecommunications industry market research firm, estimates that North American network data traffic grew to approximately 350,000 trillion bytes, or terabytes, per month in 1999. This demand is being driven by the introduction of new data-intensive computing and communications applications, such as web-based commerce, streaming audio and video, enterprise-wide information systems and telecommuting. In addition, information is increasingly available via networks through a variety of access devices, including personal computers, digital cable set-top boxes used in conjunction with television sets, cable modems, small, handheld computing devices known as personal digital assistants and wireless phones. Improving end-user satisfaction with these applications and devices requires increasingly higher data transfer rates within computing systems and data storage devices and across computer networks, the public telephone infrastructure and the Internet.

Communications systems must transfer data reliably at very high speeds using a wide range of physical media, including magnetic and optical storage disks, twisted pair copper wire, coaxial cable, fiber optic cable and open air. A critical element of these systems is a physical layer device, which performs the important interface functions between the communications system and the media. The physical layer device, converts digital computer information into real world analog signals before transmitting them over communications media and also receives analog signals from communications media and converts digital data that computers can understand and manipulate.

Physical layer devices often determine the overall performance of the communications system. Achieving high integrity data recovery and transmission becomes increasingly difficult at higher data transfer rates. Data transfer rates, often referred to as bandwidth, are measured in terms of megabits per second transmitted over given media. In order to achieve high integrity in data transmission and data recovery at high transfer rates, physical layer devices must overcome a number of factors that can impair signal quality and introduce errors, including substandard media, noise, signal level

degradation over distance, interference from adjacent lines and signal echo. In many computing systems and networks, bandwidth bottlenecks arise where the media and physical layer devices are incapable of supporting the required data transfer rates. As transmission speeds approach the fundamental limits of particular transmission media, physical layer devices must increasingly employ sophisticated signal processing algorithms and techniques to accurately recover the transmitted data. A digital signal processing algorithm involves mathematical manipulation of digital data converted from analog form.

High performance communications-related end markets in which bandwidth bottlenecks present critical problems include the data storage and broadband data communications markets.

DATA STORAGE

A substantial portion of all business and personal information is recorded in analog form on magnetic disk drives in data servers, workstations, personal computers and consumer entertainment devices. As end-user data requirements increase, disk drive suppliers must consistently offer drives with faster data transfer rates and higher capacities. Disk capacity is measured by areal density, which is the amount of data stored on one square inch of disk space. Current high performance disk drive systems offer data transfer rates of 400 to 500 million bits per second and capacities of up to 100 gigabytes. In comparison, high performance disk drive systems in 1998 offered data transfer rates of approximately 200 to 250 megabits per second and capacities of up to 50 gigabytes.

A critical component in every disk drive is the read channel. The read channel is a physical layer device that transmits and receives the analog data that is stored on the magnetic disk and converts it to the digital data required for use in computing systems. The read channel plays a critical role in enabling the disk drive to achieve higher data transfer rates and areal densities. Often, the read channel can become the limiting bottleneck for the entire disk drive system because higher data transfer rates complicate recovery of the data stored on the disk. As data tracks are packed more closely together to achieve greater areal density, problems arise from interference between adjacent data tracks. These communication challenges require increasingly sophisticated read channel designs. In addition, as disk drive manufacturers seek to reduce costs, they are increasingly demanding that functions traditionally performed by stand-alone integrated circuits be combined with the read channel into a single integrated circuit.

BROADBAND DATA COMMUNICATIONS

In recent years there has been a rapid increase of data transmitted across and within computer networks, the public telephone infrastructure and the Internet. Communications infrastructures are constantly evolving to support this increase in data transmission demand. In computer networks that span relatively large geographical areas, known as wide area networks, this increase in data transmission demand has driven the deployment of high capacity fiber optic transmission systems and new broadband access technologies, such as cable modems and digital subscriber lines. In computer networks that span relatively small geographical areas, known as local area networks, this increase in data transmission demand has resulted in a transition from the 10 megabit per second Ethernet technology to the 100 megabit per second Fast Ethernet technology. Going forward, we believe that a new standard, Gigabit Ethernet, which provides data transfer rates of 1,000 megabits per second, will be broadly deployed to support the increasing data transmission demand. We believe that to date, businesses have made a significant investment installing copper twisted pair wires to support their local area networks. Based on the estimates of International Data Corporation, or IDC, in 1999 the worldwide installed base of 10 and 100 megabit per second Ethernet network interface cards and switch ports, which are devices used to connect computers to networks, totaled approximately 333 million.

In the broadband data communications market, physical layer devices are critical to the deployment of new, higher data rate transmission technologies. Gigabit data transmission rates

present significant data recovery challenges. A number of problems, such as interference from adjacent lines and signal echo, arise when transmitting data at gigabit rates on the existing copper twisted pair wire. The most common form of copper twisted pair wire installed was originally designed to support 100 megabit per second data rates. As a result, the deployment of Gigabit Ethernet requires either the costly and time-consuming upgrading of this wiring or the deployment of new physical layer devices that enable gigabit transmission rates on the existing infrastructure.

THE OPPORTUNITY FOR NEW INTEGRATED CIRCUIT SOLUTIONS

The rapidly growing demand for high speed broadband data communications products that enable the transmission of large volumes of data is creating the need for a new generation of integrated circuit solutions. Physical layer devices capable of supporting increasingly higher data transmission rates over existing media infrastructures require sophisticated mixed signal and digital signal processing techniques. Mixed signal technologies employ both analog and digital circuitry in a single integrated circuit. To keep the power consumption of these new solutions at acceptable levels, more efficient yet powerful signal processing algorithms, implemented in silicon, are required. These new generation physical layer devices must also satisfy market demands associated with large production volumes, competitive pricing, high reliability and decreasing size.

THE MARVELL SOLUTION

We design, develop and market integrated circuits for the communications-related markets of high speed, high density data storage and broadband data communications. Our integrated circuits combine precise mixed signal technologies with complex signal processing algorithms. Our products are used for transmitting and recovering digitally converted analog signals to and from various types of broadband communications media. Our products allow our customers to store and move digital data reliably at high data transfer rates while utilizing existing media infrastructures.

Our products target high volume markets where some of the most critical success factors are performance, power consumption, quality and cost. We initially applied our mixed signal and digital signal processing technology to the data storage market, where we provide read channel devices and preamplifiers to meet the high data transfer rate, high areal density and data integrity requirements of our customers. A preamplifier amplifies the low level electrical signal transmitted to and from the recording heads in a disk drive device. We believe that we have achieved significant market share in read channel integrated circuits for the high performance and portable computing segments of the data storage market. These segments have the most demanding performance requirements in terms of data transfer rates and areal densities. More recently, we applied our core technology to developing high performance physical layer devices for the broadband data communications market. We introduced the first member of our data communications product family, a physical layer device for 10 and 100 megabit per second Ethernet and Fast Ethernet applications, in the fourth quarter of calendar year 1999. Our fast Ethernet physical layer devices are manufactured in 0.25-micron CMOS manufacturing process and provide long distance signal transmission capability and low power consumption. We are currently developing our first generation of Gigabit Ethernet physical layer devices for use with existing copper twisted pair wiring infrastructures.

Key features of our technology solutions include:

- MIXED SIGNAL BROADBAND ANALOG FRONT-END TECHNOLOGY. One of the most critical components of many communications-related mixed signal integrated circuits is the analog front-end. The analog front-end is the analog-to-digital and digital-to-analog converter that serves as the interface between the digital signal processor and the physical communications media. We have developed high precision analog front-ends that are implemented in CMOS manufacturing processes. We are able to design these broadband analog front-ends due to a number of innovations, including proprietary self calibration techniques that compensate for the inherent variations of these processes. Our analog

circuits are designed to be highly reusable across many of our products and easily scalable to new CMOS processes as they emerge.

- CUSTOM DIGITAL SIGNAL PROCESSORS. We have designed high performance, low power usage digital signal processors for broadband communications applications. These processors are customized to execute our suite of advanced digital signal processing algorithms in real time at high speeds. For example, our latest generation read channel device performs several hundred billion operations per second.
- PROPRIETARY DIGITAL SIGNAL PROCESSING ALGORITHMS. Our advanced digital signal processing algorithms enable data transmission at high speeds across a wide range of physical media with low data error rates. These digital signal processing algorithms improve performance in the presence of media imperfections such as substandard media, noise, signal level degradation over distance, interference from adjacent lines and signal echo. We have developed a broad suite of broadband communications algorithms targeted at both data storage and broadband data communications applications.
- DESIGN FOR ADVANCED CMOS MANUFACTURING PROCESSES. In addition to CMOS, there are several modern processes for manufacturing integrated circuits including Bipolar, BiCMOS, silicon germanium and gallium arsenide. While it is significantly more difficult to design high performance analog integrated circuits in CMOS, CMOS provides multiple benefits compared to other processes, including significantly lower manufacturing cost, more predictable migration to smaller process geometries, more cost effective integration of additional functions in a single integrated circuit and greater worldwide foundry capacity. We have successfully combined advanced analog signal processing blocks with high speed digital signal processors in 0.25- and 0.18-micron CMOS manufacturing processes. We believe we have achieved a level of circuit speed performance in CMOS process technologies that has typically only been achieved with more expensive special fabrication techniques, such as BiCMOS.

We believe these advantages lead to several key benefits for our customers:

- HIGH PERFORMANCE. In the data storage market, we believe our products achieve industry leading data transfer rates and areal densities. In the broadband data communications market, our products achieve the required low error rates when used with lower quality media and attain superior signal transmission distance when used with standard media. We believe that the advantages of our broadband data communications products enable businesses to upgrade their networks without the expense associated with upgrading to new wiring.
- LOW POWER. We believe our custom digital signal processors use fewer transistors to perform data transfer functions than the standard designs used by some of our competitors, thereby reducing overall system power usage. We also implement our designs in advanced CMOS processes, which further reduces power requirements. These designs allow our customers to eliminate costly heat reduction components in their products.
- COST EFFECTIVE SOLUTIONS. We are able to lower our manufacturing costs by using advanced manufacturing processes and our custom digital signal processing technology. These processes and technologies allow us to use a smaller silicon chip size, which we believe results in more integrated circuits per wafer than is standard in our industry. In addition, our products generate less heat, which we believe allows us to use less expensive packaging technologies and achieve lower cost system implementations than our competitors. These manufacturing advantages reduce the cost of next generation communications equipment, enabling our customers to offer their products at competitive prices.
- HIGHER INTEGRATION CAPABILITY. The combination of our use of CMOS manufacturing processes, small silicon chip size and low power requirements allows us to increase the

number of functions in a single integrated circuit. We believe these capabilities position us to integrate elements of our customers' designs, currently implemented in discrete integrated circuits, into our products. Integration reduces the overall number of components, thereby reducing overall system cost.

- ACCELERATED TIME TO MARKET. We help our customers rapidly introduce higher performance, lower cost products. Many features of our integrated circuits are software-configurable, allowing our customers to customize circuit operation for their specific applications. In addition, the scalability of our designs helps us more rapidly adopt future process technologies to deliver new generations of products.

MARVELL STRATEGY

Our objective is to be a leading provider of mixed signal and digital signal processing integrated circuit technologies for broadband communications-related markets. Key elements of this strategy include the following:

EXPAND OUR MARKET POSITION BY DEVELOPING NEW SIGNAL PROCESSING TECHNOLOGIES FOR BROADBAND COMMUNICATIONS-RELATED APPLICATIONS

We believe that we have built significant expertise in the core areas of technology that are relevant for broadband communications, including mixed signal circuit design methodologies, broadband signal processing algorithms, custom digital signal processors and system-level expertise. We intend to continue to invest considerable resources in developing new and enhanced algorithms and improved mixed signal and digital signal processing technologies. We believe that investment will allow us to develop products that can achieve data transmission speeds approaching the fundamental limits of particular transmission media infrastructures. We also believe our core signal processing technologies can be applied to a wide range of broadband communications-related markets, including data storage, data networking, wireless networking and cable modems.

LEVERAGE OUR TECHNOLOGY IN THE BROADBAND DATA COMMUNICATIONS MARKET

We initially applied our mixed signal and digital signal processing technology expertise to the data communications market through the introduction of our physical layer devices using the Fast Ethernet networking protocol. These physical layer devices are manufactured in 0.25-micron CMOS manufacturing processes and provide long distance signal transmission capability and low power consumption. We are currently developing our Gigabit Ethernet physical layer devices. Additionally, we plan to integrate our physical layer devices with functions previously provided by other integrated circuits, such as the media access controller. The media access controller is the component that controls access by different devices to the physical media to ensure that signals sent from different devices over the same channel do not collide.

EXTEND OUR LEADERSHIP POSITION IN THE DATA STORAGE MARKET

The data storage market presents a large volume opportunity for our broadband mixed signal and digital signal processing technologies. We believe our technology effectively addresses the increasing data access rates and higher data integrity and reliability requirements of the data storage markets. We have achieved significant market share in the high performance and portable computing segments of the data storage market. These segments of the data storage market demand the highest performance read channel products. We intend to extend our leadership position in the high performance and portable computing market segments by continuing to develop and introduce products enabling higher data transfer rates and areal densities. In addition, we intend to apply our cost effective design to develop products targeted at the general purpose personal computer segment.

STRENGTHEN AND EXPAND OUR RELATIONSHIPS WITH CURRENT AND POTENTIAL CUSTOMERS

Our goal is to achieve design wins with companies that are among the first to adopt new technologies and technology leaders in the data storage and broadband data communications markets. While we design products that can be used by multiple customers, we often customize our products to incorporate our customers' specific requirements. As the markets we address become increasingly complex and competitive, we anticipate that many of our customers will increasingly wish to combine elements of their designs with our own. We intend to jointly develop highly integrated products with our customers to meet their cost and performance requirements and to strengthen our relationships with them. For example, we are actively working with some of our customers to incorporate specific features developed by them into our read channel products.

CAPITALIZE ON WIDELY AVAILABLE CMOS MANUFACTURING PROCESSES AND FABLESS OPERATING MODEL

We intend to continue to use widely available CMOS processes to manufacture our advanced mixed signal and digital signal processing products. We believe this will better enable us to reliably manufacture our products in volume, thereby decreasing our time-to-market and costs, while also facilitating the development of highly integrated products. We are a fabless integrated circuit manufacturer in the sense that we rely on third parties to manufacture, assemble and test our products for us. Our fabless model allows us to focus our resources on the development of proprietary and innovative mixed signal and digital signal processing designs, while reducing capital and operating infrastructure requirements.

MARKETS

We target communications-related markets and applications that require integrated circuit devices for high speed data transmission. We currently offer solutions for two major markets: data storage and broadband data communications.

DATA STORAGE

Demand for data storage is increasing rapidly due to the introduction of new data-intensive computing and communications applications, such as web-based commerce, streaming audio and video, enterprise wide information systems, and telecommuting. IDC estimates that shipments of hard disk drive units will increase at a compound annual growth rate of 15% from 1998 to 2003, reaching 292 million units in 2003. IDC estimates that the market for combined standalone and integrated read channel devices is expected to grow from \$733 million in 1998 to \$1.8 billion in 2003. We provide solutions tailored to the specific needs of the high performance, portable and general purpose personal computer segments of this market.

HIGH PERFORMANCE. The proliferation of new technologies such as redundant array of independent drives and network-based storage systems is resulting in increased usage of high performance data storage devices. IDC projects a 17% compound annual growth in shipments of high performance hard disk drive units from 15 million in 1998 to 32 million in 2003. High performance computing applications require systems that are capable of storing and retrieving large amounts of data at high rates. As a result, manufacturers of storage devices for the high performance segment place primary importance on disk drive performance, reliability and capacity and are less concerned with the size, power consumption and absolute cost. To accommodate these requirements, we provide integrated circuits that enable reliable data storage devices with high data transfer rates and high capacity that are essential for complex, large-scale processing environments.

PORTABLE. IDC projects a 15% compound annual growth in shipments of portable hard disk drive units from 17.5 million in 1998 to 34 million in 2003. Manufacturers of storage devices for the portable segment are primarily concerned with power consumption, heat dissipation, cost and areal density. Our product family targeted at this market segment incorporates advanced digital

signal processing technologies. These elements allow us to provide very low power consumption integrated circuits that can accommodate high data transfer rates and enable very high areal density disk drives.

GENERAL PURPOSE PERSONAL COMPUTERS. IDC projects a 15% compound annual growth in shipments of general purpose personal computer hard disk drive units from 111 million in 1998 to 222 million in 2003. Personal computer users have become increasingly price sensitive. As a result, disk drive manufacturers focused on this segment require integrated circuit components that facilitate design for high volume, low cost manufacturing. Our CMOS-based design is well suited to high volume, low cost manufacturing, scalable performance and integration. In addition, due to our ability to deliver high performance data transfer rates while meeting the cost requirements of the general purpose personal computer segment, we offer manufacturers of our general purpose personal computer data storage products a migration path for building the higher performance drives of the future. In addition, we expect that emerging consumer entertainment devices, such as digital camera devices, digital video recorders and digital audio entertainment centers, will increasingly use data storage systems.

BROADBAND DATA COMMUNICATIONS

As businesses and consumers seek faster access to increasing amounts of information through local area networks and wide area networks, such as the Internet, networks are constrained in their ability to process and transmit information quickly. As a result, the high speed networking equipment market is undergoing a rapid transition from first generation Ethernet technologies operating at 10 megabits per second to newer technologies, including Fast Ethernet and Gigabit Ethernet. A majority of the local area network equipment sold today is based on the Fast Ethernet standard. Based on IDC estimates, shipments of 10 and 100 megabits per second Fast Ethernet network interface cards and switch ports will grow from 136 million in 1999 to 316 million in 2003. As lower cost, lower power consumption Gigabit Ethernet physical layer devices become available, we believe that Gigabit Ethernet will emerge as an important local and wide area network communications technology.

PRODUCTS

We design, develop and market integrated circuits for the communications-related markets of high speed, high density data storage and broadband data communications. Our integrated circuits utilize proprietary mixed signal and digital signal processing technologies.

DATA STORAGE PRODUCTS

READ CHANNEL. The read channel is an integrated circuit providing the interface between the analog signals from magnetic storage media and the digital signals that computers can understand and manipulate. Our read channel products allow our customers to achieve fast data transfer rates, high areal densities and low power dissipation. Our read channels are designed in CMOS manufacturing processes and use customized digital signal processors and broadband analog front-ends. We introduced our first generation of read channels in 1997 and have introduced two subsequent generations of signal processing technology enhancements since then. We have migrated our manufacturing process technology from 0.5- to 0.18-micron and our product speed from 240 to 750 megabits per second. Our read channel integrated circuits target specific feature and performance requirements of high performance, portable and general purpose personal computer customers. Beginning with the 88C4000 product family, we implemented a strategy to consolidate the signal processing algorithms required by each of our different market segments into a single integrated circuit design. This strategy provides cost savings and reduced product line complexity.

We are actively working with our customers to incorporate specific features requested by them in our read channel products. In an effort to enhance performance and lower cost, we are developing

integrated products that incorporate the read channel, the disk drive controller and embedded memory functions in one integrated circuit.

Our current read channel products are shown in the table below.

READ CHANNEL	DESCRIPTION	PERFORMANCE	CMOS PROCESS	INTRODUCTION DATE*
88P2010	First generation read channel for use in high performance storage systems such as high end workstations.	240Mbits/s	0.5mm	1st Qtr 1997
88C3000	Second generation read channel for use in higher density high performance storage systems.	360Mbits/s	0.35mm	1st Qtr 1998
88C3100	Second generation read channel for extremely high user bit densities in portable storage applications.	300Mbits/s	0.35mm	2nd Qtr 1998
88C3020	Lower speed derivative of the 88C3000 for use in general purpose personal computer storage products.	280Mbits/s	0.35mm	3rd Qtr 1998
88C4200	Third generation read channel for high performance and general purpose personal computer storage systems.	550Mbits/s	0.25mm	1st Qtr 1999
88C4220	Derivative of the 88C4200 for lower speed but higher user bit density portable storage systems.	380Mbits/s	0.25mm	1st Qtr 1999
88C4300	Third generation read channel for future portable and high-end general purpose personal computer applications.	550Mbits/s	0.25mm	1st Qtr 2000
88C5200	Fourth generation read channel for use in future high performance storage systems.	750Mbits/s	0.18mm	1st Qtr 2000

* Introduction date refers to the calendar quarter in which product samples were initially made available to a customer for evaluation purposes. These products may not be available in commercial volumes for one or more quarters following sample introduction.

PREAMPLIFIER. A preamplifier amplifies the low level electrical signal transmitted to and from the recording heads in a disk drive device. Preamplifiers operate in two basic modes: read and write. In read mode, preamplifiers provide initial amplification of the high bandwidth signal from the read head. In write mode, the preamplifier provides the write head with the high frequency switched current required for writing on the magnetic media. We provide the only commercially available preamplifiers manufactured in 0.5-micron CMOS processes. We believe our CMOS-based preamplifier products provide high performance at a lower cost than standard BiCMOS-based products. We introduced our first preamplifier product in the third quarter of 1998 and our second-generation product in the second quarter of 1999. We have also introduced derivative products targeted at a range of applications for each of these product families.

Our current preamplifier products are shown in the table below.

PREAMPLIFIERS	DESCRIPTION	PERFORMANCE	CMOS PROCESS	INTRODUCTION DATE*
81G3004	4-channel derivative of the 81G3018 design for two-disk storage platforms.	300Mbits/s	0.5mm	3rd Qtr 1998
81G3018	8-channel high gain-bandwidth preamplifier.	300Mbits/s	0.5mm	4th Qtr 1998
81G3002	2-channel derivative of the 81G3018.	300Mbits/s	0.5mm	2nd Qtr 1999
81G4008	8-channel second generation high gain-bandwidth preamplifier.	500Mbits/s	0.5mm	2nd Qtr 1999
81G4014	4-channel derivative of the 81G4008 for two-disk storage platforms.	500Mbits/s	0.5mm	4th Qtr 1999
81G4002	2-channel derivative of the 81G4008.	500Mbits/s	0.5mm	1st Qtr 2000

* Introduction date refers to the calendar quarter in which product samples were initially made available to a customer for evaluation purposes. These products may not be available in commercial volumes for one or more quarters following sample introduction.

BROADBAND DATA COMMUNICATIONS PRODUCTS

We are applying our mixed signal and digital signal processing technology to a variety of broadband data communications markets, including Fast and Gigabit Ethernet. Our integrated circuits provide the core functionality required for building Ethernet network interface cards, routers, repeaters, hubs and switches.

FAST ETHERNET PRODUCTS. Our first products for the Fast Ethernet data communications market are highly integrated, physical layer devices. These devices contain the active circuitry, or ports, needed for interfacing with up to six or eight independent network connections and are typically used by our customers in Fast Ethernet repeaters, hubs, switches and routers. We believe these products enable reliable communication over long cable distances and lower quality cable installations. We believe we were the first to introduce an eight-port Fast Ethernet physical layer device in a 0.25-micron CMOS manufacturing process.

Our current Fast Ethernet products are listed in the table below.

DATA COMMUNICATIONS PRODUCTS	DESCRIPTION	PERFORMANCE	CMOS PROCESS	INTRODUCTION DATE*
88E3080	8-port digital signal processing based Fast Ethernet physical layer device for use in workgroup and enterprise repeaters, hubs, switches and routers.	10/100Mbps/s	0.25mm	4th Qtr 1999
88E3060	6-port digital signal processing based Fast Ethernet physical layer device for use in general purpose personal computer hubs and switches.	10/100Mbps/s	0.25mm	1st Qtr 2000

* Introduction date refers to the calendar quarter in which product samples were initially made available to a customer for evaluation purposes. These products may not be available in commercial volumes for one or more quarters following sample introduction.

GIGABIT ETHERNET PRODUCTS. We are currently developing a Gigabit Ethernet physical layer device for copper twisted pair wire infrastructures. We are designing this product for a 0.18-micron CMOS manufacturing process. The design for this product incorporates sophisticated digital signal processing algorithms, as well as higher resolution analog-front-ends, to overcome the reduced signal quality of gigabit data rate signals on standard copper twisted pair wire. Target applications for this product include network interface cards, routers, repeaters, hubs and next-generation switches.

CUSTOMERS, SALES AND MARKETING

Our sales and marketing strategy is to achieve design wins with companies that are among the first to adopt new technologies and technology leaders in each of our selected markets. Our direct sales force targets emerging high growth markets that have high intensity communications processing requirements. Our customers for read channel and preamplifier products are manufacturers of hard disk drives for the enterprise, mobile and desktop markets. As of January 31, 2000, we have shipped over 30 million read channels and preamplifiers to our customers in the data storage industry. A small number of our customers have historically accounted for a substantial portion of our revenue. The percentage of our revenue accounted for by our five major customers in fiscal 1999 and 2000 are set forth below.

CUSTOMER	PERCENTAGE OF REVENUE	
	1999	2000
Samsung.....	46%	36%
Seagate.....	43	24
Hitachi.....	7	14
Fujitsu.....	2	14
Toshiba.....	1	10
	--	--
Total.....	99%	98%

We recently introduced two data communications products, our eight-port and six-port Fast Ethernet physical layer devices. We first began shipping for evaluation our eight-port physical layer device in December 1999 and our six-port physical layer device in March 2000. In March 2000, our eight-port Fast Ethernet physical layer device began shipping for revenue. Other potential customers are currently designing the eight-port physical layer device into their products. Our target customers for this product are leading manufacturers of high speed networking equipment.

To date, substantially all of our data storage product sales have been made through our direct sales force of nine people. We also complement and support our direct sales force with manufacturer's representatives in North America and Asia. In the first calendar quarter 2000, we entered into our first distribution agreement to support our sales and marketing activities in the data communications market, and we plan to enter into other distribution agreements in the near term. We anticipate that sales through distributors will increase as a percentage of our revenues in future periods. However, we expect a significant percentage of our sales will continue to come from direct sales to key customers. As of April 30, 2000, our sales and marketing organization consisted of 61 employees and 11 manufacturers' representatives. In November 1999, our Japanese subsidiary, Marvell Japan, opened a new technical and sales support facility in Japan to provide greater support for our international customers.

Our sales are made under purchase orders received between one and four months prior to the scheduled delivery date. These purchase orders can be cancelled without charge if notice is given within an agreed upon period. Because of the scheduling requirements of our foundries, we generally place firm orders for products with our suppliers up to sixteen weeks prior to the anticipated delivery date and prior to an order for the product. We typically warrant our products for a 90-day period. To date, we have not experienced material product returns or warranty expense.

Our marketing team works in conjunction with our sales force and is organized around our product applications. Due to the complexity of our products, we introduce our new products to major customers with a global tour by a marketing, sales and engineering team. We believe that individual meetings are the most effective and rapid means of communicating the capabilities, benefits and extremely technical specifications of each new product.

We use field application engineers to provide intensive technical support and assistance to existing and potential customers in designing, testing and qualifying systems designs that incorporate our products. We believe that superior field applications engineering support plays a pivotal role in building long-term relationships with our customers by improving our customers' time-to-market, maintaining a high level of customer satisfaction and encouraging customers to use our next generation of products. As of April 30, 2000, we had nine field application engineers.

MARVELL TECHNOLOGY

We believe our key technical competitive advantages result from the collection of proprietary technologies that we have developed since our inception. Our products are based on the following technologies:

- high bandwidth analog front-end technology;
- advanced communications algorithms;
- custom digital signal processors; and
- reusable building blocks for integrated system-on-a-chip design.

HIGH BANDWIDTH ANALOG FRONT-END TECHNOLOGY

We have developed significant expertise in mixed signal circuit design architectures and techniques required to design high performance analog front-ends, which provide the interface between the digital signal processor and the physical communications media. We have developed this technology for use with advanced CMOS manufacturing processes, which allows us to cost effectively integrate complex digital signal processing functions with other high level system functions on a small silicon chip. Our mixed signal circuits achieve performance levels that are associated with more expensive, special purpose integrated circuit manufacturing process technologies, such as BiCMOS. For example, our analog front-ends for use in read channel applications achieve conversion rates of up to 900MHz using a 0.18-micron CMOS process. A conversion rate of 900 MHz means that the analog

to digital converter completes 900 million analog to digital conversion cycles per second. In addition to achieving high performance, our mixed signal circuits are designed to compensate for variations inherent in current 0.25- and 0.18-micron CMOS manufacturing processes.

Our high bandwidth analog front-end technology can be used in various communications-related applications. We are currently developing experimental mixed signal technologies for extreme high bandwidth applications, such as physical layer devices for fibre optic media operating at data rates of up to 2.5 gigabits per second for use in a high-speed shared storage devices, known as storage area networks.

ADVANCED COMMUNICATIONS ALGORITHMS

We have also developed complex communications algorithms that are required for broadband data communications-related applications. Our communications algorithms perform the signal equalization, data detection and error corrections required to overcome media imperfections such as substandard media, noise, signal level degradation over distance, interference from adjacent lines and signal echo. These communications algorithms enable us to design digital signal processors for use in data storage, Fast Ethernet and Gigabit Ethernet applications as well as other possible future applications, such as cable modem and broadband wireless products.

CUSTOM DIGITAL SIGNAL PROCESSORS

We target communications-related markets, which require very fast data transfer rates and low power dissipation. To achieve the required performance levels, we implement our signal processing algorithms in custom-designed digital signal processors. Our Fast Ethernet digital signal processors performs several billion operations per second while dissipating less than 100 milliwatts of power. Our fastest read channel digital signal processors performs over 50 billion operations per second while dissipating less than 750 milliwatts of power. Such performance is not readily available using standard programmable digital signal processing solutions. We believe our custom digital signal processors, when combined with our library of digital signal processing circuit building blocks, will enable us to implement application specific digital signal processors that can perform at computational rates of up to one trillion operations per second in very small silicon chips. Small silicon chips result in low power dissipation, small packaging and low overall system cooling requirements.

REUSABLE BUILDING BLOCKS FOR INTEGRATED SYSTEM-ON-A-CHIP DESIGN

We have developed a proprietary set of manufacturing process design rules that we believe are scalable over several generations of manufacturing process geometries. We have also collected a significant library of circuit building blocks that can be reused with minimum modification in successive generations of products. These design methodologies allow us to shorten time-to-market for new products and take advantage of the latest CMOS manufacturing processes. We believe that as manufacturing process geometries continue shrinking, our customers will pursue silicon integration strategies. To address this market development, we have recently developed our own embedded memory technology for complex system-on-a-chip designs that require large amounts of repairable on-chip memory. We are also in the process of developing products that integrate our core mixed signal and digital signal processors with our customers' silicon components and on-chip memory.

RESEARCH AND DEVELOPMENT

We believe that our future success depends on our ability to introduce improvements to our existing products and to develop new products that deliver cost effective solutions for both existing and new markets. Our research and development efforts are directed largely to the development of proprietary circuit designs for high bandwidth communications-related applications. We devote a significant portion of our resources to expanding our core technology library with designs that enable high performance, reliable communications over a variety of physical media. We are also focused on

incorporating functions currently provided by stand-alone integrated circuits into our products to reduce our customers' overall system costs.

We have assembled a core team of engineers who have extensive experience in the areas of mixed signal circuit design, digital signal processing, and CMOS technology. As of April 30, 2000, we had 108 employees in engineering and process development, including 69 with advanced degrees. We have invested, and expect that we will continue to invest, significant funds for research and development. Our research and development expense was approximately \$5.8 million in fiscal 1999 and \$14.5 million in fiscal 2000.

MANUFACTURING

We believe our fabless manufacturing approach provides us with the benefits of superior manufacturing capability as well as flexibility to move the manufacture, assembly and test of our products to those vendors that offer the best capability at an attractive price. Our engineers work closely with our foundries and other subcontractors to increase yields, lower manufacturing costs and improve quality.

INTEGRATED CIRCUIT FABRICATION

Our integrated circuits are fabricated using widely available CMOS processes, which provide us greater flexibility to engage independent foundries to manufacture integrated circuits. By outsourcing our manufacturing, we are able to avoid the cost associated with owning and operating our own manufacturing facility. This allows us to focus our efforts on the design and marketing of our products. We currently outsource substantially all of our integrated circuit manufacturing to Taiwan Semiconductor Manufacturing Company. We work closely with Taiwan Semiconductor to forecast on a monthly basis our manufacturing capacity requirements. Our integrated circuits are currently fabricated in 0.50-, 0.35- and 0.25-micron manufacturing processes. We are also currently sampling 0.18-micron products with customers. Because finer manufacturing processes lead to enhanced performance, smaller silicon chip size and lower power requirements, we continually evaluate the benefits and feasibility of migrating to smaller geometry process technology in order to reduce cost and improve performance.

ASSEMBLY AND TEST

Our silicon chips are shipped from our third-party foundries to our third-party assembly and test facilities where they are assembled into finished integrated circuit packages and tested. Our products are designed to use low cost, standard packages and to be tested with widely available test equipment. In addition, we specifically design our integrated circuits for ease of testability, further reducing manufacturing costs. We outsource all of our product packaging and testing requirements to several third-party assembly and test subcontractors, including ST Assembly Test Services in Singapore, Siliconware Precision Industries in Taiwan and Amkor Technology in the Philippines.

QUALITY ASSURANCE

We build quality into our products starting with the design and development process. Our designs are subjected to extensive circuit simulation under extreme conditions of temperature, voltage and processing before being committed to manufacture. We pre-qualify each of our subcontractors and conduct regular in-depth quality audits. We closely monitor foundry production to ensure consistent overall quality, reliability and yield levels. All of our independent foundries and assembly and test subcontractors have been awarded ISO 9000 certification.

INTELLECTUAL PROPERTY

Our future revenue growth and overall success depend in large part on our ability to protect our intellectual property. We rely on a combination of patents, copyrights, trademarks, trade secret laws,

contractual provisions and licenses to protect our intellectual property. We also enter into confidentiality agreements with our employees, consultants, suppliers and customers and seek to control access to, and distribution of, our documentation and other proprietary information. Despite these precautions, it may be possible for a third party to copy or otherwise obtain and use our products and technology without authorization, develop similar technology independently or design around our patents.

As of April 30, 2000, we had been granted nine United States patents on various aspects of our technology, with expiration dates ranging from 2015 to 2018, and we had filed fifteen additional United States patent applications. However, there can be no assurance that patents will ever be issued for these applications. Furthermore, it is possible that our patents may be invalidated, circumvented, challenged or licensed to others.

In addition, the laws of some foreign countries in which our products are or may be developed, manufactured or sold, including various countries in Asia, may not protect our products or proprietary information to the same extent as do the laws of the United States and thus make the possibility of piracy of our technology and products more likely in these countries.

We have expended and will continue to expend considerable resources in establishing a patent position designed to protect our intellectual property. While our ability to compete is enhanced by our ability to protect our intellectual property, we believe that, in view of the rapid pace of technological change, the combination of the technical experience and innovative skills of our employees may be as important to our business as the legal protection of our patents and other proprietary information.

From time to time, we may desire or be required to renew or to obtain licenses from third parties in order to further develop and market commercially viable products effectively. We cannot be sure that any necessary licenses will be available or will be available on commercially reasonable terms.

The integrated circuit industry is characterized by vigorous protection and pursuit of intellectual property rights, which have resulted in significant and often time consuming and expensive litigation. Although there is currently no pending or threatened intellectual property litigation filed against us, there can be no assurance that third parties will not assert claims of infringement against us. Such claims, even those without merit, could be time consuming and result in costly litigation. We may not prevail in any such litigation or may not be able to license any valid and infringed patents from third parties on commercially reasonable terms. Litigation, regardless of the outcome, is likely to result in substantial cost and diversion of our resources, including our management's time. Any such litigation could harm our business and financial results.

COMPETITION

The markets for data storage and broadband data communications devices are intensely competitive and characterized by rapid technological change, evolving standards, short product life cycles and pricing pressures imposed by high volume customers. We expect competition to intensify as current competitors expand their product offerings and new competitors enter the market.

We believe that our ability to compete successfully in the rapidly evolving markets for our products depends on a number of factors, including:

- performance, features, quality and price of our products;
- the timing and success of new product introductions by us, our customers and our competitors;
- the emergence of new industry standards;
- our ability to obtain adequate foundry capacity;
- the number and nature of our competitors in a given market; and
- general market and economic conditions.

Our current products face competition from a number of sources. We believe our principal competitors in the read channel market are Cirrus Logic, Lucent Technologies, NEC, STMicroelectronics and Texas Instruments. Our primary competitors in the preamplifier market are Texas Instruments and Lucent Technologies. In expanding our presence in the broadband data communications market, we expect to compete with Broadcom, Intel and National Semiconductor.

Many of our current competitors and potential competitors have longer operating histories, greater name recognition, access to larger customer bases and significantly greater financial, sales and marketing, manufacturing, distribution, technical and other resources than us. As a result, they may be able to respond more quickly to changing customer demands or to devote greater resources to the development, promotion and sale of their products than we can. Our current or future competitors may develop and introduce new products that will be priced lower, provide superior performance or achieve greater market acceptance than our products. In addition, in the event of a manufacturing capacity shortage, these competitors may be able to manufacture products when we are unable to do so.

Furthermore, current or potential competitors have established or may establish, financial and strategic relationships among themselves or with existing or potential customers or other third parties to increase the ability of their products to address the needs of our prospective customers. Accordingly, it is possible that new competitors or alliances among competitors could emerge and rapidly acquire significant market share, which would harm our business.

In addition, many of our customers and potential customers have substantial technological capabilities and financial resources. Some customers have already developed, or in the future may develop, technologies that will compete directly with our products. We also may face competition from suppliers of products based on new or emerging technologies.

Historically, average unit selling prices in the integrated circuit industry in general, and for our products in particular, have decreased over the life of a particular product. We expect that the average unit selling prices of our products will continue to be subject to significant pricing pressures. In order to offset expected declines in the average unit selling prices of our products, we will likely need to reduce the cost of our products. We intend to accomplish this by implementing design changes that lower the cost of manufacturing, assembly and testing, by negotiating reduced charges by our foundries as and if volumes increase, and by successfully managing our manufacturing and subcontracting relationships. Because we do not operate our own manufacturing, assembly or testing facilities, we may not be able to reduce our costs as rapidly as companies that operate their own facilities. If we fail to introduce lower cost versions of our products in a timely manner or to successfully manage our manufacturing, assembly and testing relationships, our business would be harmed.

EMPLOYEES

As of April 30, 2000, we had a total of 256 employees, of which 108 were in research and development, 61 in sales and marketing, 39 in operations and 48 in general and administration. Our employees are not represented by any collective bargaining agreements, and we have not experienced any work stoppage. We consider our relations with our employees to be good.

FACILITIES

Our primary facility, housing our research and design function as well as elements of marketing and administration, is in Sunnyvale, California. This facility consists of approximately 66,000 square feet and is leased until February 15, 2002. In addition, our other subsidiaries in Singapore and Japan have leased space for their operations. Based upon our estimates of future hiring, we believe that these facilities will be inadequate to meet our requirements past 2000. Accordingly, we will need to locate additional space in California and may find it necessary to vacate our current locations. The additional space we anticipate requiring may cost substantially more than our existing space, and we may incur significant additional capital expenditures for construction of tenant improvements.

MANAGEMENT

We are the parent of Marvell Semiconductor, Inc., a California corporation we founded to develop proprietary technology and to provide selected support services to us. Set forth below is certain information regarding the executive officers, directors and some of the other officers of both Marvell Technology Group Ltd. and Marvell Semiconductor, Inc. as of April 30, 2000.

NAME ----	AGE ---	POSITION -----
Diosdado P. Banatao(1)(2).....	53	Co-Chairman of the Board, Marvell Technology Group Ltd.
Sehat Sutardja.....	38	Co-Chairman of the Board, President and Chief Executive Officer, Marvell Technology Group Ltd.; President and Chief Executive Officer and Director of Marvell Semiconductor, Inc.
Weili Dai.....	38	Executive Vice President, Corporate Assistant Secretary and Director of Marvell Technology Group Ltd.; Executive Vice President, General Manager of Data Communications Group and Director of Marvell Semiconductor, Inc.
Pantas Sutardja.....	37	Vice President and Director of Marvell Technology Group Ltd.; Chief Technology Officer and Director of Marvell Semiconductor, Inc.
George Hervey.....	53	Vice President of Finance, Chief Financial Officer and Secretary, Marvell Technology Group Ltd.; Vice President of Finance and Chief Financial Officer of Marvell Semiconductor, Inc.
Alan J. Armstrong.....	36	Vice President of Marketing, Data Storage, Marvell Semiconductor, Inc.
Gani Jusuf.....	37	Vice President of Product Development, Data Communications, Marvell Semiconductor, Inc.
Nersi Nazari.....	41	Vice President of Signal Processing Technology, Marvell Semiconductor, Inc.
George Papa.....	51	Vice President of Sales, Data Communications, Marvell Semiconductor, Inc.
Larry L. Smith.....	59	Vice President of Sales, Data Storage, Marvell Semiconductor, Inc.
LeeChung Yiu.....	44	Vice President of Engineering, Marvell Semiconductor, Inc.
Stephen Zadig.....	49	Vice President of Operations, Marvell Semiconductor, Inc.
Herbert Chang(1)(2).....	37	Director, Marvell Technology Group Ltd.
John M. Cioffi(2).....	43	Director, Marvell Technology Group Ltd.
Paul R. Gray(2).....	57	Director, Marvell Technology Group Ltd.
Ron Verdoorn(1).....	49	Director, Marvell Technology Group Ltd.

- -----
(1) Member of the Audit Committee.

(2) Member of the Compensation Committee.

DIOSDADO P. BANATAO has served as our Co-Chairman of the Board since October 1995. Mr. Banatao has been a partner in Mayfield Fund, a venture capital fund, since 1998. Prior to joining Mayfield Fund, Mr. Banatao founded S3, Incorporated, a designer and manufacturer of graphics and video accelerators for personal computers and related peripheral products, where he served as President and Chief Executive Officer from 1989 until 1992 and Chairman from 1992 to 1998. Mr. Banatao holds a Bachelor of Science degree in Electrical Engineering from the Mapua Institute of Technology and a Master of Science degree in Electrical Engineering and Computer Science from Stanford University.

SEHAT SUTARDJA, one of our co-founders, has served as our President since inception and as our Co-Chairman of the Board and Chief Executive Officer since August 1995. In addition, he has served

as President, Chief Executive Officer and a Director of Marvell Semiconductor, Inc. since its founding. From 1989 until 1995, Dr. Sutardja served as a manager and principal project engineer at 8X8 Inc., a designer and manufacturer of digital communications products. Dr. Sutardja received his Master of Science and Ph.D. degrees in Electrical Engineering and Computer Science from the University of California at Berkeley. Dr. Sutardja is the husband of Weili Dai and the brother of Dr. Pantas Sutardja.

WEILI DAI, one of our co-founders, has served as our Vice President, Corporate Assistant Secretary and one of our Directors since inception. Ms. Dai was promoted from Vice President to Executive Vice President in 1996, which position she currently holds. Ms. Dai has also served as Executive Vice President and Director for Marvell Semiconductor, Inc. since its founding. As Executive Vice President for Marvell Semiconductor, Inc., Ms. Dai is the General Manager of the Data Communications Group and is also responsible for the corporate business development and human resources functions. From 1992 until 1995, Ms. Dai was involved in software development and project management at Canon Research Center America, Inc. Ms. Dai holds a Bachelor of Science degree in Computer Science from the University of California at Berkeley. Ms. Dai is the wife of Dr. Sehat Sutardja.

PANTAS SUTARDJA, one of our co-founders, has served as our Vice President and one of our Directors since inception, and as Vice President of Engineering for Marvell Semiconductor, Inc. from its founding until 1999, when he was appointed Chief Technology Officer. Dr. Sutardja has also been a Director of Marvell Semiconductor, Inc. from inception. Previously, Dr. Sutardja served as Research Staff Member at IBM Almaden Research Center from 1988 to 1994. Dr. Sutardja holds Bachelor of Science, Master of Science and Ph.D. degrees in Electrical Engineering and Computer Science from the University of California at Berkeley. Dr. Sutardja is the brother of Dr. Sehat Sutardja.

GEORGE HERVEY joined us in April 2000 as our Vice President of Finance and Chief Financial Officer and in a similar capacity for Marvell Semiconductor, Inc. From March 1997 to April 2000, Mr. Hervey served as Senior Vice President, Chief Financial Officer and Secretary for Galileo Technology Ltd., which manufactures chips which provide Ethernet switching capabilities for high performance local area networks. From June 1992 to February 1997, Mr. Hervey was Senior Vice President of Finance and Chief Financial Officer of S3 Incorporated, a designer and manufacturer of graphics and video accelerators for personal computers and related peripheral products. Mr. Hervey holds a Bachelor of Science degree in Business Administration from the University of Rhode Island.

ALAN ARMSTRONG has served as Vice President of Marketing, Data Storage for Marvell Semiconductor since July 1999. From 1992 until 1999, Dr. Armstrong held various positions at Cirrus Logic Inc., a designer and manufacturer of analog and mixed signal circuits, most recently as Director of Product Planning and Applications for Data Storage Products. Dr. Armstrong holds a Bachelor of Science degree in Electrical Engineering from San Diego State University and Master of Science and Ph.D. degrees in Electrical Engineering from the University of California, San Diego.

GANI JUSUF has served as Vice President of Product Development, Data Communications, since February 2000. From 1998 to February 2000, Dr. Jusuf was a Research and Development Manager for Agilent Technologies, Inc., a subsidiary of Hewlett-Packard, which develops test, measurement and monitoring products and devices. From 1995 to 1998, Dr. Jusuf served as Director of Engineering responsible for product definition and development for Marvell Semiconductor, Inc. Dr. Jusuf holds Bachelor of Science, Master of Science and Ph.D. degrees in Electrical Engineering and Computer Science from the University of California at Berkeley.

NERSI NAZARI has served as Vice President of Signal Processing Technology for Marvell Semiconductor, Inc. since October 1997. From 1994 until 1997, Dr. Nazari served as Chief Technologist at GEC Plessey Semiconductors, a designer and manufacturer of integrated circuits, including data storage and data communications products. Dr. Nazari holds Bachelor of Science degrees in Electrical Engineering and Mathematics from Southern Illinois University, a Master of Science degree in Electrical Engineering from the University of Missouri, and a Ph.D. in Electrical Engineering from the University of Colorado.

GEORGE PAPA joined Marvell Semiconductor, Inc. in February 2000 as Vice President of Sales, Data Communications. From 1997 until 2000, Mr. Papa served as Vice President of Worldwide Sales for Level One Communications, Inc., a subsidiary of Intel Corporation. From 1991 to 1997, Mr. Papa served as Vice President of North American Sales for Siemens Corporation. Mr. Papa holds a Bachelor of Science degree in Electrical Engineering from Northeastern University.

LARRY SMITH has served as Vice President of Sales, Data Storage, for Marvell Semiconductor, Inc. since September 1996. From 1981 until 1996, Mr. Smith served as a manufacturing sales representative for a number of companies, including Silicon Systems Inc., a company specializing in the development and production of both analog and digital integrated circuits for data storage applications.

LEECHUNG YIU has served as Vice President of Engineering for Marvell Semiconductor, Inc. since May 1999. From 1994 until 1997, Dr. Yiu served as the Director of Engineering for SEEQ Technology Inc., a supplier of Ethernet data communications products for networking applications. From 1997 until 1999, Dr. Yiu was the Vice President of Engineering for Newave Semiconductor Corporation, a privately held company developing integrated circuits for the telecommunications market. Dr. Yiu holds a Bachelor of Science degree in Electrical Engineering from National Taiwan University and Master of Science and Ph.D. degrees in Electrical Engineering from the University of California at Berkeley.

STEPHEN ZADIG has served as the Vice President of Operations for Marvell Semiconductor, Inc. since 1996. From 1995 to 1996, Mr. Zadig served as Vice President of Operations for Paradigm Technology Inc., a designer and supplier of high performance SRAM products. From 1990 until 1995, Mr. Zadig served as Vice President of Operations for C-Cube Microsystems Inc., a company that designs and markets integrated circuits that implement digital video encoding and decoding.

HERBERT CHANG has served as one of our Directors since November 1996. Since April 1996, Mr. Chang has been President of InveStar Capital, Inc., a technology venture capital management firm based in Taiwan. From 1994 to 1996, Mr. Chang was Senior Vice President of WK Technology Fund, a venture capital fund. Mr. Chang serves as a director for NetIQ Corporation and Silicon Image, Inc. Mr. Chang holds a Bachelor of Science degree from National Taiwan University and a Master of Business Administration degree from National Chiao-Tung University in Taiwan.

JOHN M. CIOFFI has served as one of our Directors since March 2000. Dr. Cioffi has been a professor of Electrical Engineering at Stanford University since 1986. In 1991, he founded Amati Communications Corporation, which designs and manufactures modems for Asymmetric Digital Subscriber Lines, and served as the Chief Technology Officer until the company's acquisition by Texas Instruments, Inc. in 1998. Dr. Cioffi is an IEEE fellow and serves as a director for ITEX, and on the advisory boards of Coppercom, Gigabit Wireless, Kestrel Solutions, Inc., Charter Ventures, Portview Communications Partners and Accel Partners.

PAUL R. GRAY has served as one of our Directors since March 2000. Dr. Gray currently serves as the Dean of the College of Engineering at the University of California at Berkeley and has been appointed as Executive Vice Chancellor and Provost, effective July 2000. During his 28 year tenure with the University, Dr. Gray has held numerous administrative posts, including Director of the Electronics Research Laboratory, Vice Chairman of the EECS Department for Computer Resources, and Chairman of the Department of Electrical Engineering and Computer Sciences.

RON VERDOORN has served as one of our Directors since January 1998. From January 1999 to the present, Mr. Verdoorn has served as Executive Vice President of Manufacturing for Affymetrix, Inc., a company specializing in the development of technology for acquiring and managing complex genetic information for use in biomedical research, genomics and clinical diagnostics. From 1997 to 1999, Mr. Verdoorn served as an independent consultant to the hard disk drive industry. From 1983 to 1997, Mr. Verdoorn held a number of positions with Seagate Technology, Inc., most recently as Executive Vice President and Chief Operating Officer of Storage Products. Mr. Verdoorn holds a Bachelor of Arts degree in Sociology from Linfield College.

COMPOSITION OF THE BOARD OF DIRECTORS

Our Bye-laws provide for two or more directors and the number of directors is currently fixed at eight. Following the completion of this offering, our Board of Directors will be divided into three classes, each serving staggered three-year terms, which means that only one class of directors will be elected at each annual meeting of shareholders, with the other classes continuing for the remainder of their respective terms, and directors may only be removed for cause by the holders of two-thirds of the shares entitled to vote at an election of directors. Our executive officers are elected by the Board of Directors and serve at the discretion of the Board of Directors.

COMMITTEES OF THE BOARD OF DIRECTORS

We have a Compensation Committee comprised of Messrs. Banatao, Chang, Cioffi and Gray and an Audit Committee comprised of Messrs. Banatao, Chang and Verdoorn. The Compensation Committee has the authority to approve salaries and bonuses and other compensation matters for our officers and consultants, to approve employee health and benefit plans and to administer our stock option plans. The Audit Committee, which is comprised of independent directors, has the authority to recommend the appointment of our independent auditors and to review the results and scope of audits, internal accounting controls and other accounting related matters.

COMPENSATION COMMITTEE INTERLOCKS AND INSIDER PARTICIPATION

None of our executive officers serves as a member of the Board of Directors or Compensation Committee of any entity that has one or more executive officers serving as a member of our Board of Directors or Compensation Committee.

DIRECTOR COMPENSATION

Our directors do not receive cash compensation for their service as directors. Under our 1997 Directors' Stock Option Plan, each new non-employee director will receive an option to purchase 180,000 shares of common stock upon joining the Board of Directors. In addition, under the plan, each incumbent non-employee director will be granted an option to purchase an additional 36,000 shares of our common stock annually. For a more detailed description of the 1997 Directors' Stock Option Plan see the discussion in this prospectus under the heading "Management -- Compensation Plans."

EXECUTIVE COMPENSATION

The following table shows the cash compensation paid or accrued for the fiscal year ended January 31, 2000 to our Chief Executive Officer and each of our most highly compensated executive officers or former executive officers other than the Chief Executive Officer. We did not make any restricted stock awards or long-term incentive plan payments in the fiscal year ended January 31, 2000. The amount of cash compensation does not include the aggregate value of personal benefits or securities, property or other non-cash compensation paid or distributed other than pursuant to a plan that was less than the lesser of \$50,000 and ten percent (10%) of the cash compensation received by such officer.

SUMMARY COMPENSATION TABLE

	ANNUAL COMPENSATION	ALL OTHER COMPENSATION(1)
	-----	-----
Sehat Sutardja..... Co-Chairman of the Board, President and Chief Executive Officer	\$100,000	\$3,081
Weili Dai..... Executive Vice President, Corporate Assistant Secretary and Director	100,000	3,081
Pantas Sutardja..... Vice President and Director	100,000	3,081
Gordon M. Steel(2)..... Vice President of Finance and Chief Financial Officer	165,000	3,081

- -----
(1) These amounts consist of discretionary profit sharing payments.

(2) Mr. Steel's employment with us terminated in April 2000.

FISCAL YEAR 2000 OPTIONS

No stock options were granted to those executive officers listed in the Summary Compensation Table for the year ended January 31, 2000. However, subject to the approval of our Board of Directors, we expect to grant George Hervey options to purchase 760,000 shares with an exercise price set at the fair market value of the common stock on the grant date. We have never granted any stock appreciation rights.

None of those executive officers listed in the Summary Compensation Table exercised stock options during fiscal 2000 or held unexercised options as of January 31, 2000.

EMPLOYMENT CONTRACTS AND CHANGE OF CONTROL ARRANGEMENTS

We do not have employment agreements or change in control agreements with any of our executive officers. Accordingly, our executive officers may resign at any time and the employment of each executive officer may be terminated at any time by the Board of Directors.

COMPENSATION PLANS

1995 STOCK OPTION PLAN

Our Board of Directors adopted our 1995 Stock Option Plan on April 18, 1995, and intends to amend it at a forthcoming board meeting to add flexibility to the administration of the plan and to add certain other improvements. The plan will terminate no later than April 18, 2005. The plan provides for the grant of incentive stock options to our employees and nonstatutory stock options to our employees, directors and consultants. Subject to adjustments for stock splits and similar events, 29,500,000 shares of common stock may be issued under the plan. As of April 30, 2000, 11,492,809 were subject to outstanding options and 5,225,270 were available for future grant. As amended, the plan will provide for annual increases in the number of shares available for issuance on the first day of

each year, beginning January 1, 2001, equal to the lesser of 5,000,000 shares, 5% of the outstanding shares on the date of the annual increase, or a number of shares determined by our Board.

Our Board or a committee appointed by the Board administers the stock option plan and determines the terms of options granted, including the exercise price, the number of shares subject to individual option awards and the vesting period of options. The exercise price of nonstatutory options will generally be at least the fair market value of the common stock on the date of grant. The exercise price of incentive stock options cannot be lower than 100% of the fair market value of the common stock on the date of grant and, in the case of incentive stock options granted to holders of more than 10% of our voting power, not less than 110% of the fair market value. The term of an incentive stock option cannot exceed ten years, and the term of an incentive stock option granted to a holder of more than 10% of our voting power cannot exceed five years.

A participant may not transfer rights granted under our stock option plan other than by will, the laws of descent and distribution, or as otherwise provided under the stock option plan. As amended, the plan will provide the Board or committee with broad authority to adjust the treatment of options granted under our stock option plan if we are acquired, including causing them to accelerate and become fully exercisable, if the successor corporation does not assume them or substitute equivalent options in their place. Our Board of Directors may not amend, modify, or terminate the stock plan if the amendment, modification, or termination would impair optionees' rights unless we first obtain the prior written consent of all optionees who would be adversely affected.

2000 EMPLOYEE STOCK PURCHASE PLAN

At a forthcoming board meeting, we intend to present for approval the 2000 Employee Stock Purchase Plan, the adoption of which shall be subject to shareholder approval. The purchase plan will terminate no later than 20 years after the Board approval. The purchase plan will provide our employees and those of our participating subsidiaries an opportunity to purchase our common stock through accumulated payroll deductions.

A total of 1,000,000 shares of common stock will initially be reserved for issuance under the purchase plan. In addition, the purchase plan will provide for annual increases in the number of reserved shares on the first day of each calendar year in the plan's term, beginning January 1, 2001, equal to the lesser of 500,000 shares, 0.75% of the outstanding shares on the date of the annual increase, or the amount the Board determines.

Our Board of Directors or a committee appointed by the Board will administer the purchase plan. The Board or committee will have full and exclusive authority to interpret the terms of the purchase plan. In addition, the Board will have the authority to amend or terminate the purchase plan at any time.

Employees will be eligible to participate if they are customarily employed for at least 20 hours per week. However, an employee will not be eligible to participate if immediately after the grant of a right to purchase stock under the purchase plan, he or she would own stock with five percent or more of the total combined voting power or value of all classes of our capital stock, or if and to the extent that, his or her rights to purchase stock under all of our employee stock purchase plans accrue at a rate that exceeds \$25,000 worth of stock per calendar year.

The purchase plan will permit participants to purchase common stock through payroll deductions of up to 20% of the participant's base compensation, which will include regular straight-time gross earnings and exclude overtime, shift premiums, incentive compensation or payments, bonuses, and commissions. However, the Board or committee may set a maximum withholding percentage that is less than 20%. Employees will participate in the purchase plan by enrolling in "offering periods" of 24 months, unless determined otherwise by the plan administrator. Each offering period will include four purchase periods. We intend that the first offering period is to begin on the first trading day before the effective date of this offering. An employee may be enrolled in only one offering period at a time.

On each purchase date, amounts that are deducted and accumulated for the participant's account will be used to purchase shares of common stock at a price of 85% of the lower of the fair market value of the common stock at the first day of the offering period and the purchase date. If the fair market value of the common stock is lower on the purchase date than it was on the first day of the offering period, then all participants in that offering period will automatically be enrolled in the offering period that begins the next trading day, and their participation in the prior offering period will be terminated. In addition, if the fair market value of the common stock drops more than 25% from one purchase date (the "benchmark date") to the next, the number of shares a participant may purchase will be limited, unless the administrator determines otherwise, to 75% of the number that could have been purchased at 85% of the higher price. This limit will remain in place until the fair market value on a purchase date has recovered to at least 75% of its level on the benchmark date.

Participants will be able to reduce their withholding percentage, but not below one percent, at any time during an offering period and will be able to increase their withholding percentage effective the first day of each purchase period. Participants will be able to end their participation, and will be repaid their payroll deductions through that date, at any time during an offering period. Participation will end automatically upon termination of employment.

We intend the purchase plan to qualify under Section 423 of the Internal Revenue Code, to allow favorable tax treatment of participants. In general, if a participant in a qualified employee stock purchase plan holds stock purchased under the plan for at least two years from the date he or she was granted the right to purchase the stock and at least one year after the purchase, then upon sale of the stock, (a) gain up to 15% of the value of the stock on the date the purchase right was granted is taxable as ordinary income and (b) additional gain is long-term capital gain.

A participant will not be able to transfer rights granted under the purchase plan other than by will, the laws of descent and distribution or as otherwise provided under the purchase plan.

The purchase plan will provide that, if we merge with or into another corporation or a sale of substantially all of our assets, a successor corporation may assume or substitute for each outstanding purchase right. If the successor corporation refuses to assume or substitute for the outstanding purchase rights, the offering period then in progress will be shortened, and a new purchase date will be set.

1997 DIRECTORS' STOCK OPTION PLAN

On January 28, 1997 our Board of Directors adopted the 1997 Directors' Stock Option Plan and our shareholders approved the adoption of the plan on August 5, 1997. The plan provides for the grant of nonstatutory stock options to non-employee directors. A total of 900,000 shares of our common stock have been reserved for issuance under the director plan.

The 1997 Directors' Stock Option Plan provides that each non-employee director will automatically be granted an option to purchase 180,000 shares of our common stock on the date that he or she first becomes a non-employee director. In addition, each non-employee director will automatically be granted an option to purchase 36,000 shares on the date of each annual shareholders' meeting if at that time he or she will have served on the Board of Directors for at least the preceding six months. The term of each option shall not exceed ten years. Under the plan, the initial grant of 180,000 shares of common stock vests over five years with the first 20% vesting at the end of the first year and one sixtieth of the total vesting each month thereafter. Each subsequent grant of 36,000 shares begins to vest with 20% on the day that is one month after the fourth anniversary of the date of the grant and one twelfth of the total vests each month thereafter. In addition, upon a merger or the sale of substantially all of our assets, adoption of a plan of liquidation, dissolution, consolidation or reorganization all unvested options shall immediately vest and we will give each director a reasonable time thereafter to exercise his or her option. Alternatively, we may grant the director the right to exercise the option, whether or not vested, for an equivalent number of shares of the company acquiring our business by reason of such transaction.

The exercise price of each option granted under the 1997 Directors' Stock Option Plan will be 100% of the fair market value per share of our common stock, on the date of grant. Each option will have a maximum term of 10 years, but will terminate earlier if the director ceases to be a member of the Board of Directors. The Board of Directors may amend the plan without shareholder approval unless shareholder approval is required under applicable law.

401(K) PLAN

We sponsor a defined contribution plan intended to qualify under Section 401(k) of the Internal Revenue Code. Most employees are eligible to participate and may enter at any time during the year. Participants may make pre-tax contributions to the plan of up to the statutorily prescribed annual limit. Participants are fully vested in their contributions and the investment earnings. The plan permits us to make discretionary matching contributions. To date, we have not made matching contributions under the plan.

INDEMNIFICATION OF DIRECTORS AND EXECUTIVE OFFICERS AND LIMITATION ON LIABILITY

Bermuda law permits a company to indemnify its directors and officers, except for any acts of fraud or dishonesty. We have provided in our Bye-laws that our directors and officers will be indemnified and held harmless out of our assets from and against any and all actions, costs, charges, losses, damages and expenses by reason of any act or omission in the discharge of their duty, other than in the case of fraud or dishonesty.

Bermuda law and our Bye-laws also permit us to purchase insurance for the benefit of our directors and officers against any liability incurred by them for the failure to exercise the requisite care, diligence and skill in the exercise of their powers and the discharge of their duties, and to indemnify them in respect of any loss arising or liability incurred by them other than in respect of fraud or dishonesty.

To the extent that our directors, officers and controlling persons are indemnified under the provisions contained in our Bye-laws, Bermuda law or contractual arrangements against liabilities arising under the Securities Act, we have been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable.

We intend to enter into indemnification agreements with our officers and directors. To the extent permitted by law, the indemnification agreements may require us, among other things, to indemnify our officers and directors against certain liabilities that may arise by reason of their status or service as officers or directors (other than liabilities arising from fraud or dishonesty) and to advance expenses they incurred as a result of any proceedings against them as to which they could be indemnified.

There is currently no pending litigation or proceeding involving an officer or director that will require or permit us to provide indemnification. We are not aware of any threatened litigation or proceeding that may result in a claim for such indemnification.

CERTAIN TRANSACTIONS

Since January 1997, there has not been nor is there currently proposed any transaction or series of similar transactions to which we were or will be a party in which the amount involved exceeded or will exceed \$60,000 and in which any director, executive officer, holder of more than 5% of our stock or any member of his or her immediate family had or will have a direct or indirect material interest, except as noted below.

ISSUANCES OF OPTIONS AND PURCHASES OF COMMON STOCK

From January 1, 1997 through April 30, 2000, we granted options for the purchase of and issued shares of our common stock as follows:

- In January 1997, we granted Diosdado Banatao an option to purchase 180,000 shares at an exercise price per share of \$0.05.
- In January 1997, we granted Herbert Chang an option to purchase 180,000 shares at an exercise price per share of \$0.05. In June 1997, Mr. Chang exercised all of the options.
- In January 1998, we granted Ron Verdoorn options to purchase an aggregate of 630,000 shares at an exercise price per share of \$0.25. In March 2000, Mr. Verdoorn exercised all of the options.
- In December 1999, we granted Dr. John Cioffi options to purchase 180,000 shares at an exercise price per share of \$2.00. In January 2000, Dr. Cioffi exercised all of the options.
- In December 1999, we granted Dr. Paul Gray options to purchase 180,000 shares at an exercise price per share of \$2.00. In January 2000, Dr. Gray exercised 36,000 of these options.

The exercise prices of the options represent the estimate by our Board of Directors of the fair market value of the common stock on the grant date. In establishing these prices, the Board of Directors considered many factors, including our financial condition and operating results, transactions involving the issuances of shares of our preferred stock, the senior rights and preferences accorded shares of preferred stock and the market for comparable stocks.

Subject to the approval of our Board of Directors, we expect to grant George Hervey options to purchase 760,000 shares with an exercise price set at the fair market value of the common stock on the grant date.

Except as set forth above, none of our executive officers, directors or 5% shareholders received options to purchase or purchased our common stock during this period.

CONVERTIBLE NOTE FINANCING AND SERIES D PREFERRED STOCK

In June 1997 we sold an aggregate of \$2.2 million in convertible promissory notes and warrants to purchase 76,542 Series D preferred shares to 6 accredited investors. The exercise price for the warrants was \$4.33 per share. The promissory notes were cancelled in December 1997, and the accrued indebtedness, consisting of principal and interest, was converted to Series D preferred stock at conversion price of \$4.33 per share. Concurrent with the conversion of the convertible promissory notes, during the period December 1997 through February 1998 we sold additional shares of Series D preferred stock to investors at a purchase price of \$4.33 per share. Set forth below is a description of the warrants and shares of Series D preferred stock issued to our officers, directors and 5% shareholders.

- In December 1997, InveStar Burgeon Venture Capital, Inc., purchased 119,330 shares of Series D Preferred for the cancellation of \$517,094.50 in accrued indebtedness under a convertible promissory note issued in June 1997, and we granted to InveStar Burgeon Venture Capital, Inc. a warrant to purchase 17,307 shares of Series D preferred stock.

- In December 1997, InveStar Semiconductor Development Fund, Inc. purchased 469,428 shares of Series D preferred stock for \$999,999 in cash and cancellation of \$1,034,189 in accrued indebtedness under a convertible promissory note issued in June 1997, and we issued to InveStar Semiconductor Development Fund, Inc. a warrant to purchase 34,616 shares of Series D preferred stock.
- In December 1997, Sehat Sutardja and Weili Dai purchased 23,078 shares of Series D preferred stock for cash.
- In December 1997, InveStar Dayspring Venture Capital, Inc. purchased 115,385 shares of Series D preferred stock for cash.
- In February 1998, InveStar Semiconductor Development, Inc. purchased 92,309 shares of Series D preferred stock for cash.
- In February 1998, InveStar Dayspring Venture Capital, Inc. purchased 46,154 shares of Series D preferred stock for cash.
- In February 1998, Forefront Venture Partners, L.P., purchased 46,154 shares of Series D preferred stock for cash.
- In February 1998, InveStar Excelsus Venture Capital, Inc. purchased 46,154 shares of Series D preferred stock for cash.
- In February 1998, Ron Verdoorn purchased 8,078 shares of Series D preferred stock for cash.

All share numbers and exercise prices for common stock have been adjusted to reflect the 50% stock dividend in June 1998 and the two 100% common stock dividends approved by our shareholders on March 17, 2000. All share numbers and exercise prices for preferred stock have been adjusted to reflect the 50% stock dividend in June 1998. Although the number of shares of Series D preferred stock was not affected by the two 100% common stock dividends approved by our shareholders on March 17, 2000, as a result of the stock dividends, each share of Series D preferred stock automatically adjusted and became convertible into four shares of common stock.

InveStar Capital, Inc. acted as placement agent for several sales of the Series D preferred stock. As consideration for such services, we paid a cash fee equal to 6% of the value of the securities placed by InveStar Capital, Inc., or approximately \$141,000, and issued to InveStar Capital, Inc. warrants to purchase 10,825 shares of Series D preferred stock.

We have entered into an investor rights agreement with each of the purchasers of our preferred stock and common stock warrant holders, including those set forth above. Under this agreement, these stockholders are entitled to registration rights with respect to their shares of common stock issuable upon conversion of the preferred stock. If we decide to register securities, the registration rights provided in the agreement permit the holders of the rights to participate in the registration. However any managing underwriter for the offering may limit the shares the holders can register. In our initial public offering the underwriters can exclude the holders from participating and have done so in this offering. In future offerings the underwriters can limit the holders participation to 25% of the securities we are offering.

DIRECTOR AFFILIATIONS

Our director Ronald Verdoorn was employed by Seagate Technology, Inc. from May 1983 through September 1997, most recently as Executive Vice President and Chief Operating Officer of Storage Products. Seagate represented 21% of our net revenue in fiscal 1998, 43% of our net revenue in fiscal 1999 and 24% of our net revenue in fiscal 2000.

PRINCIPAL SHAREHOLDERS

The following table sets forth information regarding the beneficial ownership of our common stock as of April 30, 2000, and as adjusted to reflect the sale of the shares in this offering for:

- each person known by us to own beneficially more than 5% of our outstanding shares;
- each director and executive officer; and
- all directors and executive officers as a group.

The percentage of beneficial ownership for the following table is based on 76,211,425 shares of our common stock outstanding on April 30, 2000, assuming the conversion of all outstanding shares of preferred stock into common stock. The percentage of beneficial ownership after this offering also assumes 82,211,425 shares of common stock outstanding after completion of this offering, and assumes no exercise of the underwriters' option to purchase additional shares in the offering. Unless otherwise indicated, to our knowledge, all persons listed below have sole voting and investment power with respect to their shares of common stock, except to the extent authority is shared by spouses under applicable law.

The number of shares beneficially owned by each shareholder is determined in accordance with the rules of the Securities and Exchange Commission and are not necessarily indicative of beneficial ownership for any other purpose. Under these rules, beneficial ownership includes those shares of common stock that the shareholder has sole or shared voting of investment power and any shares of common stock that the shareholder has a right to acquire within sixty (60) days after April 30, 2000 through the exercise of any option, warrant or other right. The percentage ownership of the outstanding common stock, however, is based on the assumption, expressly required by the rules of the Securities and Exchange Commission, that only the person or entity whose ownership is being reported has converted options or warrants into shares of common stock. Although the number of shares of preferred stock was not affected by the two 100% common stock dividends approved by our shareholders on March 17, 2000, as a result of the stock dividends, each share of preferred stock automatically adjusted and became convertible into four shares of common stock.

Unless otherwise indicated, the address of each person owning more than 5% of our outstanding shares is c/o Marvell Semiconductor, Inc., 645 Almanor Avenue, Sunnyvale, CA 94086.

- (1) Represents 161,539 shares of Series D Preferred Stock held by InveStar Dayspring Venture Capital, Inc., 46,154 shares of Series D Preferred Stock held by InveStar Excelsus Venture Capital (Int'l), Inc., 570,000 shares of Series C Preferred Stock, 561,737 shares of Series D Preferred Stock and a warrant to purchase 34,615 shares of Series D Preferred Stock held by InveStar Semiconductor Development Fund, Inc., 569,999 shares of Series C Preferred Stock, 119,330 shares of Series D Preferred Stock and a warrant to purchase 17,307 shares of Series D Preferred Stock held by InveStar Burgeon Venture Capital, Inc., 46,154 shares of Series D Preferred Stock held by Forefront Venture Partners L.P., and warrants to purchase 10,825 shares of Series D preferred stock issued to InveStar Capital, Inc. Herbert Chang is the President of InveStar Capital, Inc., which is the investment manager of each of InveStar Dayspring Venture Capital, Inc., InveStar Excelsus Venture Capital (Int'l), Inc., InveStar Semiconductor Development Fund, Inc., and InveStar Burgeon Venture Capital, Inc. Mr. Chang is also the managing director of Forefront Associates LLC, which is the general partner of Forefront Venture Partners, L.P. Mr. Chang disclaims beneficial ownership of these shares, except to the extent of his pecuniary interest, if any.
- (2) Dr. Sutardja and Ms. Dai are husband and wife. Includes 9,000,000 shares held by Dr. Sutardja, of which Ms. Dai may be deemed to be a beneficial owner, although Ms. Dai disclaims such beneficial ownership, 9,000,000 shares held by Ms. Dai, of which Dr. Sutardja may be deemed to be a beneficial owner, although Dr. Sutardja disclaims such beneficial ownership, 23,078 shares of Series D Preferred Stock convertible into 92,312 common shares held jointly by Dr. Sutardja and Ms. Dai, and 6,000,000 shares held by Dr. Sutardja and Ms. Dai as trustees of the Sutardja Family Trust dated September 16, 1996. Dr. Sutardja and Ms. Dai disclaim beneficial ownership of the 6,000,000 shares held by the Sutardja Family Trust, except to the extent of their pecuniary interest, if any.
- (3) Includes 240,000 shares held by each of Mr. Steel's two children. Mr. Steel disclaims beneficial ownership of the 480,000 shares held by his children, except to the extent of his pecuniary interest therein, if any. Mr. Steel's employment with us terminated in April 2000.
- (4) Includes 15,711 shares held by Mr. Banatao's minor children. Mr. Banatao may be deemed to be a beneficial owner of these shares, although Mr. Banatao disclaims such beneficial ownership. Also includes 1,680,000 shares subject to stock options that are currently exercisable or will become exercisable within 60 days after April 30, 2000.
- (5) Includes 144,000 shares subject to stock options that are currently exercisable or will become exercisable within 60 days after April 30, 2000.
- (6) Includes 1,839,000 shares subject to stock options that are currently exercisable or will become exercisable within 60 days after April 30, 2000.

DESCRIPTION OF CAPITAL STOCK

Our authorized share capital consists of \$500,000, divided into 242,000,000 shares of common stock, \$0.002 par value per share, and 8,000,000 shares of preferred stock, \$0.002 par value per share.

COMMON STOCK

As of April 30, 2000, there were 76,211,425 shares of our common stock issued and outstanding, held of record by approximately 258 shareholders. The number of shares of common stock outstanding has been adjusted to reflect the conversion when this offering closes of 6,632,376 outstanding shares of preferred stock into 26,529,504 shares of common stock, at a conversion ratio of four shares of common stock for each share of preferred stock. In the event of our liquidation, dissolution or winding up, holders of common stock would be entitled to receive all of our assets, pro rata, after payment of all our debts and liabilities, and any liquidation payment that we may be required to pay to our preferred shareholders on the date of liquidation. The shares of common stock do not have preemptive or conversion rights or other subscription rights and there are no redemption or sinking fund provisions. The outstanding shares of common stock are, and the shares of common stock offered hereby, when issued and upon our receipt of the full purchase price therefore, will be, fully paid and nonassessable.

PREFERRED STOCK

The Board of Directors is authorized to issue up to 8,000,000 shares of preferred stock in one or more series. The Board of Directors may, without any further approval of our shareholders:

- fix the rights, preferences, privileges and restrictions of the preferred stock, including dividend rights, dividend rates, conversion rights, voting rights, terms of redemption, redemption prices, and liquidation preferences; and
- fix the number of shares and designation of any series of preferred stock.

Although the Board of Directors presently does not intend to do so, it could issue shares of preferred stock with voting and conversion rights which could adversely affect the voting power and other rights of the holders of common stock, including the loss of voting control to others, without obtaining further approval of our shareholders. The issuance of shares of preferred stock could delay or prevent a change in control of this company, without further action by our shareholders.

BERMUDA LAW

We were incorporated as an exempted Bermuda company under The Companies Act, 1981 of Bermuda. This means that we are exempted from the provisions of Bermuda law which stipulate that at least 60% of our equity must be beneficially owned by Bermudians. The rights of our shareholders, including those persons who will become our shareholders in connection with this offering, are governed by Bermuda law, our Memorandum of Association and Bye-laws. The following is a summary of certain provisions of Bermuda law and our organizational documents. Because this summary does not contain all of the information set forth in the Bermuda law provisions or our organizational documents, we encourage you to read those documents.

DIVIDENDS. Bermuda law authorizes a company to declare or pay a dividend or make a distribution out of contributed surplus, unless,

- the company would not be able to pay its debts as they become due, or
- the realizable value of the company's total assets would thereby be less than the aggregate of its liabilities and its issued share capital and share premium accounts.

VOTING RIGHTS. Unless otherwise provided by the Companies Act or a company's bye-laws, under Bermuda law, questions brought before a general meeting of shareholders are decided by the vote of a majority of the shareholders present at the meeting. Each shareholder has one vote, regardless of the number of shares held, unless a poll is requested. If a poll is requested, each shareholder present in person or by proxy has one vote for each share held. A poll may be requested by:

- the chairman of the meeting,
- at least three shareholders present in person or by proxy,
- any shareholder or shareholders present in person or represented by proxy and holding between them not less than one-tenth of the total voting rights of all the shareholders having the right to vote, or
- any shareholder or shareholders present in person or represented by proxy holding shares conferring the right to vote at the meeting, and the total paid up on those shares has been paid up equal to at least one-tenth of the total sum paid up on all shares conferring the right to vote at the meeting.

At our annual general meeting in May 2000, we intend to seek the approval of our shareholders of an amendment and restatement of our Bye-laws requiring two-thirds of the outstanding shares to approve amendments to the provisions of our Bye-laws.

RIGHTS IN LIQUIDATION. Under Bermuda law, in the event of liquidation, dissolution or winding up of a company, the proceeds of such liquidation, dissolution or winding up are distributed pro rata among the holders of common stock, after satisfaction in full of all claims of creditors and subject to the preferential rights accorded to any series of preferred stock.

MEETINGS OF SHAREHOLDERS. Under Bermuda law, a company is required to convene at least one general shareholders' meeting per calendar year. Bermuda law provides that a special general meeting must be called by the board of directors and must be called upon the request of shareholders holding not less than 10% of such of the paid-up capital of the company having the right to vote. Bermuda law also requires that shareholders be given at least five days' advance notice of a general meeting, but the accidental omission of notice to any person does not invalidate the proceedings at such meeting. Our Bye-laws require at least five days' notice be given to each shareholder of the annual general meeting and of any special general meeting.

Under Bermuda law, the number of shareholders constituting a quorum at any general meeting of shareholders is determined by the bye-laws of the company. Our Bye-laws provide that two persons present in person and representing in person or by proxy at least 50% of the total issued voting shares constitutes a quorum.

ACCESS TO BOOKS AND RECORDS AND DISSEMINATION OF INFORMATION. Members of the general public have the right to inspect the public documents of a company available at the office of the Registrar of Companies in Bermuda. These documents include:

- our Memorandum of Association (including its objects and powers), and
- any amendment of our Memorandum of Association.

In addition, our shareholders have the right to inspect:

- our Bye-laws,
- our minutes of general meetings, and
- our audited financial statements, which must be presented at the annual general meeting.

Our register of shareholders is also open to inspection by our shareholders without charge and to members of the general public, upon the payment of a fee. We are required to maintain our share

register in Bermuda but may, subject to the provisions of the Companies Act, establish a branch register outside Bermuda. We are required to keep at our registered office a register of our directors and officers which is open for inspection for not less than two hours each day by members of the public without charge. However, Bermuda law does not provide a general right for shareholders to inspect or obtain copies of any other corporate records.

ELECTION OR REMOVAL OF DIRECTORS. Under Bermuda law and our Bye-laws, directors are elected at the annual general meeting for a term of one year or until their successors are elected or appointed, unless they resign or are earlier removed.

Under Bermuda law, unless otherwise provided in a company's bye-laws, a director may be removed at a special general meeting of shareholders specifically called for that purpose, provided that the director was served with at least 14 days' notice of the meeting. The director has a right to be heard at such meeting. Any vacancy created by the removal of a director at a special general meeting may be filled at such meeting by the election of another director in his or her place or, in the absence of any such election, by the board of directors.

At our annual general meeting in May 2000, we intend to seek the approval of our shareholders of an amendment and restatement of our Bye-laws providing for a classified Board of Directors with staggered terms and limiting the removal of directors without cause.

AMENDMENT OF MEMORANDUM OF ASSOCIATION AND BYE-LAWS. Bermuda law provides that the memorandum of association of a company may be amended by a resolution passed at a general meeting of shareholders after due notice has been given. An amendment to the memorandum of association, other than an amendment which alters or reduces a company's share capital, also requires the approval of the Bermuda Minister of Finance, who may grant or withhold approval at his or her discretion. The directors may amend the bye-laws, but the amendment must be approved by the shareholders at a general meeting.

Under Bermuda law, the holders of a total of at least 20% in par value of any class of a company's issued share capital have the right to apply to the Bermuda courts for an annulment of any amendment of the memorandum of association adopted by shareholders at any general meeting, other than an amendment which alters or reduces a company's share capital as provided in the Companies Act. Where such an application is made, the amendment becomes effective only to the extent that it is confirmed by the Bermuda courts. An application for annulment of any amendment of the memorandum of association must be made within 21 days after the date on which the resolution altering the company's memorandum is passed and may be made on behalf of the persons entitled to make the application by one or more of their number as they may appoint in writing for that purpose. No such application may be made by persons voting in favor of the amendment.

APPRAISAL RIGHTS AND SHAREHOLDER SUITS. Under Bermuda law, in the event of a consolidation or amalgamation of two companies, a shareholder who is not satisfied that fair value has been offered for his or her shares may apply to the Bermuda courts to appraise the fair value of his or her shares. The amalgamation of a company with another company requires the approval of the amalgamation agreement by the board of directors and by the shareholders, and of the holders of each class of such shares.

Class actions and derivative actions are not available to shareholders under Bermuda law except in the circumstances described below. The Bermuda courts would ordinarily be expected to permit a shareholder to commence an action in the name of a company to remedy a wrong done to the company where the act complained of is alleged:

- to be beyond the corporate power of the company,
- to be illegal,
- to violate the company's memorandum of association or bye-laws, or
- to involve the fraud or dishonesty of a director or officer.

Furthermore, consideration would be given by the Bermuda courts to acts that are alleged to constitute a fraud against the minority shareholders or, for instance where an act requires the approval of a greater percentage of the company's shareholders than those who actually approve it.

When the affairs of a company are being conducted in a manner oppressive or prejudicial to the interests of some of the shareholders, one or more shareholders may apply to the Bermuda courts for an order to regulate the company's conduct of affairs in the future or order the purchase of the shares by any shareholder, by other shareholders or by the company.

WARRANTS

We have issued the following warrants:

- a warrant to purchase 45,000 shares of Series D preferred stock, which will be replaced with a warrant to purchase 180,000 shares of common stock at the closing of this offering;
- a warrant to purchase 60,000 shares of common stock; and
- warrants to purchase 91,353 shares of Series D preferred stock that expire upon the closing of this offering if not exercised.

REGISTRATION RIGHTS

Pursuant to the terms of the Investor Rights Agreement dated September 10, 1999, with our preferred shareholders and warrant holders and their transferees receiving at least 200,000 shares, after this offering the holders of 27,044,912 shares of common stock will have rights with respect to the registration of their respective shares under the Securities Act. Under the terms of the agreement, if we propose to register any of our securities under the Securities Act, either for our own account or for the account of other security holders exercising registration rights, such holders are entitled to notice of such registration and are entitled to include their common stock in the registration. Six months following the effective date of this offering, these shareholders may also require us to file a registration statement under the Securities Act at our expense with respect to their shares of common stock, and we are required to use our best efforts to effect such registration. These shareholders have the right to request up to two such registration statements. Further, such shareholders may require us to file additional registration statements on Form S-3 or its equivalent at our expense. Each of these rights is subject to conditions and limitations, including the right of the underwriters of an offering to limit the number of shares included in such offering under various circumstances.

ANTI-TAKEOVER PROVISIONS

We intend to seek the approval of our shareholders at our annual general meeting in May 2000, for an amendment to our Bye-laws. The amendment will implement provisions that may have the effect of delaying, deferring or discouraging another person from acquiring control of us. These provisions include:

- following the completion of this offering, the approval of holders of two-thirds of the shares entitled to vote at an election of directors shall be required to adopt, amend or repeal our Bye-laws regarding the election and removal of directors;
- shareholders may only fill vacancies on the board when no quorum of directors remains;
- following the completion of this offering, our Board of Directors will be divided into three classes, each serving staggered three-year terms, which means that only one class of directors will be elected at each annual meeting of shareholders, with the other classes continuing for the remainder of their respective terms, and directors may only be removed for cause by the holders of two-thirds of the shares entitled to vote at an election of directors; and

- we will indemnify officers and directors against losses that they may incur in investigations and legal proceedings resulting from their services to us, which may include services in connection with takeover defense measures.

TRANSFER AGENT AND REGISTRAR

The transfer agent and registrar for our common stock is .

LISTING

We have applied to have our common stock listed for quotation on the Nasdaq National Market under the trading symbol "MRVL".

CERTAIN FOREIGN ISSUER CONSIDERATIONS

There are no limitations on the rights of foreign nationals or persons non-resident in Bermuda who own our common stock to hold or vote their shares. Because we have been designated as a non-resident for Bermuda exchange control purposes, there are no restrictions in Bermuda on our ability to transfer funds in and out of Bermuda or to pay dividends to United States residents who are holders of our common stock other than in respect of local Bermuda currency.

In the case of an applicant acting in a special capacity such as an executor or trustee, at the request of the applicant, common stock certificates may record the capacity in which the applicant is acting. Notwithstanding the recording of any such special capacity, we are not bound to investigate or incur any responsibility in respect of the proper administration of any estate or trust. We will not take notice of any trust applicable to any of its shares whether or not we had notice of the trust.

Under Bermuda law, we are an exempted company. This means that we are exempted from the provisions of Bermuda law that stipulate that at least 60% of the equity must be beneficially owned by Bermudians. Consents under The Exchange Control Act, 1972 of Bermuda and the regulations under that Act have been obtained for the issue and subsequent transfer of the shares of common stock offered by this prospectus to and among persons not resident in Bermuda for exchange control purposes. For exchange control purposes, persons regarded as residents of Bermuda require specific consent under The Exchange Control Act 1972 to purchase shares. The Companies Act permits companies to adopt bye-law provisions relating to the transfer of shares. There are no limitations imposed by Bermuda law, our Memorandum of Association or our Bye-laws, on the right of foreign nationals or nonresidents of Bermuda to hold or vote shares of our common stock for purposes of Section 28 of the Companies Act, which requires that a filing state the minimum subscription that needs to be raised in an offering. There is no minimum subscription which must be raised in this offering.

As an exempted company, we may not, unless authorized by our Memorandum of Association or any other act, participate in certain business transactions, including:

- the acquisition or holding of land in Bermuda, except as required for our business and held by way of lease or tenancy for terms of not more than 50 years;
- the taking of mortgages on land in Bermuda; or
- the carrying on of business of any kind in Bermuda, except in furtherance of our business carried on outside Bermuda or under a license granted by the Bermuda Minister of Finance.

The Bermuda government actively encourages foreign investment in exempted entities which, like us, are based in Bermuda but do not operate in competition with local business. In addition to having no restrictions on the degree of foreign ownership, we are not subject to taxes on its income or dividends or to any foreign exchange controls in Bermuda. In addition, there is no capital gains tax in Bermuda, and we can accumulate, as required, without limitation.

We have been advised by our legal advisor in Bermuda, Conyers, Dill & Pearman, that the United States and Bermuda do not currently have a treaty providing for the reciprocal recognition and enforcement of judgments in civil and commercial matters and that a final judgment for the payment of money rendered by any federal or state court in the United States based on civil liability, whether or not based solely on United States federal securities laws, would, therefore, not be automatically enforceable in Bermuda.

Nevertheless, a final and conclusive judgment obtained in a state court or federal court of the United States based upon a contractual obligation under which a sum of money is payable could be enforced by an action in the Supreme Court of Bermuda, without reexamination of the merits, under the common law doctrine of obligation. A final opinion as to the availability of this remedy could only be given when the facts surrounding the judgment were known but, on general principles, we would

expect an application to be successful on the basis of advice from our legal advisor in Bermuda, provided that the judgment:

- was final and conclusive;
- was not obtained by fraud;
- was not and its enforcement would not be contrary to public policy of Bermuda;
- was obtained in circumstances where the proceedings were not contrary to the rules of natural justice; and
- was the subject of the correct procedures under the law of Bermuda for its enforcement.

A Bermuda court may impose civil liability on us or our directors or officers in a suit brought in the Supreme Court of Bermuda against us or those persons with respect to a violation of United States securities law, provided that the facts surrounding the violation would constitute or give rise to a cause of action under Bermuda law.

Comparison of Bermuda and Delaware Law. The discussion that follows sets forth a comparison of various issues that affect shareholders under the law of the state of Delaware, the state most often chosen as the state of incorporation for U.S. public corporations, and Bermuda law.

Interested Directors. Bermuda law and our Bye-Laws provide that any transaction entered into by us in which a director has an interest is not voidable by us nor can the director be liable to us for any profit realized pursuant to the transaction provided that the nature of the director's interest is disclosed at the first opportunity at a meeting of our directors, or in writing to our directors. Under Delaware law a transaction with an interested director would not be voidable if:

- the material facts of the interested director's relationship or interests are disclosed or are known to the board of directors and the board in good faith authorizes the transaction by the affirmative vote of a majority of the disinterested directors;
- the material facts are disclosed or are known to the stockholders entitled to vote on the transaction and the transaction is specifically approved in good faith by vote of the majority of shares entitled to vote on the matter; or
- the transaction is fair to the corporation as of the time it is authorized, approved or ratified.

Under Delaware law, the interested director could be held liable for a transaction in which the director derived an improper personal benefit.

Mergers and Similar Arrangements. We may acquire the business of another Bermuda exempted company or a company incorporated outside Bermuda when the business acquired is within the business purpose set forth in our Memorandum of Association. We may, with the approval of a majority of votes cast at a general meeting of our shareholders at which a quorum is present, amalgamate with another Bermuda company or with a company incorporated outside Bermuda. In the case of an amalgamation, a shareholder may apply to a Bermuda court for a proper valuation of the shareholder's shares if the shareholder is not satisfied that a fair value has been paid for his or her shares. The Bermuda court ordinarily would not disapprove the transaction on the ground that fair value was not paid absent evidence of fraud or bad faith. Under Delaware law, with certain exceptions, a merger, consolidation or sale of all or substantially all the assets of a corporation must be approved by the board of directors and a majority of the outstanding shares entitled to vote on the matter. Under Delaware law, a stockholder of a corporation participating in defined major corporate transactions may be entitled to appraisal rights pursuant to which the stockholder may seek to receive cash in the amount of the fair value of the shares held by the stockholder, as determined by a court, instead of the consideration the stockholder would otherwise receive in the transaction.

Takeovers. Bermuda law provides that where an offer is made for shares of a company and, within four months of the offer, the holders of not less than 90% of the shares which are the subject

of the offer accept, the offeror may by notice require the nontendering shareholders to transfer their shares on the terms of the offer. Dissenting shareholders may apply to the Bermuda court within one month of the notice objecting to the transfer. The burden is on the dissenting shareholders to show that the court should exercise its discretion to enjoin the required transfer, which a court will be unlikely to do unless there is evidence of fraud or bad faith or collusion between the offeror and the holders of the shares who have accepted the offer as a means of unfairly forcing out minority shareholders. Delaware law provides that a parent corporation, by resolution of its board of directors and without any shareholder vote, may merge with any subsidiary of which it owns at least 90% of each class of capital stock. Upon that merger, dissenting stockholders of the subsidiary would have appraisal rights.

Shareholder's Suit. The rights of shareholders under Bermuda law are not as extensive as the rights of shareholders under legislation or judicial precedent in many United States jurisdictions. Class actions and derivative actions are available to shareholders under the laws of Bermuda only in limited circumstances. However, the Bermuda courts ordinarily would be expected to follow English case law precedent, which would permit a shareholder to commence an action in our name to remedy a wrong done to us where the act complained of is alleged to be beyond our corporate power or is illegal or would result in the violation of our Memorandum of Association or Bye-Laws. Furthermore, consideration would be given by the court to acts that are alleged to constitute a fraud against the minority shareholders or where an act requires the approval of a greater percentage of the our shareholders than actually approved it. The winning party in that action generally would be able to recover a portion of its attorneys' fees incurred in connection with the action. Our Bye-Laws provide that shareholders waive all claims or rights of action that they might have, individually or in our right, against any director or officer for any act or failure to act in the performance of that director's or officer's duties, except with respect to any fraud or dishonesty of that director or officer. Class actions and derivative actions are available to stockholders under Delaware law for, among other things, breach of fiduciary duty, corporate waste and actions not taken in accordance with applicable law. In these actions, the court has discretion to permit the winning party to recover attorneys' fees incurred in connection with the action.

Indemnification of Directors. We may indemnify our directors or officers in their capacity as such in respect of their loss or liability for any negligence, default, breach of duty or breach of trust to us other than for his or her own fraud or dishonesty. Under Delaware law, a corporation may indemnify a director or officer of the corporation against expenses, including attorneys' fees, judgments, fines and amounts paid in settlement actually and reasonably incurred in defense of an action, suit or proceeding by reason of such position if:

- the director or officer acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of the corporation, and
- with respect to any criminal action or proceeding, the director or officer had no reasonable cause to believe his or her conduct was unlawful.

Inspection of Corporate Records. Members of the general public have the right to inspect our public documents available at the office of the Registrar of Companies in Bermuda, which will include our Memorandum of Association, and any alteration to our Memorandum of Association and documents relating to any increase or reduction of our authorized capital. Our shareholders have the additional right to inspect our Bye-Laws, minutes of general meetings and audited financial statements, which must be presented to the annual general meeting of shareholders. The register of our shareholders is also open to inspection by shareholders without charge, and to members of the public for a fee. We are required to maintain our share register in Bermuda but may establish a branch register outside Bermuda. We are required to keep at our registered office a register of our directors and officers which is open for inspection by members of the public without charge. Bermuda law does not, however, provide a general right for shareholders to inspect or obtain copies of any other corporate records. Delaware law permits any shareholder to inspect or obtain copies of a

corporation's shareholder list and its other books and records for any purpose reasonably related to the person's interest as a shareholder.

TAXATION OF SHAREHOLDERS

BERMUDA TAX CONSIDERATIONS

In the opinion of Conyers, Dill & Pearman, our special Bermuda counsel, under current Bermuda law, no income, withholding or other taxes or stamp or other duties will be imposed upon the issue, transfer or sale of our common stock or on any payments on the common stock. Furthermore, we have obtained from the Minister of Finance of Bermuda under the Exempted Undertakings Tax Protection Act 1966, as amended, an undertaking that, in the event that Bermuda enacts any legislation imposing tax computed on profits, income, any capital asset, gain or appreciation, or any tax in the nature of estate duty or inheritance tax, then the imposition of such tax will not be applicable to us or to any of our operations, or our shares, capital or common stock, until March 28, 2016. The undertaking does not, however, prevent the imposition of property taxes on any company owning real property or leasehold interests in Bermuda.

UNITED STATES FEDERAL INCOME TAX CONSIDERATIONS

In the opinion of Fenwick & West LLP, our special United States federal income tax counsel, the following summarizes the material United States federal income tax considerations that apply to the ownership and disposition of our common stock by prospective United States Holders, as defined below, as of the date of this prospectus. This summary deals only with common stock that is held as a capital asset within the meaning of Section 1221 of the Internal Revenue Code by a United States Holder, and does not address tax considerations applicable to United States Holders that may be subject to special tax rules, such as dealers or traders in securities, financial institutions, insurance companies, tax-exempt entities, United States Holders subject to alternative minimum tax, United States Holders that hold common stock as part of a straddle, conversion transaction, constructive sale or other arrangement involving more than one position, United States Holders that have a principal place of business or tax home outside the United States or United States Holders whose functional currency is not the United States dollar. This summary does not address the tax consequences under state, local, estate, or other national, for example, non-United States, tax laws. In addition, the summary does not address the tax consequences to the United States Holders that own, or are deemed for United States federal income tax purposes to own, pursuant to complex attribution and constructive ownership rules, 10% or more of our voting stock or that of any of our non-United States subsidiaries. We refer to these persons as 10% Shareholders.

The discussion below is based upon United States federal income tax law and administrative practice as of the date of this prospectus; future legislation, regulations, administrative interpretations, or court decisions could change such laws either prospectively or retroactively, so as to result in United States federal income tax consequences different from those discussed below.

PROSPECTIVE INVESTORS SHOULD CONSULT THEIR OWN TAX ADVISORS AS TO THE TAX CONSEQUENCES OF AN INVESTMENT IN THE COMMON STOCK, INCLUDING THE APPLICATION TO THEIR PARTICULAR SITUATIONS OF THE TAX CONSIDERATIONS DISCUSSED BELOW, AS WELL AS THE APPLICATION OF STATE, LOCAL, ESTATE, FOREIGN OR OTHER FEDERAL TAX LAWS.

As used herein in this discussion, a United States Holder of common stock means a holder that is:

- a citizen or resident of the United States;
- a corporation, partnership or other entity created or organized in or under the laws of the United States or any political subdivision thereof;

- an estate the income of which is subject to United States federal income taxation regardless of its source; or
- a trust which is subject to the supervision of a court within the United States and the control of a United States person as described in Section 7701(a)(30) of the Internal Revenue Code.

TAXATION OF DISTRIBUTIONS

Subject to the passive foreign investment company, or PFIC, rules described below, to the extent paid out of current or accumulated earnings and profits, as determined under United States federal income tax principles, a distribution made with respect to our common stock will be includible for United States federal income tax purposes in the gross income of a United States Holder as ordinary income. These dividends will not be eligible for the dividends received deduction allowed to corporations under Section 243 of the Internal Revenue Code. To the extent that the amount of any distribution exceeds our earnings and profits, the distribution will first be treated as a tax-free return of capital to the extent of the United States Holder's adjusted tax basis in the common stock, and thereafter as capital gain. We do not anticipate paying cash dividends in the foreseeable future. See "Dividend Policy". For so long as we are a "United States-owned foreign corporation," distributions with respect to our common stock that are taxable as dividends may be treated for United States foreign tax credit purposes as either (1) foreign source "passive income," or foreign source "financial services income," or (2) United States source income, in proportion to our earnings and profits in the year of such distribution allocable to United States sources. For this purpose, we will be treated as a United States-owned foreign corporation so long as stock representing 50% or more of our voting power or value is owned, directly or indirectly, by United States Holders.

TAXATION OF CAPITAL GAINS

Subject to the PFIC rules described below, for United States federal income tax purposes, a United States Holder will recognize gain or loss on any sale or other disposition of common stock in an amount equal to the difference between the amount realized for the common stock and the United States Holder's adjusted tax basis in the common stock. The gain or loss will be capital gain or loss. Capital gain of individuals derived with respect to capital assets held for more than one year is eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations. Except in limited circumstances, any gain or loss recognized by a United States Holder will be treated as United States source.

PASSIVE FOREIGN INVESTMENT COMPANY (PFIC)

We believe that we are not a PFIC and do not expect to become a PFIC in the future for United States federal income tax purposes, although there can be no assurance in this regard. Our conclusion is a factual determination made annually and thus is subject to change.

We will be classified as a PFIC with respect to a United States Holder if, for any taxable year in which the United States Holder held common stock, either:

- at least 75% of our gross income for the taxable year is passive income; or
- at least 50% of the average percentage of our assets by value produce or are held for the production of passive income.

For this purpose, passive income includes dividends, interest, royalties, rents, other than rents and royalties derived in the active conduct of a trade or business, annuities and gains from assets that produce passive income other than sales of inventory. Certain exceptions may apply. If we own, directly or indirectly, at least 25% by value of the stock of another corporation, we will be treated for purposes of the PFIC tests as owning our proportionate share of the assets of the other corporation, and as receiving directly our proportionate

share of the other corporation's income. If we are classified as a PFIC in any year with respect to which a United States person is a shareholder, we will continue

to be treated as a PFIC with respect to such shareholder in all succeeding years, regardless of whether we continue to meet the income or asset test described above, subject to possible shareholder elections that may apply.

If we were to be classified as a PFIC, the United States federal income tax consequences to a United States Holder with respect to our common stock would change significantly from the consequences presented in this discussion. For example, special rules would apply to direct and defined classes of indirect United States Holders upon disposition of the common stock, receipt of an excess distribution, as defined in Section 1291(b) of the Internal Revenue Code, specified nonrecognition transactions, or use of our common stock as security for a loan. Those United States Holders could be subject to tax as if the gain or distribution were ordinary income earned ratably over the holding period for the common stock, including an interest charge on the deferred tax, and other adverse tax consequences. Alternatively, a United States Holder of stock in a PFIC that is treated as marketable stock may make a mark-to-market election. If a United States Holder were to make a timely filed mark-to-market election with respect to our common stock owned, or treated as owned, at the close of the United States Holder's taxable year, the United States Holder would include as ordinary income in that taxable year any excess of the fair market value of the United States Holder's common stock as of the close of such year over its adjusted basis. The United States Holder would be allowed a deduction for such taxable year in the amount of any excess of the adjusted basis of the United States Holder's common stock over its fair market value at the close of the taxable year, limited to the amount of the net mark-to-market gains previously included by the United States Holder in income. The electing United States Holder's basis in the stock would be adjusted to reflect any such income or loss amounts. Any gain or loss on the sale of the common stock would be ordinary income or loss, except that any loss will be ordinary loss only to the extent of the previously included net mark-to-market gain. If the United States Holder were to make a timely qualified electing fund election, the rules described above would not apply. If a qualified electing fund election were made, the United States Holder would be currently taxable on the United States Holder's pro rata share of our ordinary earnings and profits and net capital gains, regardless of whether or not distributions were received. The United States Holder's basis in the common stock would be increased to reflect taxed but undistributed income. Distributions of income that had previously been taxed would result in a corresponding reduction of basis in the common stock and would not be taxed again as a distribution to the United States Holder. If we are treated as a PFIC, we intend to notify United States Holders and to provide to United States Holders such information as may be required to make a qualified electing fund election effective.

A United States Holder who owns our common stock during any year that we are a PFIC must file IRS Form 8621. United States Holders should consult their tax advisors concerning the United States federal income tax consequences of holding our common stock if we are a PFIC, including the advisability and availability of making any of the foregoing elections.

FOREIGN PERSONAL HOLDING COMPANY

A foreign corporation is a foreign personal holding company if at least 60% of its gross income for the taxable year is foreign personal holding company income, and if at any time during the taxable year more than 50% of the stock by vote or by value is owned, directly or indirectly, by or for not more than five individuals who are citizens or residents of the United States. We refer to such individuals as a United States Group. In some situations, the minimum percentage of foreign personal holding company income is 50%, rather than 60%. Foreign personal holding company income includes specific defined classes of passive income. Foreign personal holding companies are defined to exclude a number of specific classes of foreign corporations. If we or one of our non-United States subsidiaries were classified as a foreign personal holding company, then United States Holders including defined classes of indirect holders who owned common stock on the last day of the taxable year when the United States Group existed, would be taxed upon their pro rata shares of the undistributed foreign personal holding company income of Marvell or our non-United States

subsidiaries. Information statements would be required on the returns of such United States Holders who owned 5% or more of the value of the stock on the last day on which the United States Group existed. If we or one of our non-United States subsidiaries were a foreign personal holding company and the United States Holders described above were required to include a dividend amount in their United States federal taxable income, adjustments would need to be made to our or our non-United States subsidiary's accumulated earnings and profits and paid in surplus, and to such United States Holders' respective bases in their common stock. In addition, United States Holders who acquire their common stock from decedents would not receive a stepped-up basis in that common stock. Instead, those United States Holders would have a tax basis equal to the lower of the fair market value of that common stock or the decedent's basis. We have no basis to believe at this time that the shareholder test will be met for any taxable year beginning after the offering. We intend to manage our affairs so as to minimize having income imputed to our United States Holders under these rules, to the extent such management of our affairs in this manner is consistent with our business goals, although there can be no assurance in this regard.

PERSONAL HOLDING COMPANY

A corporation classified as a personal holding company is subject to a 39.6% tax on its undistributed personal holding company income. Foreign corporations determine their liability for personal holding company tax by considering only (1) gross income derived from United States sources and (2) gross income that is effectively connected with a United States trade or business. A corporation will be classified as a personal holding company if (1) at any time during the last half of the corporation's taxable year, five or fewer individuals own more than 50% of the corporation's stock, by value, directly or indirectly and (2) the corporation receives at least 60% of its adjusted ordinary gross income from passive sources. However, if a corporation is a foreign personal holding company or a PFIC, it cannot be a personal holding company. We have no basis to believe at this time that we could meet the personal holding company shareholder test in a given taxable year beginning after the offering. We intend to manage our affairs so as to attempt to avoid or minimize the imposition of the personal holding company tax, to the extent management of our affairs in this manner is consistent with our business goals, although there can be no assurance in this regard.

CONTROLLED FOREIGN CORPORATIONS

If 10% Shareholders own, in the aggregate, more than 50%, measured by voting power or value, of our shares or any of our non-United States corporate subsidiaries, directly, indirectly, or by attribution, we or any such non-United States subsidiary would be a controlled foreign corporation. If characterized as controlled foreign corporations, then a portion of our undistributed income and that of our non-United States subsidiaries may be includible in the taxable income of 10% Shareholders of those entities. If a 10% Shareholder has reported inclusions in income from a controlled foreign corporation, the 10% Shareholder may not have to include previously taxed amounts in income again upon distribution. We and our non-United States subsidiaries may be controlled foreign corporations or may become controlled foreign corporations in the future. If we or one of our non-United States subsidiaries is or becomes a controlled foreign corporation, the United States federal income tax consequences to a United States Holder who is a 10% Shareholder of owning or disposing of shares in such corporations change significantly from the consequences presented in this section.

TAXATION OF NON-UNITED STATES HOLDERS

For United States federal income tax purposes, a non-United States Holder generally will not be subject to tax or withholding on distributions made with respect to, and gains realized from the disposition of, our common stock unless such distributions and gains are effectively connected with the holder's conduct of a trade or business in the United States, or, in the case of gains, if the holder is an individual, the holder is present in the United States for 183 days in the taxable year of the sale and other conditions exist.

INFORMATION REPORTING AND BACKUP WITHHOLDING

United States Holders. In general, information reporting requirements will apply to dividends in respect of our common stock or the proceeds received on the sale, exchange, or redemption of the common stock paid within the United States, and in some cases, outside of the United States, to United States Holders other than exempt recipients, such as corporations, and a 31% backup withholding may apply to those amounts if the United States Holder fails to provide an accurate taxpayer identification number or to report dividends required to be shown on its United States federal income tax returns. The amount of any backup withholding from a payment to a United States Holder will be allowable as a credit against the United States Holder's United States federal income tax liability, provided that the required information or appropriate claim for refund is furnished to the IRS.

Non-United States Holders. Under current law, United States information reporting requirements and backup withholding will not apply to dividends paid to a non-United States Holder at an address outside the United States unless the payer has knowledge that the payee is a United States person. However, under recently finalized United States Treasury regulations effective for payments made after December 31, 2000, a non-United States Holder will be subject to backup withholding unless applicable certification requirements are met.

As a general matter, information reporting and backup withholding will not apply to a payment of the proceeds of a sale of our common stock effected outside the United States by a foreign office for a non-United States Holder. However, payment of the proceeds of a sale of our common stock through a United States office of a broker is subject to both backup withholding and information reporting unless the beneficial owner certifies under penalties of perjury that it is a non-United States Holder and the payer does not have actual knowledge that the beneficial owner is a United States person or the holder otherwise establishes an exemption.

The amount of any backup withholding from a payment to a non-United States Holder will be allowable as a credit against such non-United States Holder's United States federal income tax liability, provided that the required information or appropriate claim for refund is furnished to the IRS.

Holders should consult their tax advisors regarding the application of information reporting and backup withholding to their particular situations, the availability of an exemption from reporting and withholding requirements, and the procedure for obtaining an exemption, if available.

SHARES ELIGIBLE FOR FUTURE SALE

The sale of a substantial amount of our common stock, including shares issued upon exercise of outstanding options and warrants, in the public market after this offering could adversely affect the prevailing market price of our common stock.

Upon completion of this offering, we will have outstanding an aggregate of 82,211,425 shares of our common stock, based on shares of common stock outstanding as of April 30, 2000. Of these shares, all of the 6,000,000 shares of our common stock sold in this offering will be freely tradable without restriction or further registration under the Securities Act, unless the shares are purchased by "affiliates" as that term is defined in Rule 144 under the Securities Act. Any shares purchased by an affiliate may not be resold except pursuant to an effective registration statement or an applicable exemption from registration, including an exemption under Rule 144 of the Securities Act. The remaining 76,211,425 shares of common stock held by existing shareholders are "restricted securities" as that term is defined in Rule 144 under the Securities Act. These restricted securities may be sold in the public market only if they are registered or if they qualify for an exemption from registration under Rule 144 or Rule 701 under the Securities Act. These rules are summarized below. Of the remaining shares of common stock that constitute restricted securities, shares held by existing shareholders are subject to contractual restrictions on resale as described more fully under the heading "Underwriting."

Upon the expiration or waiver of the contractual restrictions on resale described under the heading "Underwriting" and subject to the provisions of Rule 144 and Rule 701, restricted shares of common stock, assuming the exercise of outstanding warrants and vested stock options, will be available for sale in the public market 180 days after the date of this prospectus. The sale of these restricted securities is subject, in the case of shares held by affiliates, to the volume restrictions contained in Rule 144.

RULE 144

In general, under Rule 144 as currently in effect, beginning 90 days after the date of this prospectus, a person who has beneficially owned shares of our common stock for at least one year from the later of the date those shares of common stock were acquired from us or from an affiliate of ours would be entitled to sell within any three-month period a number of shares that does not exceed the greater of:

(1) one percent of the number of shares of common stock then outstanding, which will equal approximately 822,000 shares immediately after this offering; or

(2) the average weekly trading volume of the common stock on the Nasdaq National Market during the four calendar weeks preceding the filing of a notice on Form 144 with respect to the sale of any shares of common stock.

The sales of any shares of common stock under Rule 144 are also subject to manner of sale provisions and notice requirements and to the availability of current public information about us. Affiliates may sell shares not constituting restricted securities in accordance with the foregoing volume limitations and other restrictions, but without regard to the one-year holding period.

RULE 144(k)

In addition, under Rule 144(k), a person who is not one of our affiliates at any time during the three months preceding a sale, and who has beneficially owned the shares proposed to be sold for at least two years from the later of the date such shares of common stock were acquired from us or from an affiliate of ours is entitled to sell those shares without complying with the manner of sale, public information, volume limitation or notice provisions of Rule 144. Therefore, unless otherwise restricted pursuant to the lock-up agreements or otherwise, those shares may be sold immediately upon the completion of this offering.

RULE 701

Each of our employees, consultants or advisors who purchased shares from us in connection with a compensatory stock plan or other written agreement under Rule 701 of the Securities Act is eligible to resell those shares 90 days after the effective date of this offering in reliance on Rule 144, but without compliance with some of the restrictions, including the holding period, contained in Rule 144.

REGISTRATION RIGHTS

Immediately after the completion of this offering, in accordance with an Investor Rights Agreement dated September 10, 1999, shareholders and warrant holders beneficially owning 27,044,912 shares of our common stock will have rights with respect to the registration of their shares under the Securities Act. Under the terms of the agreement, if we propose to register any of our securities under the Securities Act, either for our own account or for the account of other security holders exercising registration rights, such holders are entitled to notice of such registration and are entitled to include their common stock in the registration. Six months following the effective date of this offering, these shareholders may also require us to file a registration statement under the Securities Act at our expense with respect to their shares of common stock, and we are required to use our best efforts to effect such registration. These shareholders have the right to request up to two such registration statements. Further, such shareholders may require us to file additional registration statements on Form S-3 or its equivalent at our expense. Each of these rights are subject to conditions and limitations, including the right of the underwriters of an offering to limit the number of shares included in such offering under various circumstances.

STOCK OPTIONS

At April 30, 2000, options to purchase 11,492,809 shares of our common stock were outstanding under our stock option plans and otherwise. Shortly after the effective date of this offering, we expect to file a registration statement under the Securities Act covering _____ shares of common stock reserved for issuance under our stock option plans. Upon the filing of the registration statement relating to the reserved shares of common stock and upon expiration of the 180-day lockup agreements, approximately _____ shares of common stock issuable upon exercise of stock options will be immediately eligible for sale in the public market, subject to Rule 144 volume limitations applicable to our affiliates.

UNDERWRITING

Marvell and the underwriters named below have entered into an underwriting agreement with respect to the shares being offered. Subject to certain conditions, each underwriter has severally agreed to purchase the number of shares indicated in the following table. Goldman, Sachs & Co., J. P. Morgan Securities Inc. and FleetBoston Robertson Stephens Inc. are the representatives of the underwriters.

Underwriters -----	Number of Shares -----
Goldman, Sachs & Co.	
J.P. Morgan Securities Inc.	
FleetBoston Robertson Stephens Inc.	

Total.....	6,000,000
	=====

If the underwriters sell more shares than the total number set forth in the table above, the underwriters have an option to buy up to an additional 900,000 shares from Marvell to cover such sales. They may exercise that option for 30 days. If any shares are purchased pursuant to this option, the underwriters will severally purchase shares in approximately the same proportion as set forth in the table above.

The following table shows the per share and total underwriting discounts and commissions to be paid to the underwriters by Marvell. Such amounts are shown assuming both no exercise and full exercise of the underwriters' option to purchase 900,000 additional shares.

Paid by Marvell

	No Exercise -----	Full Exercise -----
Per Share.....	\$	\$
Total.....	\$	\$

Shares sold by the underwriters to the public will initially be offered at the initial public offering price set forth on the cover of this Prospectus. Any shares sold by the underwriters to securities dealers may be sold at a discount of up to \$ per share from the initial public offering price. Any such securities dealers may resell any shares purchased from the underwriters to certain other brokers or dealers at a discount of up to \$ per share from the initial public offering price. If all the shares are not sold at the initial public offering price, the representatives may change the offering price and the other selling terms.

Marvell, its directors, officers, employees, and shareholders have agreed with the underwriters not to dispose of or hedge any of their common stock or securities convertible into or exchangeable for shares of the common stock during the period from the date of this prospectus continuing through the date 180 days after the date of this prospectus, except with the prior written consent of Goldman, Sachs & Co. The agreement does not apply to any existing employee benefit plans. See "Shares Eligible for Future Sale" for a discussion of certain transfer restrictions.

Prior to the offering, there has been no public market for the shares. The initial public offering price will be negotiated among Marvell and the representatives. Among the factors to be considered in determining the initial public offering price of the shares, in addition to prevailing market conditions, will be Marvell's historical performance, estimates of the business potential and earnings prospects of Marvell, an assessment of Marvell's management and the consideration of the above factors in relation to market valuation of companies in related businesses.

Marvell has applied for quotation of the common stock on the Nasdaq National Market under the symbol "MRVL".

At Marvell's request, the underwriters have reserved up to 420,000 shares of common stock for sale at the initial public offering price to persons with preexisting strategic or other relationships with Marvell through a directed share program. The number of shares of common stock available for sale to the general public will be reduced to the extent that these persons purchase these reserved shares. Any shares not so purchased will be offered by the underwriters to the general public on the same basis as the other shares offered hereby.

In connection with the offering, the underwriters may purchase and sell shares of common stock in the open market. These transactions may include short sales, stabilizing transactions and purchases to cover positions created by short sales. Short sales involve the sale by the underwriters of a greater number of shares than they are required to purchase in this offering. Stabilizing transactions consist of certain bids or purchases made for the purpose of preventing or retarding a decline in the market price of the common stock while the offering is in progress.

The underwriters also may impose a penalty bid. This occurs when a particular underwriter repays to the underwriters a portion of the underwriting discount received by it because the representatives have repurchased shares sold by or for the account of such underwriter in stabilizing or short covering transactions.

These activities by the underwriters may stabilize, maintain or otherwise affect the market price of the common stock. As a result, the price of the common stock may be higher than the price that otherwise might exist in the open market. If these activities are commenced, they may be discontinued by the underwriters at any time. These transactions may be effected on the Nasdaq National Market, in the over-the-counter market or otherwise.

A prospectus in electronic format may be made available on the web sites maintained by one or more underwriters. The underwriters may agree to allocate a number of shares to underwriters for sale to their online brokerage account holders. Internet distributions will be allocated by the lead managers to underwriters that may make Internet distributions on the same basis as other allocations.

The underwriters do not expect sales to discretionary accounts to exceed five percent of the total number of shares offered.

Marvell estimates that its share of the total expenses of the offering, excluding underwriting discounts and commissions, will be approximately \$1,525,000.

Marvell has agreed to indemnify the several underwriters against certain liabilities, including liabilities under the Securities Act.

VALIDITY OF COMMON STOCK

Conyers, Dill & Pearson, Bermuda, will pass upon the validity of the issuance of the shares of common stock offered by this prospectus for us. Appleby, Spurling & Kempe, Bermuda, will pass upon the validity of the issuance of the shares of common stock for the underwriters. Certain legal matters in connection with this offering will be passed for us by Gibson, Dunn & Crutcher LLP, San Francisco, California. The underwriters are being represented as to U.S. legal matters by Sullivan & Cromwell, Los Angeles, California.

EXPERTS

The financial statements as of January 31, 2000 and 1999 and for each of the three years in the period ended January 31, 2000 included in this prospectus have been so included in reliance on the report of PricewaterhouseCoopers LLP, independent accountants, given on the authority of said firm as experts in auditing and accounting.

ADDITIONAL INFORMATION

We have filed with the Securities and Exchange Commission a registration statement on Form S-1, including exhibits and schedules, under the Securities Act with respect to the common stock to be sold in this offering. This prospectus, which constitutes a part of the registration statement, does not contain all of the information set forth in the registration statement or the exhibits and schedules that are part of the registration statement. Any statements made in this prospectus as to the contents of any contract, agreement or other document are not necessarily complete. With respect to each such contract, agreement or other document filed as an exhibit to the registration statement, we refer you to the exhibit for a more complete description of the matter involved, and each statement in this prospectus shall be deemed qualified in its entirety by this reference. You may read and copy all or any portion of the registration statement or any reports, statements or other information in the files at the following public reference facilities of the SEC:

Washington, D.C.	New York, New York	Chicago, Illinois
Room 1024	Seven World Trade Center	500 West Madison Street
450 Fifth Street, N.W.	Suite 1300	Suite 1400
Washington, D.C., 20549	New York, New York 10048	Chicago, Illinois 60661

You can request copies of these documents upon payment of a duplicating fee by writing to the SEC. You may call the SEC at 1-800-SEC-0330 for further information on the operation of its public reference rooms. Our filings, including the registration statement, will also be available to you on the Internet web site maintained by the SEC at <http://www.sec.gov>.

We intend to furnish our shareholders with annual reports containing financial statements audited by our independent auditors, and make available to our shareholders quarterly reports for the first three quarters of each year containing unaudited interim financial statements.

REPORT OF INDEPENDENT ACCOUNTANTS

To the Board of Directors and Shareholders of
Marvell Technology Group Ltd.

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, of shareholders' equity and of cash flows present fairly, in all material respects, the financial position of Marvell Technology Group Ltd. and its subsidiaries as of January 31, 1999 and 2000, and the results of its operations and its cash flows for the three years in the period ended January 31, 2000, in conformity with accounting principles generally accepted in the United States. These consolidated financial statements are the responsibility of the Company's management; our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States which require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for the opinion expressed above.

MARVELL TECHNOLOGY GROUP LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 -- THE COMPANY AND ITS SIGNIFICANT ACCOUNTING POLICIES:

THE COMPANY

Marvell Technology Group Ltd., (the "Company"), a Bermuda exempted company, was incorporated on January 11, 1995. The Company engages in the design, development and sale of integrated circuits utilizing proprietary mixed signal and digital signal processing technology for the high-speed, high-density data storage and broadband data communications markets.

BASIS OF PRESENTATION

During fiscal 2000, the Company changed its fiscal year to the Saturday nearest January 31. In fiscal 1999 and 1998, the year ended on January 31. All years have been restated to reflect the current presentation. For presentation purposes, the consolidated financial statements and notes refer to January 31 as year end.

USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates, and such differences could affect the results of operations reporting in future periods.

PRINCIPLES OF CONSOLIDATION

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. The functional currency is the United States dollar.

FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties. The carrying amounts for cash and cash equivalents, accounts receivable, prepaid expenses and other current assets, accounts payable, accrued liabilities and accrued employee compensation approximate their respective fair values because of the short term maturity of these items. The carrying value of the Company's debt approximates fair market value because of prevailing interest rates.

CASH EQUIVALENTS

The Company considers all highly liquid investments with a maturity of three months or less from the date of purchase to be cash equivalents. Cash and cash equivalents consist of cash on deposit with banks, money market funds and commercial deposits, the fair value of which approximates cost. At January 31, 1999 and 2000, approximately \$704,000 and \$14,792,000 of money market funds are included in cash and cash equivalents, respectively.

CONCENTRATION OF CREDIT RISK AND SIGNIFICANT CUSTOMERS

Financial instruments that potentially subject the Company to significant concentrations of credit risk consist principally of cash equivalents and accounts receivable. The Company places its cash primarily in checking and money market accounts. Cash equivalents are maintained with high quality

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

institutions, the composition and maturities of which are regularly monitored by management. The Company believes that the concentration of credit risk in its trade receivables with respect to the data storage industry, as well as the limited customer base, located primarily in the Far East, is substantially mitigated by the Company's credit evaluation process, relatively short collection terms and the high level of credit worthiness of its customers. The Company performs ongoing credit evaluations of its customers' financial condition and limits the amount of credit extended when deemed necessary but generally requires no collateral.

The following table sets forth sales to customers comprising 10% or more of the Company's total revenue for the periods indicated:

CUSTOMER -----	YEARS ENDED JANUARY 31, -----		
	1998 ----	1999 ----	2000 ----
A.....	--	46%	36%
B.....	21%	43%	24%
C.....	--	7%	14%
D.....	--	2%	14%
E.....	--	1%	10%
F.....	26%	--	--
G.....	25%	--	--
H.....	16%	--	--

The Company's accounts receivable were concentrated with three customers at January 31, 1999 (representing 51%, 29% and 10% of aggregate gross receivables) and four customers at January 31, 2000 (representing 48%, 16%, 15% and 14% of aggregate gross receivables).

INVENTORY

Inventory is stated at the lower of cost or market, cost being determined under the first-in, first-out method. Appropriate consideration is given to obsolescence, excessive levels, deterioration and other factors in evaluating net realizable value.

PROPERTY AND EQUIPMENT

Property and equipment including capital leases and leasehold improvements are stated at cost less accumulated depreciation or amortization. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, which ranges from three to four years. Assets held under capital leases and leasehold improvements are amortized over the term of the lease or their estimated useful lives, whichever is shorter.

Long-lived assets held and used by the Company are reviewed for impairment whenever events or changes in circumstances indicate that their net book value may not be recoverable. An impairment loss is recognized if the sum of the expected future cash flows (undiscounted and before interest) from the use of the asset is less than the net book value of the asset. The amount of the impairment loss will generally be measured as the difference between net book values of the assets and their estimated fair values. The Company believes that no long-lived assets were impaired at January 31, 1999 and 2000.

REVENUE RECOGNITION

Revenue from the sale of integrated circuits is recognized upon shipment, net of accruals for estimated sales returns and allowances. Revenue generated by sales to distributors under agreements

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

allowing certain rights of return are deferred for financial reporting purposes until the products are sold by distributors. Net revenue for the year ended January 31, 1998 includes approximately \$197,000 derived from a research and development contract, which was recognized on the percentage of completion basis. The associated costs are included in research and development expenses.

RESEARCH AND DEVELOPMENT

Research and development costs are expensed as incurred.

STOCK-BASED COMPENSATION

The Company's employee stock option plan is accounted for in accordance with Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" and complies with the disclosure provisions of Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" ("SFAS 123"). Expense associated with stock-based compensation is amortized on an accelerated basis over the vesting period of the individual award consistent with the method described in Financial Accounting Standards Board Interpretation No. 28, ("FIN 28"). Application of FIN 28 results in amortization of approximately 46% of the compensation in the first 12 months of vesting, 26% of the compensation in the second 12 months of vesting, 15% of the compensation in the third 12 months of vesting, 9% of the compensation in the fourth 12 months of vesting and 4% of the compensation in the fifth 12 months of vesting. The Company accounts for stock issued to non-employees in accordance with the provisions of SFAS 123 and Emerging Issues Task Force Consensus No. 96-18, "Accounting for Equity Instruments that are Offered to Other Than Employees for Acquiring of in Conjunction with Selling Goods or Services" ("EITF 96-18"). Under SFAS 123 and EITF 96-18, stock option awards issued to non-employees are accounted for at their fair value using the Black-Scholes method. The fair value of each non-employee stock awarded is remeasured at each period end until a commitment date is reached, which is generally the vesting date.

COMPREHENSIVE INCOME (LOSS)

The Company adopted Statement of Financial Accounting Standards No. 130 "Reporting Comprehensive Income" ("SFAS 130"). SFAS 130 establishes standards for reporting and displaying comprehensive income and its components in a full set of general-purpose financial statements. There was no difference between the Company's net income or loss and its total comprehensive net income or loss for the years ended January 31, 1998, 1999 and 2000.

NET INCOME (LOSS) PER SHARE

The Company reports both basic net income (loss) per share, which is based upon the weighted average number of common shares outstanding excluding contingently issuable or returnable shares, and diluted net income (loss) per share, which is based on the weighted average number of common shares outstanding and dilutive potential common shares outstanding.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

The following table sets forth the computation of basic and diluted net income (loss) per share of common stock (in thousands, except per share amounts):

	YEARS ENDED JANUARY 31,		
	1998	1999	2000
Numerator:			
Net income (loss).....	\$(7,444)	\$ (959)	\$13,070
	=====	=====	=====
Denominator:			
Basic --			
Weighted-average shares of common stock outstanding....	38,683	40,459	46,428
Less: unvested common shares subject to repurchase.....	(8,247)	(7,989)	(5,334)
	-----	-----	-----

Mandatorily redeemable convertible preferred stock warrants.....	--	--	273
Common stock warrants.....	--	--	20
Stock options.....	--	--	9,761
	-----	-----	-----
Denominator for diluted calculation.....	30,436	32,470	81,545
	=====	=====	=====
Basic net income (loss) per share.....	\$ (0.24)	\$ (0.03)	\$ 0.32
	=====	=====	=====
Diluted net income (loss) per share.....	\$ (0.24)	\$ (0.03)	\$ 0.16
	=====	=====	=====

The following table sets forth potential shares of common stock, assuming conversion of preferred stock and preferred stock warrants that are not included in the diluted net loss per share calculation above because to do so would be anti-dilutive for the periods presented (in thousands):

	JANUARY 31,	
	1998	1999
Unvested common stock subject to repurchase.....	8,247	7,989
Mandatorily Redeemable Convertible preferred stock.....	19,352	23,522
Mandatorily Redeemable Convertible preferred stock warrants.....	2,192	2,440
Stock options.....	12,738	12,896

PRO FORMA NET INCOME PER SHARE (UNAUDITED)

Pro forma net income per share for the year ended January 31, 2000 is computed using the weighted average number of common shares outstanding, including the conversion of the Company's Series A, Series B, Series C, Series D and Series E mandatorily redeemable convertible preferred stock outstanding into shares of the Company's common stock effective upon the closing of the Company's initial public offering ("IPO") as if such conversion occurred on February 1, 1999 or at the date of original issuance, if later. The calculation of pro forma diluted net income per share includes incremental common shares issuable upon the exercise of stock options and common and preferred stock warrants.

PRO FORMA SHAREHOLDERS' EQUITY (UNAUDITED)

Effective upon the closing of the IPO, the outstanding Series A, Series B, Series C, Series D and Series E preferred stock will automatically convert into an aggregate of 26,439,500 shares of common

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

stock. The pro forma effect of this transaction is unaudited and has been reflected in the accompanying pro forma shareholders' equity as of January 31, 2000.

RECENT ACCOUNTING PRONOUNCEMENTS

In June 1998, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 133 ("SFAS 133"), "Accounting for Derivative Instruments and Hedging Activities," as amended by Statement of Financial Accounting Standards No. 137, "Accounting for Derivative Instruments and Hedging Activities -- Deferral of the Effective Date of FASB Statement No. 133- an amendment of FASB Statement No. 133" ("SFAS 137"). SFAS 133 requires that all derivative instruments be recorded on the balance sheet at their fair market value. Changes in the fair market value of derivatives are recorded each period in current earnings or comprehensive income, depending on whether a derivative is designed as part of a hedge transaction, and if so, the type of hedge transaction. Substantially all of the Company's revenues and the majority of its costs are denominated in U.S. dollars, and to date the Company has not entered into any derivative contracts. The Company does not expect that the adoption of SFAS 133 will have a material effect on its financial statements. The effective date of SFAS 133 as amended by SFAS 137 is for fiscal quarters of fiscal years beginning after June 15, 2000.

In December 1999, the Securities and Exchange Commission staff released Staff Accounting Bulletin ("SAB") No. 101, "Revenue Recognition in Financial Statements," which provides guidance on the recognition, presentation and disclosure of revenue in financial statements. The application of SAB No. 101 did not have a material impact on the Company's financial statements.

NOTE 2 -- BALANCE SHEET DETAILS (IN THOUSANDS):

	JANUARY 31,	
	1999	2000
INVENTORY:		
Work-in-process.....	\$ 2,315	\$ 4,830
	=====	=====
PROPERTY AND EQUIPMENT:		
Machinery and equipment.....	\$ 1,589	\$ 3,890
Computer software.....	1,285	3,981
Furniture and fixtures.....	203	1,633
Leasehold improvements.....	130	685
	-----	-----
	3,207	10,189
Less: Accumulated depreciation and amortization.....	(1,126)	(2,776)
	-----	-----
	\$ 2,081	\$ 7,413
	=====	=====

Machinery and equipment include \$144 and \$320 of assets under capital leases at January 31, 1999 and 2000, respectively. Accumulated depreciation for such equipment was \$53 and \$124 at January 31, 1999 and 2000, respectively.

NOTE 3 -- LINE OF CREDIT AND NOTES PAYABLE TO BANK:

In May 1998 (and amended in July 1999), the Company entered into a loan and security agreement with a bank which provides for borrowings of up to \$8,000,000 in the form of line of credit advances based on eligible accounts receivable and inventory, as defined, and \$3,100,000 available in the form of equipment advances. The agreement expires on April 30, 2000. Borrowings accrue interest at the bank's prime rate plus 0.125%, which equaled 8.625% at January 31, 2000, and are

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

secured by the tangible assets of the Company. In fiscal 1999 and 2000, the Company borrowed a total of approximately \$3,600,000 under this agreement, which was fully repaid in fiscal 2000.

At January 31, 2000, no amounts were outstanding, and \$8,000,000 was available, under the line of credit and equipment advance. The agreement requires the Company to comply with certain covenants and maintain certain financial ratios. The agreement prohibits the payment of cash dividends without prior bank approval.

NOTE 4 -- MANDATORILY REDEEMABLE CONVERTIBLE PREFERRED STOCK:

Mandatorily redeemable convertible preferred stock at January 31, 2000 consisted of the following (in thousands):

	SHARES		PROCEEDS	
	AUTHORIZED	OUTSTANDING	NET OF ISSUANCE COSTS	LIQUIDATION AMOUNT
Series A.....	525	525	\$ 350	\$ 350
Series B.....	1,119	1,119	1,199	1,231
Series C.....	2,184	2,090	7,098	7,316
Series D.....	3,750	2,526	10,206	10,945
Series E.....	422	350	3,500	3,500
	-----	-----	-----	-----
	8,000	6,610	\$22,353	\$23,342
	=====	=====	=====	=====

The rights with respect to Series A, Series B, Series C, Series D and Series E are as follows:

VOTING

Each share of the Series A, Series B, Series C, Series D and Series E has voting rights equal to that of common stock on an as if converted basis. The holders of a majority of the outstanding shares of Series B and Series C, respectively, voting as a class individually, shall be entitled to elect one member of the Board of Directors each.

DIVIDENDS

Each holder of outstanding Series A, Series B, Series C, Series D and Series E are entitled to receive noncumulative dividends as declared by the Board of Directors at a rate of \$0.0468, \$0.0772, \$0.2452, \$0.3032 and \$0.70 per share, respectively, subject to anti-dilution. No dividends have been declared from inception through January 31, 2000.

LIQUIDATION

In the event of any liquidation, dissolution, winding up, or merger where less than 50% of the voting power is maintained by existing shareholders of the Company, the Series A, Series B, Series C, Series D and Series E shareholders are entitled to receive prior and in preference to any distribution to the holders of common stock, an amount per share equal to \$0.67, \$1.10, \$3.50, \$4.33 and \$10.00, respectively, plus any declared but unpaid dividends. The remaining assets shall be distributed pro rata to the holders of Series A, Series B, Series C, Series D and Series E based on the number of shares held. However, such incremental distribution is limited to an amount equal to \$1.67, \$2.75, \$8.75, \$10.83 and \$25.00 per share of Series A, Series B, Series C, Series D and Series E, respectively. All remaining assets shall be distributed pro rata to the holders of common stock.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

CONVERSION

Each Series A, Series B, Series C, Series D and Series E share is convertible into four shares of common stock at the option of the holder, subject to adjustments for stock dividends, stock splits, combination of common stock, consolidations of common stock and the issuance of new common stock. Each share of Series A, Series B, Series C, Series D and Series E will be automatically converted upon (i) an initial public offering of the Company at not less than \$3.25 per share with aggregate proceeds greater than \$10,000,000, or (ii) the written consent of the respective shareholders of Series A, Series B, Series C, Series D and Series E of greater than fifty percent of the outstanding shares of Series A, Series B, Series C, Series D and Series E.

At January 31, 2000, the Company has reserved 32,000,000 shares of common stock for issuance upon conversion of the mandatorily redeemable convertible preferred stock.

The following is a summary of activity in mandatorily redeemable convertible preferred stock (in thousands):

	SHARES	TOTAL AMOUNT
	-----	-----
Balance at January 31, 1997.....	3,357	\$ 7,176
Issuance of Series D Mandatorily Redeemable Convertible Preferred Stock.....	1,481	6,289
	-----	-----
Balance at January 31, 1998.....	4,838	13,465

	-----	-----
Balance at January 31, 2000.....	6,610	\$22,353
	=====	=====

NOTE 5 -- PREFERRED AND COMMON STOCK WARRANTS:

At January 31, 2000, the Company has reserved 136,353 and 60,000 shares of Preferred Stock and Common Stock, respectively, for the issuance of shares upon the exercise of warrants.

In connection with the issuance of Series C, the Company issued warrants to purchase 471,428 shares of Series C at \$3.50 per share. Warrants to purchase 377,142 shares of Series C were exercised in April and May 2000, and 94,286 warrants expired during fiscal 2000.

During fiscal 1998, in connection with the issuance of Series D, the Company received bridge financing of approximately \$2,200,000 for which it issued warrants to purchase 93,473 shares of Series D at \$4.33 per share. The warrants are exercisable after December 10, 1997 for \$4.33 per share, subject to anti-dilution, and are exercisable on a net basis. The warrants expire upon the earlier of (i) closing of an initial public offering of the Company's common stock, (ii) the sale of all or substantially all of its assets or acquisition of the Company by another entity, or (iii) June 27, 2000. The Company valued the warrants under the "Black-Scholes" formula at approximately \$84,000. The warrant value has been recorded as interest expense.

During fiscal 1999, in connection with the Company's Loan and Security Agreement with a bank, the Company issued warrants to purchase 45,000 shares of Series D at \$4.33 per share. The warrants are exercisable after May 21, 1998 for \$4.33 per share, subject to anti-dilution, and are exercisable on a net basis. The warrants expire upon the earlier of (i) one year after the closing of an initial public offering of the Company's common stock, or (ii) May 21, 2003. The Company valued the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

warrants under the "Black-Scholes" formula at approximately \$66,000. The warrant value has been recorded as interest expense.

In July 1999, in connection with the Company's Loan and Security Agreement with a bank, the Company issued warrants to purchase 60,000 shares of Common Stock at \$1.50 per share. The warrants are exercisable after July 16, 1999 for \$1.50 per share, subject to anti-dilution, and are exercisable on a net basis. The warrants expire upon the earlier of (i) one year after the closing of an initial public offering of the Company's common stock, or (ii) July 16, 2004. The Company valued the warrants under the "Black-Scholes" formula at approximately \$23,000. The warrant value has been recorded as interest expense.

NOTE 6 -- COMMON STOCK:

In April 1995, the Company adopted the 1995 Stock Option Plan, (the "Option Plan"). The Option Plan, as amended, has 29,500,000 shares of common stock reserved for issuance thereunder.

THE OPTION PLAN

The Option Plan allows for the issuance of incentive and nonqualified stock options to employees and consultants of the Company.

Options granted under the Option Plan are generally for periods not to exceed ten years, and generally must be issued at prices not less than 100% and 85%, for incentive and nonqualified stock options, respectively, of the fair market value of the stock on the date of grant as determined by the Board of Directors. Incentive stock options granted to shareholders who own greater than 10% of the outstanding stock are for periods not to exceed five years, and must be issued at prices not less than 110% of the fair market value of the stock on the date of grant. The options vest 20% one year after the vesting commencement date and the remaining shares vest one-sixtieth per month over the remaining forty-eight months. Options granted under the Plan may be exercised prior to vesting. The Company has the right to repurchase such shares at their original purchase price if the optionee is terminated from service prior to vesting. Such right expires as the options vest over a five year period.

1997 DIRECTORS' STOCK OPTION PLAN

In August 1997, the Company adopted the 1997 Directors' Stock Option Plan (the "Directors' Plan"). The Directors' Plan has 900,000 shares of common stock reserved thereunder. Under the Directors' Plan, an outside director is granted 180,000 options upon appointment to the Board of Directors. These options vest 20% one year after the vesting commencement date and remaining shares vest one-sixtieth per month over the remaining forty-eight months. An outside director is also granted 36,000 options on the date of each annual meeting of the shareholders. These options vest one-twelfth per month over twelve months after the fourth anniversary of the vesting commencement date. Options granted under the Directors' Plan may be exercised prior to vesting. The Company has the right to repurchase such shares at their original purchase price if the director is terminated or resigns from the Board of Directors prior to vesting. Such right expires as the options vest over a five year period.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Aggregate activity under both the Option Plan and the Directors' Plan was as follows:

	SHARES AVAILABLE	OPTIONS OUTSTANDING	WEIGHTED AVERAGE OPTIONS PRICE PER SHARE
	-----	-----	-----

	-----	-----	
Balance at January 31, 2000.....	5,083	12,385	\$0.87
	=====	=====	

At January 31, 2000, options to purchase 11,047,560 shares were vested and 5,334,148 unvested shares remain subject to the Company's repurchase rights under the Option Plan and the Directors Plan.

ISSUANCE OF COMMON STOCK TO FOUNDERS

In January 1995, the Company issued 36,000,000 shares of its common stock ("the Founders' Shares") to its founders. Each founder has granted the Company a call right on 50% of his or her shares, exercisable in the event such founder's employment terminated for any reason. The call right expires at a rate of 1/60 per month. At January 31, 2000, Founders' Shares subject to call aggregated 300,000.

OTHER STOCK OPTIONS

In October 1995 and July 1996, the Company granted to a director nonqualified common stock options to purchase 3,000,000 shares of common stock in total. One-half of the common stock options vest ratably over the five year vesting period. The remaining common stock options vest 20% one year after the date of grant and the remaining shares vest one-sixtieth per month over the remaining forty-eight months. In 1995, the director exercised 1,500,000 shares, of which 225,000 shares are subject to repurchase as of January 31, 2000 in the event he ceases to be a director.

In January 1998, the Company granted to a director a nonqualified common stock option to purchase 450,000 shares of common stock at an exercise price of \$0.25. The option vests 20% one year after the vesting commencement date and remaining shares vest one-sixtieth per month over the remaining forty-eight months.

CERTAIN PRO FORMA DISCLOSURES

Had compensation expense for the Company's option grants been determined based on the fair value at the grant dates, as prescribed in SFAS 123, the Company's net income (loss) would have been as follows:

YEARS ENDED JANUARY 31,			
	1998	1999	2000
Net income (loss):			
As reported.....	\$(7,444,000)	\$ (959,000)	\$13,070,000
Pro forma.....	\$(7,505,000)	\$(1,572,000)	\$11,857,000
Basic net income (loss) per share:			
As reported.....	\$ (0.24)	\$ (0.03)	\$ 0.32
Pro forma.....	\$ (0.25)	\$ (0.05)	\$ 0.29
Diluted net income (loss) per share:			
As reported.....	\$ (0.24)	\$ (0.03)	\$ 0.16
Pro forma.....	\$ (0.25)	\$ (0.05)	\$ 0.15

For the purpose of above noted SFAS 123 pro forma disclosure the fair value of each option grant has been estimated on the date of grant using the minimum value method as prescribed by

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

SFAS 123. The following table summarizes the estimated fair value of options and assumptions used in the SFAS 123 calculations:

	YEARS ENDED JANUARY 31,

Estimated fair value.....	\$0.04	\$0.38	\$2.96
Expected life (years).....	5	5	5
Risk-free interest rate.....	6.0%	4.5%	6.1%
Dividend yield.....	--	--	--
Volatility.....	--	--	--

STOCK COMPENSATION

During the years ended January 31, 1999 and 2000, the Company granted options to employees and directors and recognized unearned stock compensation of approximately \$262,000 and \$13,852,000, respectively. Such unearned stock compensation is being amortized using an accelerated method over the vesting period of five years and may decrease due to employees that terminate service prior to vesting.

In February 2000, the Company granted options to employees and recognized unearned stock compensation of approximately \$5,761,000. Such unearned stock compensation will be amortized using the accelerated method over the vesting period of five years and may decrease due to employees that terminate prior to vesting.

NOTE 7 -- BENEFIT PLAN:

Effective January 1, 1994, the Company adopted a 401(k) plan which allows all employees to participate by making salary deferred contributions to the 401(k) plan ranging from 1% to 20% of eligible earnings. The Company may make discretionary contributions to the 401(k) plan upon approval by the Board of Directors. No company contributions were made to the 401(k) plan from inception through January 31, 2000.

NOTE 8 -- INCOME TAXES:

The provision for income taxes for the years ended January 31, 1998, 1999 and 2000 consists of the following (in thousands):

	YEAR ENDED JANUARY 31,		
	1998	1999	2000

Effective tax rate.....	0.6%	111.4%	25.0%
	=====	=====	=====

The U.S. and non-U.S. components of income (loss) before income taxes are:

	YEARS ENDED JANUARY 31,		
	1998	1999	2000
U.S. operations.....	\$ 247	\$ 580	\$ 1,222
Non-U.S. operations.....	(7,645)	(1,056)	16,204
	\$(7,398)	\$ (476)	\$17,426
	=====	=====	=====

As of January 31, 2000, the Company had federal research tax credit carryforwards for U.S. federal income tax return purposes of approximately \$800,000 that expire through 2020. As of January 31, 2000, the Company had unused California research tax credits of approximately \$700,000 that will carryforward indefinitely until utilized.

Federal and state tax laws impose restrictions on the utilization of tax credit carryforwards in the event of an "ownership change" as defined by the Internal Revenue Code.

Pending approval from the Economic Development Board of Singapore, the Company's Singapore operations are expected to enjoy, effective July 1, 1999, a tax holiday from Singapore taxes on certain non-investment income. The Company will be required to comply with certain conditions for minimum levels of investment, headcount and the nature of its activities at its Singapore operations to maintain the tax holiday. The tax holiday would have had an immaterial impact on the Company's net income in fiscal 2000.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

NOTE 9 -- COMMITMENTS

The Company is obligated under noncancelable operating leases for its facilities and under capital leases for certain equipment. The capital leases expire in fiscal year 2002 and include a buyout option.

Future minimum lease payments under the operating and capital leases are as follows (in thousands):

	OPERATING LEASES	CAPITAL LEASES
	-----	-----
2001.....	\$1,372	\$ 75
2002.....	1,357	36
2003.....	52	--
	-----	-----
Total minimum lease payments.....	\$2,781	111
	=====	
Less: amount representing interest.....		(1)

Present value of minimum lease payments.....		110
Less: current portion.....		(74)

Long-term lease obligation.....		\$ 36
		=====

Rent expense on the operating leases for the years ended January 31, 1998, 1999 and 2000 was approximately \$105,000, \$214,000 and \$859,000, respectively.

PURCHASE COMMITMENTS

The Company's manufacturing relationships with foundries allow for the cancellation of all outstanding purchase orders, but requires repayment of all expenses incurred to date. As of January 31, 2000, foundries had incurred approximately \$5,600,000 of manufacturing expenses on the Company's outstanding purchase orders.

NOTE 10 -- SEGMENT AND GEOGRAPHIC INFORMATION:

The Company has adopted Statement of Financial Accounting Standards No. 131 "Disclosure about Segments of an Enterprise and Related Information" ("SFAS 131"). Based on its operating management and financial reporting structure, the Company has determined that it has one reportable business segment: the design, development and sale of integrated circuits.

The following is a summary of product revenue by geographic area based on the location of shipments (in thousands):

	YEARS ENDED JANUARY 31,

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

All sales are denominated in United States dollars. For all periods presented, substantially all of the Company's long-lived assets were located in the United States.

NOTE 11 -- SUBSEQUENT EVENTS:

INITIAL PUBLIC OFFERING

On March 21, 2000, the Company's Board of Directors authorized management of the Company to file a Registration Statement with the Securities and Exchange Commission permitting the Company to sell its common stock to the public.

STOCK DIVIDEND

On March 17, 2000, the Company's shareholders approved two 100% common stock dividends. All references throughout the consolidated financial statements to number of shares, per share amounts and stock option data have been restated to reflect the common stock dividends. Additionally, on January 21, 2000, the authorized common shares was proposed to be increased to 242,000,000 by the Board of Directors. This increase was approved on March 17, 2000 by the Company's shareholders and took effect on that date.

RESTRICTED CASH

In March 2000, the Company invested \$3,000,000 in a certificate of deposit with a U.S. financial institution as security for a standby letter of credit with a supplier for the same amount. This standby letter of credit expires on September 1, 2000.

Total.....	\$1,525,000
	=====

ITEM 14. INDEMNIFICATION OF DIRECTORS AND OFFICERS.

Bermuda law permits a company to indemnify its directors and officers, except for any act of fraud or dishonesty. Marvell has provided in its Bye-laws that the directors and officers and the liquidators and trustees, if any, of Marvell will be indemnified and secured harmless to the full extent permitted by law out of the assets of Marvell from and against all actions, costs, charges, losses, damages and expenses incurred by reason of any act done, concurred in or omitted in or about the execution of their duties of supposed duties, or in their respective offices or trusts, and none of them shall be answerable for the acts, receipts, neglects or defaults of the others of them or for joining in any receipts for the sake of conformity, or for any bankers or other persons with whom any moneys or effects belonging to Marvell shall or may be lodged or deposited for safe custody, or for insufficiency or deficiency of any security upon which any moneys of or belonging to Marvell shall be placed out on or invested, or for any other loss, misfortune or damage which may happen in the execution of their respective offices or trusts, or in relation thereto, other than in the case of any fraud or dishonesty. In addition, Marvell has provided in its Bye-laws that each shareholder of Marvell agrees to waive any claim or right of action, individually or in the right of Marvell, against any director or officer of Marvell on account of any action taken by such director or officer, or the failure of such director or officer to take any action, in the performance of his duties with or for Marvell, other than with respect to any matter involving any fraud or dishonesty on behalf of such director or officer.

Bermuda law also permits Marvell to purchase insurance for the benefit of its directors and officers against any liability incurred by them for the failure to exercise the requisite care, diligence and skill in the exercise of their powers and the discharge of their duties, or indemnifying them in respect of any loss arising or liability incurred by them by reason of negligence, default, breach of duty or breach of trust. Marvell plans to purchase indemnification insurance for its officers and directors.

ITEM 15. RECENT SALES OF UNREGISTERED SECURITIES.

From January 1, 1997 through April 30, 2000, we have issued and sold the following unregistered securities:

1. In June, 1997, we issued convertible promissory notes in the aggregate principal amount of \$2,211,250 to six investors for \$2,211,250 in cash. In conjunction with the issuance of the

convertible promissory notes, we issued warrants to purchase 76,544 shares of Series D preferred stock to such investors at an exercise price of \$4.33 per share, which warrants expire, if not earlier exercised, on the earlier of June 27, 2000 or the consummation of this offering. The number of shares subject to such warrant equaled 15% of the principal amount of each purchaser's note divided by the exercise price, which was \$6.50 prior to the June 1998 stock split. In December 1997, these noteholders converted the convertible promissory notes into 510,288 shares of Series D Preferred at a conversion price of \$4.33 per share.

2. In December 1997, as partial consideration for acting as our placement agents, we issued warrants to InveStar Capital, Inc. and Hambrecht & Quist LLC to purchase an aggregate of 16,929 shares of Series D preferred stock at an exercise price of \$4.33 per share, which warrants expire, if not earlier exercised, on the earlier of June 27, 2000 or the consummation of this offering.

3. During the period December 1997 through March 2000, we sold an aggregate of 2,548,288 shares of Series D preferred stock to 54 accredited investors pursuant to Rule 506 of Regulation D. We sold the shares at a purchase price of \$4.33 per share for an aggregate consideration of \$11,042,506 in cash.

4. In May 1998, in connection with a loan agreement we issued a warrant to our bank to purchase up to 45,000 shares of Series D preferred stock at an exercise price of \$4.33 per share.

5. In June 1999, in connection with a loan agreement we issued a warrant to our bank to purchase up to 60,000 shares of common stock at an exercise price of \$1.50.

6. In July 1999, we sold an aggregate of 350,000 shares of Series E preferred stock to an investor at a purchase price of \$10.00 per share for an aggregate consideration of \$3,500,000 in cash.

7. As of April 30, 2000, 15,264,331 shares of common stock had been issued to our employees, directors and consultants upon exercise of options at exercise prices ranging from \$0.03 to \$5.00 per share and 11,492,809 shares of common were issuable upon exercise of outstanding options under our stock option plans at exercise prices ranging from \$0.03 to \$5.00 per share.

All share numbers and exercise prices for common stock have been adjusted to reflect the 50% stock dividend in June 1998 and the two 100% common stock dividends approved by our shareholders on March 17, 2000. All share numbers and exercise prices for preferred stock have been adjusted to reflect the 50% stock dividend in June 1998. Although the number of shares of Series D preferred stock and the Series E preferred stock were not affected by the two 100% common stock dividends approved by our shareholders on March 17, 2000, all of the 2,548,288 outstanding shares of Series D preferred stock and the 350,000 shares of Series E preferred stock will automatically convert on a four-for-one basis into shares of common stock upon the consummation of this offering.

The sales and issuances of securities listed above were deemed to be exempt from registration under Section 4(2) of the Securities Act, Regulation D thereunder as transactions not involving a public offering or by virtue of Rule 701 as transactions pursuant to compensatory benefit plans and contracts relating to compensation. All of the foregoing securities are deemed restricted securities for purposes of the Securities Act.

ITEM 17. UNDERTAKINGS.

(a) Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the Registrant pursuant to the provisions described under "Item 14 -- Indemnification of Directors and Officers" above, or otherwise, the Registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer or controlling person of the Registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

(b) The undersigned Registrant hereby undertakes that:

(1) For purposes of determining any liability under the Securities Act, the information omitted from the form of prospectus filed as part of this Registration Statement in reliance upon Rule 430A and contained in a form of prospectus filed by the Registrant pursuant to Rule 424(b)(1) or (4) or 497(h) under the Securities Act shall be deemed to be part of this Registration Statement as of the time it was declared effective.

(2) For the purposes of determining any liability under the Securities Act, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(c) The undersigned Registrant hereby undertakes to provide to the underwriters at the closing specified in the underwriting agreement, certificates in such denominations and registered in such names as required by the underwriters to permit prompt delivery to each purchaser.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, as amended, the Registrant has duly caused this Registration Statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Sunnyvale, State of California, on the 4th day of May, 2000.

MARVELL TECHNOLOGY GROUP, LTD.

COMMON STOCK

UNDERWRITING AGREEMENT

, 2000

Goldman, Sachs & Co.,
 FleetBoston Robertson Stephens Inc.,
 J.P. Morgan Securities Inc.,
 As representatives of the several Underwriters
 named in Schedule I hereto,
 c/o Goldman, Sachs & Co.,
 2765 Sand Hill Road,
 Menlo Park, California 94025.

Ladies and Gentlemen:

Marvell Technology Group, Ltd., a Bermuda corporation (the "Company"), proposes, subject to the terms and conditions stated herein, to issue and sell to the Underwriters named in Schedule I hereto (the "Underwriters") an aggregate of shares (the "Firm Shares") and, at the election of the Underwriters, up to additional shares (the "Optional Shares") of common stock, par value \$_____ per share ("Stock") of the Company (the Firm Shares and the Optional Shares that the Underwriters elect to purchase pursuant to Section 2 hereof being collectively called the "Shares").

1. The Company represents and warrants to, and agrees with, each of the Underwriters that:

(a) A registration statement on Form S-1 (File No. 333-....) (the "Initial Registration Statement") in respect of the Shares has been filed with the Securities and Exchange Commission (the "Commission"); the Initial Registration Statement and any post-effective amendment thereto, each in the form heretofore delivered to you, and, excluding exhibits thereto, for each of the other Underwriters, have been declared effective by the Commission in such form; other than a registration statement, if any, increasing the size of the offering (a "Rule 462(b) Registration Statement"), filed pursuant to Rule 462(b) under the Securities Act of 1933, as amended (the "Act"), which became effective upon filing, no other document with respect to the Initial Registration Statement has heretofore been filed with the Commission; and no stop order suspending the effectiveness of the Initial Registration Statement, any post-effective amendment thereto or the Rule 462(b) Registration Statement, if any, has been issued and no proceeding for that purpose has been initiated or threatened by the Commission (any preliminary prospectus included in the Initial Registration Statement or filed with the Commission pursuant to Rule 424(a) of the rules and regulations of the

Commission under the Act is hereinafter called a "Preliminary Prospectus"; the various parts of the Initial Registration Statement and the Rule 462(b) Registration Statement, if any, including all exhibits thereto and including the information contained in the form of final prospectus filed with the Commission pursuant to Rule 424(b) under the Act in accordance with Section 5(a) hereof and deemed by virtue of Rule 430A under the Act to be part of the Initial Registration Statement at the time it was declared effective, each as amended at the time such part of the Initial Registration Statement became effective or such part of the Rule 462(b) Registration Statement, if any, became or hereafter becomes effective, are hereinafter collectively called the "Registration Statement"; and such final prospectus, in the form first filed pursuant to Rule 424(b) under the Act, is hereinafter called the "Prospectus";

(b) No order preventing or suspending the use of any Preliminary Prospectus has been issued by the Commission, and each Preliminary Prospectus, at the time of filing thereof, conformed in all material respects to the requirements of the Act and the rules and regulations of the Commission thereunder, and did not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, however, that this representation and warranty shall not apply to any statements or omissions made in reliance upon and in conformity with information furnished in writing to the Company by an Underwriter through Goldman, Sachs & Co. expressly for use therein;

(c) The Registration Statement conforms, and the Prospectus and any further amendments or supplements to the Registration Statement or the Prospectus will conform, in all material respects to the requirements of the Act and the rules and regulations of the Commission thereunder and do not and will not, as of the applicable effective date as to the Registration Statement and any amendment thereto, and as of the applicable filing date as to the Prospectus and any amendment or supplement thereto, contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading; provided, however, that this representation and warranty shall not apply to any statements or omissions made in reliance upon and in conformity with information furnished in writing to the Company by an Underwriter through Goldman, Sachs & Co. expressly for use therein;

(d) Neither the Company nor any of its subsidiaries has sustained since the date of the latest audited financial statements included in the Prospectus any material loss or interference with its business from fire, explosion, flood or other calamity, whether or not covered by insurance, or from any labor dispute or court or governmental action, order or decree, otherwise than as set forth or contemplated in the Prospectus; and, since the respective dates as of which information is given in the Registration Statement and the Prospectus, there has not been any change in the capital stock (other than grants of options under the Company's option plans described in the Registration Statement, and exercises of such options or options described in the Registration Statement) or long-term debt of the Company or any of its subsidiaries or any material adverse change, or any development involving a prospective material adverse change, in or affecting the general affairs, management, financial position, stockholders' equity or results of operations of the Company and its subsidiaries, otherwise than as set forth or contemplated in the Prospectus;

(e) The Company and its subsidiaries have good and marketable title in fee simple to all real property and good and marketable title to all personal property owned by them, in each case free and clear of all liens, encumbrances and defects except such as are described in the Prospectus or such as do not materially affect the value of such property and do not interfere in any material respect with the use made and proposed to be made of such property by the Company and its subsidiaries; and

any real property and buildings held under lease by the Company and its subsidiaries are held by them under valid, subsisting and enforceable leases with such exceptions as are not material and do not interfere in any material respect with the use made and proposed to be made of such property and buildings by the Company and its subsidiaries;

(f) The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of Bermuda, with power and authority (corporate and other) to own its properties and conduct its business as described in the Prospectus, and has been duly qualified as a foreign corporation for the transaction of business and is in good standing under the laws of each other jurisdiction in which it owns or leases properties or conducts any business so as to require such qualification, or is subject to no material liability or disability by reason of the failure to be so qualified in any such jurisdiction; and each subsidiary of the Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of its jurisdiction of incorporation;

(g) The Company has an authorized capitalization as set forth in the Prospectus, and all of the issued shares of capital stock of the Company have been duly and validly authorized and issued, are fully paid and non-assessable and conform to the description thereof contained in the Prospectus; and all of the issued shares of capital stock of each subsidiary of the Company have been duly and validly authorized and issued, are fully paid and non-assessable and (except for directors' qualifying shares) are owned directly or indirectly by the Company, free and clear of all liens, encumbrances, equities or claims; the holders of outstanding shares of capital stock of the Company are not entitled to preemptive or other rights to acquire the Shares; except as described in the Registration Statement, there are no outstanding securities convertible into or exchangeable for, or warrants, rights or options to purchase from the Company, or obligations of the Company to issue, the Stock or any other class of capital stock of the Company;

(h) The unissued Shares to be issued and sold by the Company to the Underwriters hereunder have been duly and validly authorized and, when issued and delivered against payment therefor as provided herein, will be duly and validly issued and fully paid and non-assessable and will conform to the description of the Stock contained in the Prospectus;

(i) The issue and sale of the Shares by the Company and the compliance by the Company with all of the provisions of this Agreement and the consummation of the transactions herein contemplated will not conflict with or result in a breach or violation of any of the terms or provisions of, or constitute a default under, any indenture, mortgage, deed of trust, loan agreement or other agreement or instrument to which the Company or any of its subsidiaries is a party or by which the Company or any of its subsidiaries is bound or to which any of the property or assets of the Company or any of its subsidiaries is subject, nor will such action result in any violation of the provisions of the memorandum of association or articles or certificate of incorporation or by-laws, or other organizational documents, of the Company or any of its subsidiaries or any statute or any order, rule or regulation of any court or Governmental Agency (as defined herein) or body having jurisdiction over the Company or any of its subsidiaries or any of their properties; and no consent, approval, authorization, order, registration or qualification of or with any such court or Governmental Agency or body is required for the issue and sale of the Shares or the consummation by the Company of the transactions contemplated by this Agreement, except the registration under the Act of the Shares and such consents, approvals, authorizations, registrations or qualifications as may be required under state securities or Blue Sky laws in connection with the purchase and distribution of the Shares by the Underwriters;

(j) Neither the Company nor any of its subsidiaries is in violation of its memorandum of association or articles or certificate of incorporation or by-laws, or other organizational documents, or

in default in the performance or observance of any material obligation, agreement, covenant or condition contained in any material indenture, mortgage, deed of trust, loan agreement, lease or other material agreement or instrument to which it is a party or by which it or any of its properties may be bound;

(k) No stamp or other issuance or transfer taxes or duties and no capital gains, income, withholding or other taxes are payable by or on behalf of the Underwriters to any potential subdivision or taxing authority thereof or therein in connection with the execution of this agreement, the sale and delivery by the Company of the Shares or the issuance of the Shares;

(l) The statements set forth in the Prospectus under the caption "Description of Capital Stock", insofar as they purport to constitute a summary of the terms of the Stock, under the caption "Taxation", and under the caption "Underwriting", insofar as they purport to describe the provisions of the laws and documents referred to therein, are accurate and fair in all material respects;

(m) Other than as set forth in the Prospectus, there are no legal or governmental proceedings pending to which the Company or any of its subsidiaries is a party or of which any property of the Company or any of its subsidiaries is the subject which, if determined adversely to the Company or any of its subsidiaries, would individually or in the aggregate have a material adverse effect on the current or future consolidated financial position, stockholders' equity or results of operations of the Company and its subsidiaries; and, to the best of the Company's knowledge, no such proceedings are threatened or contemplated by any Governmental Agency (as defined herein) or threatened by others;

(n) Neither the Company nor any of its subsidiaries is and, after giving effect to the offering and sale of the Shares, will be an "investment company", as such term is defined in the Investment Company Act of 1940, as amended (the "Investment Company Act");

(o) PricewaterhouseCoopers LLP, who have certified certain financial statements of the Company and its subsidiaries, are independent public accountants as required by the Act and the rules and regulations of the Commission thereunder;

(p) Except as described in the Prospectus, the Company and its subsidiaries own, possess or have the right to employ the patents, patent rights, licenses, inventions, copyrights, know-how (including trade secrets and other unpatented and/or unpatentable proprietary or confidential information, software, systems or procedures), trademarks, service marks and trade names, inventions, computer programs, technical data and information (collectively, the "Intellectual Property Rights") presently being employed to conduct their businesses as now conducted; and the expected expiration of any such Intellectual Property Rights would not, individually or in the aggregate, result in a material adverse effect or any development that could reasonably be expected to result in a material adverse effect on the current or future consolidated financial position, stockholders' equity or results of operations of the Company and its subsidiaries. Except as described in the Prospectus, the Intellectual Property Rights presently employed by the Company and its subsidiaries in connection with the businesses now operated by them or which are proposed to be operated by them, as described in the Prospectus, are owned or licensed, to the Company's knowledge, free and clear of and without violating any right, claimed rights, charge, encumbrance, pledge, security interest, restriction or lien of any kind of any other person, and neither the Company nor any of its subsidiaries has received any notice of infringement of or conflict with asserted rights of others with respect to any of the foregoing except as would not reasonably be expected to individually or in the aggregate, result in a material adverse effect, or any development that could reasonably be expected to result in a material adverse effect on the current or future consolidated financial position, stockholders' equity or

results of operations of the Company and its subsidiaries, whether or not arising from transactions in the ordinary course of business. Except as described in the Prospectus, to the Company's knowledge, the Intellectual Property Rights the Company employs in connection with the business and operations of the Company and its subsidiaries do not infringe on the rights of any person, except as could not reasonably be expected to individually or in the aggregate result in a material adverse effect, or any development that could reasonably be expected to result in a material adverse effect on the current or future consolidated financial position, stockholders' equity or results of operations of the Company and its subsidiaries, whether or not arising from transactions in the ordinary course of business;

(q) The Company has reviewed its operations and that of its subsidiaries and any third parties with which the Company or any of its subsidiaries has a material relationship to evaluate the extent to which the business or operations of the Company or any of its subsidiaries has been or will be affected by the Year 2000 Problem. As a result of such review, the Company has no reason to believe, and does not believe, that the Year 2000 Problem has had or will have a material adverse effect on the general affairs, management, the past, current or future consolidated financial position, business prospects, stockholders' equity or results of operations of the Company and its subsidiaries or has resulted or will result in any material loss or interference with the Company's business or operations. The "Year 2000 Problem" as used herein means any significant risk that computer hardware or software used in the receipt, transmission, processing, manipulation, storage, retrieval, retransmission or other utilization of data or in the operation of mechanical or electrical systems of any kind is not functioning or will not, in the case of dates or time periods occurring after December 31, 1999, function at least as effectively as in the case of dates or time periods occurring prior to January 1, 2000;

(r) All consents, approvals, authorizations, orders, registrations, clearances and qualifications of or with any court or governmental agency or body (hereinafter referred to as a "Governmental Agency") having jurisdiction over the Company or any of its subsidiaries or any of their properties or any stock exchange authorities (hereinafter referred to as "Governmental Authorizations") required for the execution and delivery by the Company of this Agreement to be duly and validly authorized have been obtained or made and are in full force and effect;

(s) The Company and each of its subsidiaries have all licenses, franchises, permits, authorizations, approvals and orders and other concessions of and from all Governmental Agencies that are necessary to own or lease their properties and conduct their businesses as described in the Prospectus; and

(t) The Company is not a Passive Foreign Investment Company ("PFIC") within the meaning of Section 1296 of the United States Internal Revenue Code of 1986, as amended, and is not likely to become a PFIC.

2. Subject to the terms and conditions herein set forth, (a) the Company agrees to issue and sell to each of the Underwriters, and each of the Underwriters agrees, severally and not jointly, to purchase from the Company, at a purchase price per share of \$....., the number of Firm Shares set forth opposite the name of such Underwriter in Schedule I hereto and (b) in the event and to the extent that the Underwriters shall exercise the election to purchase Optional Shares as provided below, the Company agrees to issue and sell to each of the Underwriters, and each of the Underwriters agrees, severally and not jointly, to purchase from the Company, at the purchase price per share set forth in clause (a) of this Section 2, that portion of the number of Optional Shares as to which such election shall have been exercised (to be adjusted by you so as to eliminate fractional shares) determined by multiplying such number of Optional Shares by a fraction, the numerator of

which is the maximum number of Optional Shares which such Underwriter is entitled to purchase as set forth opposite the name of such Underwriter in Schedule I hereto and the denominator of which is the maximum number of Optional Shares that all of the Underwriters are entitled to purchase hereunder.

The Company hereby grants to the Underwriters the right to purchase at their election up to Optional Shares, at the purchase price per share set forth in the paragraph above, for the sole purpose of covering sales of shares in excess of the number of Firm Shares. Any such election to purchase Optional Shares may be exercised only by written notice from you to the Company, given within a period of 30 calendar days after the date of this Agreement, setting forth the aggregate number of Optional Shares to be purchased and the date on which such Optional Shares are to be delivered, as determined by you but in no event earlier than the First Time of Delivery (as defined in Section 4 hereof) or, unless you and the Company otherwise agree in writing, earlier than two or later than ten business days after the date of such notice.

3. Upon the authorization by you of the release of the Firm Shares, the several Underwriters propose to offer the Firm Shares for sale upon the terms and conditions set forth in the Prospectus.

4. (a) The Shares to be purchased by each Underwriter hereunder, in definitive form, and in such authorized denominations and registered in such names as Goldman, Sachs & Co. may request upon at least forty-eight hours' prior notice to the Company shall be delivered by or on behalf of the Company to Goldman, Sachs & Co., through the facilities of the Depository Trust Company ("DTC"), for the account of such Underwriter, against payment by or on behalf of such Underwriter of the purchase price therefor by wire transfer of Federal (same-day) funds to the account specified by the Company to Goldman, Sachs & Co. at least forty-eight hours in advance. The Company will cause the certificates representing the Shares to be made available for checking and packaging at least twenty-four hours prior to the Time of Delivery (as defined below) with respect thereto at the office of DTC or its designated custodian (the "Designated Office"). The time and date of such delivery and payment shall be, with respect to the Firm Shares, 9:30 a.m., New York City time, on, 2000 or such other time and date as Goldman, Sachs & Co. and the Company may agree upon in writing, and, with respect to the Optional Shares, 9:30 a.m., New York time, on the date specified by Goldman, Sachs & Co. in the written notice given by Goldman, Sachs & Co. of the Underwriters' election to purchase such Optional Shares, or such other time and date as Goldman, Sachs & Co. and the Company may agree upon in writing. Such time and date for delivery of the Firm Shares is herein called the "First Time of Delivery", such time and date for delivery of the Optional Shares, if not the First Time of Delivery, is herein called the "Second Time of Delivery", and each such time and date for delivery is herein called a "Time of Delivery".

(b) The documents to be delivered at each Time of Delivery by or on behalf of the parties hereto pursuant to Section 7 hereof, including the cross receipt for the Shares and any additional documents requested by the Underwriters pursuant to Section 7(n) hereof, will be delivered at the offices of Gibson, Dunn & Crutcher LLP, 1530 Page Mill Road, Palo Alto, California (the "Closing Location"), and the Shares will be delivered at the Designated Office, all at such Time of Delivery. A meeting will be held at the Closing Location at 3:00 p.m., Pacific time, on the New York Business Day next preceding such Time of Delivery, at which meeting the final drafts of the documents to be delivered pursuant to the preceding sentence will be available for review by the parties hereto. For the purposes of this Section 4, "New York Business Day" shall mean each Monday, Tuesday, Wednesday, Thursday and Friday which is not a day on which banking institutions in New York are generally authorized or obligated by law or executive order to close.

5. The Company agrees with each of the Underwriters:

(a) To prepare the Prospectus in a form approved by you and to file such Prospectus pursuant to Rule 424(b) under the Act not later than the Commission's close of business on the second business day following the execution and delivery of this Agreement, or, if applicable, such earlier time as may be required by Rule 430A(a)(3) under the Act; to make no further amendment or any supplement to the Registration Statement or Prospectus which shall be disapproved by you promptly after reasonable notice thereof; to advise you, promptly after it receives notice thereof, of the time when any amendment to the Registration Statement has been filed or becomes effective or any supplement to the Prospectus or any amended Prospectus has been filed and to furnish you with copies thereof; to advise you, promptly after it receives notice thereof, of the issuance by the Commission of any stop order or of any order preventing or suspending the use of any Preliminary Prospectus or prospectus, of the suspension of the qualification of the Shares for offering or sale in any jurisdiction, of the initiation or threatening of any proceeding for any such purpose, or of any request by the Commission for the amending or supplementing of the Registration Statement or Prospectus or for additional information; and, in the event of the issuance of any stop order or of any order preventing or suspending the use of any Preliminary Prospectus or prospectus or suspending any such qualification, promptly to use its best efforts to obtain the withdrawal of such order;

(b) Promptly from time to time to take such action as you may reasonably request to qualify the Shares for offering and sale under the securities laws of such jurisdictions as you may request and to comply with such laws so as to permit the continuance of sales and dealings therein in such jurisdictions for as long as may be necessary to complete the distribution of the Shares, provided that in connection therewith the Company shall not be required to qualify as a foreign corporation or to file a general consent to service of process in any jurisdiction;

(c) Prior to 10:00 A.M., New York City time, on the New York Business Day next succeeding the date of this Agreement and from time to time, to furnish the Underwriters with copies of the Prospectus in New York City in such quantities as you may reasonably request, and, if the delivery of a prospectus is required at any time prior to the expiration of nine months after the time of issue of the Prospectus in connection with the offering or sale of the Shares and if at such time any event shall have occurred as a result of which the Prospectus as then amended or supplemented would include an untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made when such Prospectus is delivered, not misleading, or, if for any other reason it shall be necessary during such period to amend or supplement the Prospectus in order to comply with the Act, to notify you and upon your request to prepare and furnish without charge to each Underwriter and to any dealer in securities as many copies as you may from time to time reasonably request of an amended Prospectus or a supplement to the Prospectus which will correct such statement or omission or effect such compliance, and in case any Underwriter is required to deliver a prospectus in connection with sales of any of the Shares at any time nine months or more after the time of issue of the Prospectus, upon your request but at the expense of such Underwriter, to prepare and deliver to such Underwriter as many copies as you may request of an amended or supplemented Prospectus complying with Section 10(a)(3) of the Act;

(d) To make generally available to its securityholders as soon as practicable, but in any event not later than eighteen months after the effective date of the Registration Statement (as

defined in Rule 158(c) under the Act), an earnings statement of the Company and its subsidiaries (which need not be audited) complying with Section 11(a) of the Act and the rules and regulations thereunder (including, at the option of the Company, Rule 158);

(e) During the period beginning from the date hereof and continuing to and including the date 180 days after the date of the Prospectus, not to offer, sell, contract to sell or otherwise dispose of, except as provided hereunder any securities of the Company that are substantially similar to the Shares, including but not limited to any securities that are convertible into or exchangeable for, or that represent the right to receive, Stock or any such substantially similar securities (other than pursuant to stock option plans existing on, or upon the conversion or exchange of convertible or exchangeable securities outstanding as of, the date of this Agreement), without your prior written consent;

(f) To furnish to its stockholders as soon as practicable after the end of each fiscal year an annual report (including a balance sheet and statements of income, stockholders' equity and cash flows of the Company and its consolidated subsidiaries certified by independent public accountants) and, as soon as practicable after the end of each of the first three quarters of each fiscal year (beginning with the fiscal quarter ending after the effective date of the Registration Statement), to make available to its stockholders consolidated summary financial information of the Company and its subsidiaries for such quarter in reasonable detail;

(g) During a period of five years from the effective date of the Registration Statement, to furnish to you copies of all reports or other communications (financial or other) furnished to stockholders, and to deliver to you (i) as soon as they are available, copies of any reports and financial statements furnished to or filed with the Commission or any national securities exchange on which any class of securities of the Company is listed; and (ii) such additional information concerning the business and financial condition of the Company as you may from time to time reasonably request (such financial statements to be on a consolidated basis to the extent the accounts of the Company and its subsidiaries are consolidated in reports furnished to its stockholders generally or to the Commission);

(h) To use the net proceeds received by it from the sale of the Shares pursuant to this Agreement in the manner specified in the Prospectus under the caption "Use of Proceeds";

(i) To use its best efforts to list for quotation the Shares on the National Association of Securities Dealers Automated Quotations National Market System ("NASDAQ");

(j) To file with the Commission such information on Form 10-Q or Form 10-K as may be required by Rule 463 under the Act;

(k) If the Company elects to rely upon Rule 462(b), the Company shall file a Rule 462(b) Registration Statement with the Commission in compliance with Rule 462(b) by 10:00 P.M., Washington, D.C. time, on the date of this Agreement, and the Company shall at the time of filing either pay to the Commission the filing fee for the Rule 462(b) Registration Statement or give irrevocable instructions for the payment of such fee pursuant to Rule 111(b) under the Act; and

(l) Not to (and to cause its subsidiaries not to) take, directly or indirectly, any action which is designed to or which constitutes or which might reasonably be expected to cause or result in stabilization or manipulation of the price of any security of the Company.

6. The Company covenants and agrees with the several Underwriters that the Company will pay or cause to be paid the following: (i) the fees, disbursements and expenses of the Company's

counsel and accountants in connection with the registration of the Shares under the Act and all other expenses in connection with the preparation, printing and filing of the Registration Statement, any Preliminary Prospectus and the Prospectus and amendments and supplements thereto and the mailing and delivering of copies thereof to the Underwriters and dealers; (ii) the cost of word processing any Agreement among Underwriters, this Agreement, the Blue Sky Memorandum, closing documents (including any compilations thereof) and any other documents in connection with the offering, purchase, sale and delivery of the Shares; (iii) all expenses in connection with the qualification of the Shares for offering and sale under state securities laws as provided in Section 5(b) hereof, including the fees and disbursements of counsel for the Underwriters in connection with such qualification and in connection with the Blue Sky survey; (iv) all fees and expenses in connection with listing the Shares on the NASDAQ; (v) the filing fees incident to, and the fees and disbursements of counsel for the Underwriters in connection with, securing any required review by the National Association of Securities Dealers, Inc. of the terms of the sale of the Shares; (vi) the cost of preparing stock certificates; (vii) the cost and charges of any transfer agent or registrar; and (viii) all other costs and expenses incident to the performance of its obligations hereunder which are not otherwise specifically provided for in this Section. It is understood, however, that, except as provided in this Section, and Sections 8 and 11 hereof, the Underwriters will pay all of their own costs and expenses, including the fees of their counsel, stock transfer taxes on resale of any of the Shares by them, and any advertising expenses connected with any offers they may make.

7. The obligations of the Underwriters hereunder, as to the Shares to be delivered at each Time of Delivery, shall be subject, in their discretion, to the condition that all representations and warranties and other statements of the Company herein are, at and as of such Time of Delivery, true and correct, the condition that the Company shall have performed all of its obligations hereunder theretofore to be performed, and the following additional conditions:

(a) The Prospectus shall have been filed with the Commission pursuant to Rule 424(b) within the applicable time period prescribed for such filing by the rules and regulations under the Act and in accordance with Section 5(a) hereof; if the Company has elected to rely upon Rule 462(b), the Rule 462(b) Registration Statement shall have become effective by 10:00 P.M., Washington, D.C. time, on the date of this Agreement; no stop order suspending the effectiveness of the Registration Statement or any part thereof shall have been issued and no proceeding for that purpose shall have been initiated or threatened by the Commission; and all requests for additional information on the part of the Commission shall have been complied with to your reasonable satisfaction;

(b) Sullivan & Cromwell, counsel for the Underwriters, shall have furnished to you such written opinion or opinions (a draft of each such opinion is attached as Annex II(a) hereto), dated such Time of Delivery, with respect to such matters as you may reasonably request, and such counsel shall have received such papers and information as they may reasonably request to enable them to pass upon such matters;

(c) Appleby Spurling & Kempe, Bermuda counsel for the Underwriters, shall have furnished to you such written opinion or opinions (a draft of each such opinion is attached as Annex II(b) hereto), dated such time of Delivery, with respect to such matters as you may reasonably request, and such counsel shall have received such papers and information as they may reasonably request to enable them to pass upon such matters.

(d) Thor Buell, General Counsel of the Company, shall have furnished to you his written opinion (a draft of such opinion is attached as Annex II(c) hereto), dated such Time of Delivery, in form and substance satisfactory to you, to the effect that:

(i) The Company and each of its subsidiaries have all licenses and concessions of and from all Governmental Agencies in the state of California that are necessary to own or lease their properties and conduct their businesses as described in the Prospectus; and

(ii) To such counsel's knowledge and other than as set forth in the Prospectus, there are no legal or governmental proceedings pending to which the Company or any of its subsidiaries is a party or of which any property of the Company or any of its subsidiaries is the subject which, if determined adversely to the Company or any of its subsidiaries, would individually or in the aggregate have a material adverse effect on the current or future consolidated financial position, stockholders' equity or results of operations of the Company and its subsidiaries; and, to the best of such counsel's knowledge, no such proceedings are threatened or contemplated by any Governmental Agency or threatened by others;

(e) Conyers, Dill & Pearman, Bermuda counsel for the Company, shall have furnished to you their written opinion (a draft of such opinion is attached as Annex II(d) hereto), dated such Time of Delivery, in form and substance satisfactory to you, to the effect that:

(i) The form of certificates for the Shares conforms to the requirements of Bermuda law;

(ii) The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of Bermuda with power and authority (corporate and other) to own its properties and conduct its business as described in the Prospectus;

(iii) The Company and each of its subsidiaries have all franchises, permits, authorizations, approvals and orders and other licenses and concessions of and from all Governmental Agencies that are necessary to own or lease their properties and conduct their businesses as described in the Prospectus except for such licenses, permits, authorizations, concessions, approvals and orders the failure to obtain which will not have a material adverse effect on the financial condition or results of operations of the Company and its subsidiaries;

(iv) The Company has an authorized capitalization as set forth in the Prospectus, and all of the issued shares of capital stock of the Company (including the Shares being delivered at such Time of Delivery) have been duly and validly authorized and issued and are fully paid and non-assessable; and the Shares conform to the description of the Stock contained in the Prospectus; the holders of outstanding shares of capital stock of the Company are not entitled to preemptive or other rights to acquire the Shares;

(v) To such counsel's actual knowledge and other than as set forth in the Prospectus, there are no legal or governmental proceedings pending to which the Company or any of its subsidiaries is a party or of which any property of the Company or any of its subsidiaries is the subject which, if determined adversely to the Company or any of its subsidiaries, would individually or in the aggregate have a material adverse effect on the current or future consolidated financial position, stockholders' equity or results of operations of the Company and its subsidiaries; and, to such counsel's actual knowledge, no such proceedings are threatened or contemplated by any Governmental Agency or threatened by others;

(vi) This Agreement has been duly authorized, executed and delivered by the Company;

(vii) The issue and sale of the Shares being delivered at such Time of Delivery by the Company and the compliance by the Company with all of the provisions of this Agreement and the consummation of the transactions herein contemplated will not conflict with or result in a breach or violation of any of the terms or provisions of, or constitute a default under, any indenture, mortgage, deed of trust, loan agreement or other agreement or instrument identified to such counsel by the Company as material or the officers' certificate of the Company attached to such opinion, nor will such action result in any violation of the provisions of the memorandum of association of the Company or any statute, rule or regulation known to such counsel of any court or Governmental Agency or body having jurisdiction over the Company or any of its properties, or any order identified by the Company on such officers' certificate;

(viii) No Governmental Authorization of or with any Governmental Agency is required in Bermuda for the issue and sale of the Shares by the Company or the consummation by the Company of the transactions contemplated by this Agreement;

(ix) The choice of laws of the State of New York to govern this Agreement is a proper, valid and binding choice of law and will be recognized and applied by the Courts of Bermuda, assuming that such choice of law is a valid and binding choice of law under the laws of the State of New York;

(x) The Company's agreement to the choice of law provisions set forth in Section 14 hereof will be recognized by the courts of Bermuda; the Company can sue and be sued in its own name under the laws of Bermuda; the irrevocable submission of the Company to the exclusive jurisdiction of a New York Court, the waiver by the Company of any objection to the venue of a proceeding of a New York Court and the agreement of the Company that this Agreement shall be governed by and construed in accordance with the laws of the State of New York are legal, valid and binding; service of process effected in the manner set forth in Section 14 hereof will be effective, insofar as the law of Bermuda is concerned, to confer valid personal jurisdiction over the Company; and judgment obtained in a New York Court arising out of or in relation to the obligations of the Company under this Agreement would be enforceable against the Company in the courts of Bermuda;

(xi) A final and conclusive judgment of the United States Federal or New York State courts under which a sum of money is payable, not being a sum payable in respect of taxes or other charges of a like nature, in respect of a fine or other penalty, or multiple damages, would be enforced as a debt against the Company by an action in the Supreme Court of Bermuda without re-examination of the merits of the case under the Common Law Doctrine of Obligation, provided that such judgment was not obtained by fraud or that its enforcement would not be contrary to public policy in Bermuda, or that the proceedings in which the same was obtained were not contrary to natural justice;

(xii) The statements set forth in the Prospectus under the caption "Description of Capital Stock", insofar as they purport to constitute a summary of the terms of the Stock and to describe the provisions of the laws of Bermuda and documents referred to therein, are accurate and fair in all material respects;

(xiii) The statements in the Prospectus under the captions "Service of Process and Enforcement of Liabilities" and "Taxation", insofar as they purport to describe the provisions of the laws of Bermuda referred to therein, are accurate in all material respects and to the extent such statements relate to matters of law or regulation or to the provisions of documents therein described, are accurate and fair in all material respects, and nothing has been omitted from such statements which would make the same misleading in any material respect;

(xiv) No stamp or other issuance or transfer taxes or duties and no capital gains, income, withholding or other taxes are payable by or on behalf of you to the Bermuda government or to any political subdivision or taxing authority thereof or therein in connection with the execution of this Agreement or the issuance of the Shares.

(xv) Insofar as matters of Bermuda law are concerned, the Registration Statement and the filing of the Registration Statement with the Commission have been duly authorized by and on behalf of the Company;

(xvi) The Company is not entitled to any immunity on the basis of sovereignty or otherwise in respect of its obligations under this Agreement and could not successfully interpose any such immunity as a defense to any suit or action brought or maintained in respect of its obligations under this Agreement; and the waiver by the Company of immunity to jurisdiction (including the waiver of sovereign immunity to which the Company may become entitled subsequent to the date of this Agreement) and immunity to pre-judgment attachment, post-judgment attachment and execution in any suit, action or proceeding against it arising out of or based on this Agreement is a valid and binding obligation of the Company under Bermuda law;

(xvii) The indemnification and contribution provisions set forth in Section 8 hereof do not contravene the public policy or laws of Bermuda; and

In giving such opinion, such counsel may state that with respect to all matters of United States federal and New York law they have relied upon the opinions of United States counsel for the Company delivered pursuant to paragraph (f) of this Section 7.

(f) Gibson, Dunn & Crutcher LLP, counsel for the Company, shall have furnished to you their written opinion in the form set forth in Annex II(e) hereto, dated such Time of Delivery, in form and substance satisfactory to you.

(g) _____, patent counsel for the Company, shall have furnished to you their written opinion (a draft of such opinion is attached as Annex II(f) hereto), dated such Time of Delivery, in a form and substance satisfactory to you, to the effect that:

(i) To the best of such counsel's knowledge, neither the Company nor any of its subsidiaries has received notice of any claim of infringement of any patent, except as set forth in such opinion; and

(ii) Such counsel has reviewed the Registration Statement and Prospectus, the amendments and supplements thereto, and insofar as they concern patents, patent rights or patent licenses, such counsel has no reason to believe that either the Registration Statement or the Prospectus or any amendment or supplement thereto (including particularly the information in the Prospectus under the caption "Risk Factors-_____) contains any untrue statement of a material fact or omits to state a material fact necessary to make the statements therein not misleading.

In rendering such opinion, such counsel (i) shall state that they have represented the Company as to patent matters, are knowledgeable about its technologies and have discussed such technologies with scientists and researchers for the Company and (ii) may state that insofar as such opinion relates to factual matters, it is based upon certificates by officers of the Company, provided that such counsel shall state that they believe that both you and they are justified in relying upon such certificates.

(h) On the date of the Prospectus at a time prior to the execution of this Agreement, at 9:30 a.m., New York City time, on the effective date of any post-effective amendment to the Registration Statement filed subsequent to the date of this Agreement and also at each Time of Delivery, PricewaterhouseCoopers LLP shall have furnished to you a letter or letters, dated the respective dates of delivery thereof, in form and substance satisfactory to you, to the effect set forth in Annex I hereto (the executed copy of the letter delivered prior to the execution of this Agreement is attached as Annex I(a) hereto and a draft of the form of letter to be delivered on the effective date of any post-effective amendment to the Registration Statement and as of each Time of Delivery is attached as Annex I(b) hereto);

(i) (i) Neither the Company nor any of its subsidiaries shall have sustained since the date of the latest audited financial statements included in the Prospectus any loss or interference with its business from fire, explosion, flood or other calamity, whether or not covered by insurance, or from any labor dispute or court or governmental action, order or decree, otherwise than as set forth or contemplated in the Prospectus, and (ii) since the respective dates as of which information is given in the Prospectus there shall not have been any change in the capital stock or long-term debt of the Company or any of its subsidiaries or any change, or any development involving a prospective change, in or affecting the general affairs, management, financial position, stockholders' equity or results of operations of the Company and its subsidiaries, otherwise than as set forth or contemplated in the Prospectus, the effect of which, in any such case described in clause (i) or (ii), is, in the judgment of the Representatives so material and adverse as to make it impracticable or inadvisable to proceed with the public offering or the delivery of the Shares being delivered at such Time of Delivery on the terms and in the manner contemplated in the Prospectus;

(j) On or after the date hereof there shall not have occurred any of the following: (i) a suspension or material limitation in trading in securities generally on the New York Stock Exchange or on NASDAQ; (ii) a suspension or material limitation in trading in the Company's securities on NASDAQ; (iii) a general moratorium on commercial banking activities declared by Federal or New York State or California State authorities; (iv) a change or development involving a prospective change in Bermuda or Singapore taxation affecting the Company or the Shares or the transfer thereof or the imposition of exchange controls by the United States, Bermuda or Singapore, if such change, development involving a prospective change or imposition is, in the judgment of the Representatives, so material and adverse as to make it impracticable or inadvisable to proceed with the public offering or the delivery of the Shares being delivered at such Time of Delivery on the terms and in the manner contemplated in the Prospectus; (v) the outbreak or escalation of hostilities involving the United States or the declaration by the United States of a national emergency or war, if the effect of any such event specified in this clause (v) in the judgment of the Representatives makes it impracticable or inadvisable to proceed with the public offering or the delivery of the Shares being delivered at such Time of Delivery on the terms and in the manner contemplated in the Prospectus; or (vi) the occurrence of any material adverse change in the existing financial, political or economic conditions in the United States, the United Kingdom, Bermuda, Singapore or

elsewhere which, in the judgment of the Representatives, would materially and adversely affect the financial markets or the market for the Shares and other equity securities;

(k) The Shares to be sold at such Time of Delivery shall have been duly listed for quotation on NASDAQ;

(l) The Company has obtained and delivered to the Underwriters executed copies of an agreement from each of its directors and officers and each stockholder listed on Schedule II hereto, substantially to the effect set forth in Subsection 5(e) hereof in form and substance satisfactory to you;

(m) The Company shall have complied with the provisions of Section 5(c) hereof with respect to the furnishing of prospectuses on the New York Business Day next succeeding the date of this Agreement;

(n) The Company shall have furnished or caused to be furnished to you at such Time of Delivery certificates of officers of the Company reasonably satisfactory to you as to the accuracy of the representations and warranties of the Company herein at and as of such Time of Delivery, as to the performance by the Company of all of its obligations hereunder to be performed at or prior to such Time of Delivery, and as to such other matters as you may reasonably request; and

(o) On or after the date hereof (i) no downgrading shall have occurred in the rating accorded the Company's debt securities or preferred stock by any "nationally recognized statistical rating organization", as that term is defined by the Commission for purposes of Rule 436(g)(2) under the Act, and (ii) no such organization shall have publicly announced that it has under surveillance or review, with possible negative implications, its rating of any of the Company's debt securities or preferred stock.

8. (a) The Company will indemnify and hold harmless each Underwriter against any losses, claims, damages or liabilities, joint or several, to which such Underwriter may become subject, under the Act or otherwise, insofar as such losses, claims, damages or liabilities (or actions in respect thereof) arise out of or are based upon an untrue statement or alleged untrue statement of a material fact contained in any Preliminary Prospectus, the Registration Statement or the Prospectus, or any amendment or supplement thereto, or arise out of or are based upon the omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein not misleading, and will reimburse each Underwriter for any legal or other expenses reasonably incurred by such Underwriter in connection with investigating or defending any such action or claim as such expenses are incurred; provided, however, that the Company shall not be liable in any such case to the extent that any such loss, claim, damage or liability arises out of or is based upon an untrue statement or alleged untrue statement or omission or alleged omission made in any Preliminary Prospectus, the Registration Statement or the Prospectus or any such amendment or supplement in reliance upon and in conformity with written information furnished to the Company by any Underwriter through Goldman, Sachs & Co. expressly for use therein.

(b) Each Underwriter will indemnify and hold harmless the Company against any losses, claims, damages or liabilities to which the Company may become subject, under the Act or otherwise, insofar as such losses, claims, damages or liabilities (or actions in respect thereof) arise out of or are based upon an untrue statement or alleged untrue statement of a material fact contained in any Preliminary Prospectus, the Registration Statement or the Prospectus, or any amendment or supplement thereto, or arise out of or are based upon the omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein not

misleading, in each case to the extent, but only to the extent, that such untrue statement or alleged untrue statement or omission or alleged omission was made in any Preliminary Prospectus, the Registration Statement or the Prospectus or any such amendment or supplement in reliance upon and in conformity with written information furnished to the Company by such Underwriter through Goldman, Sachs & Co. expressly for use therein; and will reimburse the Company for any legal or other expenses reasonably incurred by the Company in connection with investigating or defending any such action or claim as such expenses are incurred.

(c) Promptly after receipt by an indemnified party under subsection (a) or (b) above of notice of the commencement of any action, such indemnified party shall, if a claim in respect thereof is to be made against the indemnifying party under such subsection, notify the indemnifying party in writing of the commencement thereof; but the omission so to notify the indemnifying party shall not relieve it from any liability which it may have to any indemnified party otherwise than under such subsection. In case any such action shall be brought against any indemnified party and it shall notify the indemnifying party of the commencement thereof, the indemnifying party shall be entitled to participate therein and, to the extent that it shall wish, jointly with any other indemnifying party similarly notified, to assume the defense thereof, with counsel satisfactory to such indemnified party (who shall not, except with the consent of the indemnified party, be counsel to the indemnifying party), and, after notice from the indemnifying party to such indemnified party of its election so to assume the defense thereof, the indemnifying party shall not be liable to such indemnified party under such subsection for any legal expenses of other counsel or any other expenses, in each case subsequently incurred by such indemnified party, in connection with the defense thereof other than reasonable costs of investigation. No indemnifying party shall, without the written consent of the indemnified party, effect the settlement or compromise of, or consent to the entry of any judgment with respect to, any pending or threatened action or claim in respect of which indemnification or contribution may be sought hereunder (whether or not the indemnified party is an actual or potential party to such action or claim) unless such settlement, compromise or judgment (i) includes an unconditional release of the indemnified party from all liability arising out of such action or claim and (ii) does not include a statement as to or an admission of fault, culpability or a failure to act, by or on behalf of any indemnified party.

(d) If the indemnification provided for in this Section 8 is unavailable to or insufficient to hold harmless an indemnified party under subsection (a) or (b) above in respect of any losses, claims, damages or liabilities (or actions in respect thereof) referred to therein, then each indemnifying party shall contribute to the amount paid or payable by such indemnified party as a result of such losses, claims, damages or liabilities (or actions in respect thereof) in such proportion as is appropriate to reflect the relative benefits received by the Company on the one hand and the Underwriters on the other from the offering of the Shares. If, however, the allocation provided by the immediately preceding sentence is not permitted by applicable law or if the indemnified party failed to give the notice required under subsection (c) above, then each indemnifying party shall contribute to such amount paid or payable by such indemnified party in such proportion as is appropriate to reflect not only such relative benefits but also the relative fault of the Company on the one hand and the Underwriters on the other in connection with the statements or omissions which resulted in such losses, claims, damages or liabilities (or actions in respect thereof), as well as any other relevant equitable considerations. The relative benefits received by the Company on the one hand and the Underwriters on the other shall be deemed to be in the same proportion as the total net proceeds from the offering (before deducting expenses) received by the Company bear to the total underwriting discounts and commissions received by the Underwriters, in each case as set forth in the table on the cover page of the Prospectus. The relative fault shall be determined by reference to, among other things, whether the untrue or alleged untrue statement of a material fact or the omission or alleged

omission to state a material fact relates to information supplied by the Company on the one hand or the Underwriters on the other and the parties' relative intent, knowledge, access to information and opportunity to correct or prevent such statement or omission. The Company and the Underwriters agree that it would not be just and equitable if contributions pursuant to this subsection (d) were determined by pro rata allocation (even if the Underwriters were treated as one entity for such purpose) or by any other method of allocation which does not take account of the equitable considerations referred to above in this subsection (d). The amount paid or payable by an indemnified party as a result of the losses, claims, damages or liabilities (or actions in respect thereof) referred to above in this subsection (d) shall be deemed to include any legal or other expenses reasonably incurred by such indemnified party in connection with investigating or defending any such action or claim. Notwithstanding the provisions of this subsection (d), no Underwriter shall be required to contribute any amount in excess of the amount by which the total price at which the Shares underwritten by it and distributed to the public were offered to the public exceeds the amount of any damages which such Underwriter has otherwise been required to pay by reason of such untrue or alleged untrue statement or omission or alleged omission. No person guilty of fraudulent misrepresentation (within the meaning of Section 11(f) of the Act) shall be entitled to contribution from any person who was not guilty of such fraudulent misrepresentation. The Underwriters' obligations in this subsection (d) to contribute are several in proportion to their respective underwriting obligations and not joint.

(e) The obligations of the Company under this Section 8 shall be in addition to any liability which the Company may otherwise have and shall extend, upon the same terms and conditions, to each person, if any, who controls any Underwriter within the meaning of the Act; and the obligations of the Underwriters under this Section 8 shall be in addition to any liability which the respective Underwriters may otherwise have and shall extend, upon the same terms and conditions, to each officer and director of the Company (including any person who, with his or her consent, is named in the Registration Statement as about to become a director of the Company) and to each person, if any, who controls the Company within the meaning of the Act.

9. (a) If any Underwriter shall default in its obligation to purchase the Shares which it has agreed to purchase hereunder at a Time of Delivery, you may in your discretion arrange for you or another party or other parties to purchase such Shares on the terms contained herein. If within thirty-six hours after such default by any Underwriter you do not arrange for the purchase of such Shares, then the Company shall be entitled to a further period of thirty-six hours within which to procure another party or other parties satisfactory to you to purchase such Shares on such terms. In the event that, within the respective prescribed periods, you notify the Company that you have so arranged for the purchase of such Shares, or the Company notifies you that it has so arranged for the purchase of such Shares, you or the Company shall have the right to postpone such Time of Delivery for a period of not more than seven days, in order to effect whatever changes may thereby be made necessary in the Registration Statement or the Prospectus, or in any other documents or arrangements, and the Company agrees to file promptly any amendments to the Registration Statement or the Prospectus which in your opinion may thereby be made necessary. The term "Underwriter" as used in this Agreement shall include any person substituted under this Section with like effect as if such person had originally been a party to this Agreement with respect to such Shares.

(b) If, after giving effect to any arrangements for the purchase of the Shares of a defaulting Underwriter or Underwriters by you and the Company as provided in subsection (a) above, the aggregate number of such Shares which remains unpurchased does not exceed one-eleventh of the aggregate number of all the Shares to be purchased at such Time of Delivery, then the Company shall have the right to require each non-defaulting Underwriter to purchase the number of Shares which

such Underwriter agreed to purchase hereunder at such Time of Delivery and, in addition, to require each non-defaulting Underwriter to purchase its pro rata share (based on the number of Shares which such Underwriter agreed to purchase hereunder) of the Shares of such defaulting Underwriter or Underwriters for which such arrangements have not been made; but nothing herein shall relieve a defaulting Underwriter from liability for its default.

(c) If, after giving effect to any arrangements for the purchase of the Shares of a defaulting Underwriter or Underwriters by you and the Company as provided in subsection (a) above, the aggregate number of such Shares which remains unpurchased exceeds one-eleventh of the aggregate number of all the Shares to be purchased at such Time of Delivery, or if the Company shall not exercise the right described in subsection (b) above to require non-defaulting Underwriters to purchase Shares of a defaulting Underwriter or Underwriters, then this Agreement (or, with respect to the Second Time of Delivery, the obligations of the Underwriters to purchase and of the Company to sell the Optional Shares) shall thereupon terminate, without liability on the part of any non-defaulting Underwriter or the Company, except for the expenses to be borne by the Company and the Underwriters as provided in Section 6 hereof and the indemnity and contribution agreements in Section 8 hereof; but nothing herein shall relieve a defaulting Underwriter from liability for its default.

10. The respective indemnities, agreements, representations, warranties and other statements of the Company and the several Underwriters, as set forth in this Agreement or made by or on behalf of them, respectively, pursuant to this Agreement, shall remain in full force and effect, regardless of any investigation (or any statement as to the results thereof) made by or on behalf of any Underwriter or any controlling person of any Underwriter, or the Company, or any officer or director or controlling person of the Company, and shall survive delivery of and payment for the Shares.

11. If this Agreement shall be terminated pursuant to Section 9 hereof, the Company shall not then be under any liability to any Underwriter except as provided in Sections 6 and 8 hereof; but, if for any other reason, any Shares are not delivered by or on behalf of the Company as provided herein, the Company will reimburse the Underwriters through you for all out-of-pocket expenses approved in writing by you, including fees and disbursements of counsel, reasonably incurred by the Underwriters in making preparations for the purchase, sale and delivery of the Shares not so delivered, but the Company shall then be under no further liability to any Underwriter except as provided in Sections 6 and 8 hereof.

12. In all dealings hereunder, you shall act on behalf of each of the Underwriters, and the parties hereto shall be entitled to act and rely upon any statement, request, notice or agreement on behalf of any Underwriter made or given by you jointly or by Goldman, Sachs & Co. on behalf of you as the representatives.

All statements, requests, notices and agreements hereunder shall be in writing, and if to the Underwriters shall be delivered or sent by mail, telex or facsimile transmission to you as the representatives in care of Goldman, Sachs & Co., 32 Old Slip, 21st Floor, New York, New York 10005, Attention: Registration Department; and if to the Company shall be delivered or sent by mail to the address of the Company set forth in the Registration Statement, Attention: Secretary, with a copy to Gibson, Dunn & Crutcher LLP, One Montgomery Street, Suite 2600, San Francisco, California 94104, Attention: Kenneth R. Lamb, provided, however, that any notice to an Underwriter pursuant to Section 8(c) hereof shall be delivered or sent by mail, telex or facsimile transmission to such Underwriter at its address set forth in its Underwriters' Questionnaire, or telex constituting such Questionnaire, which address will be supplied to the Company by you upon request. Any such statements, requests, notices or agreements shall take effect upon receipt thereof.

13. This Agreement shall be binding upon, and inure solely to the benefit of, the Underwriters, the Company and, to the extent provided in Sections 8 and 10 hereof, the officers and directors of the Company and each person who controls the Company or any Underwriter, and their respective heirs, executors, administrators, successors and assigns, and no other person shall acquire or have any right under or by virtue of this Agreement. No purchaser of any of the Shares from any Underwriter shall be deemed a successor or assign by reason merely of such purchase.

14. The Company irrevocably (i) agrees that any legal suit, action or proceeding arising out of or based upon this Agreement or the transactions contemplated hereby may be instituted in any New York Court (ii) waives, to the fullest extent it may effectively do so, any objection which it may now or hereafter have to the laying of venue of any such proceeding and (iii) submits to the exclusive jurisdiction of such courts in any such suit, action or proceeding. The Company irrevocably waives any immunity to jurisdiction to which it may otherwise be entitled or become entitled (including sovereign immunity, immunity to pre-judgment attachment, post-judgment attachment and execution) in any legal suit, action or proceeding against it arising out of or based on this Agreement or the transactions contemplated hereby which is instituted in any New York Court. The Company has appointed _____, New York, New York, as its authorized agent (the "Authorized Agent") upon whom process may be served in any such action arising out of or based on this Agreement or the transactions contemplated hereby which may be instituted in any New York Court by any Underwriter or by any person who controls any Underwriter, expressly consents to the jurisdiction of any such court in respect of any such action, and waives any other requirements of or objections to personal jurisdiction with respect thereto. Such appointment shall be irrevocable. The Company represents and warrants that the Authorized Agent has agreed to act as such agent for service of process and agrees to take any and all action, including the filing of any and all documents and instruments, that may be necessary to continue such appointment in full force and effect as aforesaid. Service of process upon the Authorized Agent and written notice of such service to the Company shall be deemed, in every respect, effective service of process upon the Company.

15. Time shall be of the essence of this Agreement. As used herein, the term "business day" shall mean any day when the Commission's office in Washington, D.C. is open for business.

16. THIS AGREEMENT SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF NEW YORK.

17. This Agreement may be executed by any one or more of the parties hereto in any number of counterparts, each of which shall be deemed to be an original, but all such counterparts shall together constitute one and the same instrument.

18. In respect of any judgment or order given or made for any amount due hereunder that is expressed and paid in a currency (the "judgment currency") other than United States dollars, the Company will indemnify each Underwriter against any loss incurred by such Underwriter as a result of any variation as between (i) the rate of exchange at which the United States dollar amount is converted into the judgment currency for the purpose of such judgment or order and (ii) the rate of exchange at which an Underwriter is able to purchase United States dollars with the amount of the judgment currency actually received by such Underwriter. The foregoing indemnity shall constitute a separate and independent obligation of the Company and shall continue in full force and effect notwithstanding any such judgment or order as aforesaid. The term "rate of exchange" shall include any premiums and costs of exchange payable in connection with the purchase of or conversion into United States dollars.

If the foregoing is in accordance with your understanding, please sign and return to us seven counterparts hereof, and upon the acceptance hereof by you, on behalf of each of the Underwriters, this letter and such acceptance hereof shall constitute a binding agreement between each of the Underwriters and the Company. It is understood that your acceptance of this letter on behalf of each of the Underwriters is pursuant to the authority set forth in a form of Agreement among Underwriters, the form of which shall be submitted to the Company for examination upon request, but without warranty on your part as to the authority of the signers thereof.

Very truly yours,

Marvell Technology Group, Ltd.

SCHEDULE II

STOCKHOLDERS SUBJECT TO LOCK-UP AGREEMENTS

ANNEX I

Pursuant to Section 7(h) of the Underwriting Agreement, the accountants shall furnish letters to the Underwriters to the effect that:

(i) They are independent certified public accountants with respect to the Company and its subsidiaries within the meaning of the Act and the applicable published rules and regulations thereunder;

(ii) In their opinion, the financial statements and any supplementary financial information and schedules (and, if applicable, financial forecasts and/or pro forma financial information) examined by them and included in the Prospectus or the Registration Statement comply as to form in all material respects with the applicable accounting requirements of the Act and the related published rules and regulations thereunder; and, if applicable, they have made a review in accordance with standards established by the American Institute of Certified Public Accountants of the unaudited consolidated interim financial statements, selected financial data, pro forma financial information, financial forecasts and/or condensed financial statements derived from audited financial statements of the Company for the periods specified in such letter, as indicated in their reports thereon, copies of which have been separately furnished to the representatives of the Underwriters (the "Representatives");

(iii) They have made a review in accordance with standards established by the American Institute of Certified Public Accountants of the unaudited condensed consolidated statements of income, consolidated balance sheets and consolidated statements of cash flows included in the Prospectus as indicated in their reports thereon copies of which have been separately furnished to the Representatives and on the basis of specified procedures including inquiries of officials of the Company who have responsibility for financial and accounting matters regarding whether the unaudited condensed consolidated financial statements referred to in paragraph (vi)(A)(i) below comply as to form in all material respects with the applicable accounting requirements of the Act and the related published rules and regulations, nothing came to their attention that cause them to believe that the unaudited condensed consolidated financial statements do not comply as to form in all material respects with the applicable accounting requirements of the Act and the related published rules and regulations;

(iv) The unaudited selected financial information with respect to the consolidated results of operations and financial position of the Company for the five most recent fiscal years included in the Prospectus agrees with the corresponding amounts (after restatements where applicable) in the audited consolidated financial statements for such five fiscal years which were included or incorporated by reference in the Company's Annual Reports on Form 10-K for such fiscal years;

(v) They have compared the information in the Prospectus under selected captions with the disclosure requirements of Regulation S-K and on the basis of limited procedures specified in such letter nothing came to their attention as a result of the foregoing procedures that caused them to believe that this information does not conform in all material respects with the disclosure requirements of Items 301, 302, 402 and 503(d), respectively, of Regulation S-K;

(vi) On the basis of limited procedures, not constituting an examination in accordance with generally accepted auditing standards, consisting of a reading of the unaudited financial statements and other information referred to below, a reading of the latest available interim financial statements of the Company and its subsidiaries, inspection of the minute books of the

Company and its subsidiaries since the date of the latest audited financial statements included in the Prospectus, inquiries of officials of the Company and its subsidiaries responsible for financial and accounting matters and such other inquiries and procedures as may be specified in such letter, nothing came to their attention that caused them to believe that:

(A) (i) the unaudited consolidated statements of income, consolidated balance sheets and consolidated statements of cash flows included in the Prospectus do not comply as to form in all material respects with the applicable accounting requirements of the Act and the related published rules and regulations, or (ii) any material modifications should be made to the unaudited condensed consolidated statements of income, consolidated balance sheets and consolidated statements of cash flows included in the Prospectus for them to be in conformity with generally accepted accounting principles;

(B) any other unaudited income statement data and balance sheet items included in the Prospectus do not agree with the corresponding items in the unaudited consolidated financial statements from which such data and items were derived, and any such unaudited data and items were not determined on a basis substantially consistent with the basis for the corresponding amounts in the audited consolidated financial statements included in the Prospectus;

(C) the unaudited financial statements which were not included in the Prospectus but from which were derived any unaudited condensed financial statements referred to in clause (A) and any unaudited income statement data and balance sheet items included in the Prospectus and referred to in clause (B) were not determined on a basis substantially consistent with the basis for the audited consolidated financial statements included in the Prospectus;

(D) any unaudited pro forma consolidated condensed financial statements included in the Prospectus do not comply as to form in all material respects with the applicable accounting requirements of the Act and the published rules and regulations thereunder or the pro forma adjustments have not been properly applied to the historical amounts in the compilation of those statements;

(E) as of a specified date not more than five days prior to the date of such letter, there have been any changes in the consolidated capital stock (other than issuances of capital stock upon exercise of options and stock appreciation rights, upon earn-outs of performance shares and upon conversions of convertible securities, in each case which were outstanding on the date of the latest financial statements included in the Prospectus) or any increase in the consolidated long-term debt of the Company and its subsidiaries, or any decreases in consolidated net current assets or stockholders' equity or other items specified by the Representatives, or any increases in any items specified by the Representatives, in each case as compared with amounts shown in the latest balance sheet included in the Prospectus, except in each case for changes, increases or decreases which the Prospectus discloses have occurred or may occur or which are described in such letter; and

(F) for the period from the date of the latest financial statements included in the Prospectus to the specified date referred to in clause (E) there were any decreases in consolidated net revenues or operating profit or the total or per share amounts of consolidated net income or other items specified by the Representatives, or any

increases in any items specified by the Representatives, in each case as compared with the comparable period of the preceding year and with any other period of corresponding length specified by the Representatives, except in each case for decreases or increases which the Prospectus discloses have occurred or may occur or which are described in such letter; and

(vii) In addition to the examination referred to in their report(s) included in the Prospectus and the limited procedures, inspection of minute books, inquiries and other procedures referred to in paragraphs (iii) and (vi) above, they have carried out certain specified procedures, not constituting an examination in accordance with generally accepted auditing standards, with respect to certain amounts, percentages and financial information specified by the Representatives, which are derived from the general accounting records of the Company and its subsidiaries, which appear in the Prospectus, or in Part II of, or in exhibits and schedules to, the Registration Statement specified by the Representatives, and have compared certain of such amounts, percentages and financial information with the accounting records of the Company and its subsidiaries and have found them to be in agreement.

Dear Sirs

REGISTRATION STATEMENT ON FORM S-1

We have examined the Registration Statement on Form S-1 filed by you with the Securities and Exchange Commission (the "Commission") on or about 5 May 2000 (as such may be further amended or supplemented, the "Registration Statement"), in connection with the registration under the United States Securities Act of 1933, as amended (the "Act"), of common shares up to a value of \$75,000,000 (the "Shares"). As your special legal counsel in Bermuda in connection with this transaction, we have examined the proceedings proposed to be taken by you in connection with the issuance and sale of the Shares.

Based on the foregoing, it is our opinion that the Shares, when issued and sold in the manner described in the Registration Statement, will be legally and validly issued, fully paid and non-assessable under the laws of Bermuda.

We consent to the use of this opinion as an exhibit to the Registration Statement, and further consent to the use of our name and to the use of our opinion regarding tax matters wherever appearing in the Registration Statement, including the prospectus constituting a part thereof, which has been approved by us, as such may be further amended or supplemented, or incorporated by reference in any Registration Statement relating to the prospectus filed pursuant to the Act.

Yours faithfully

/s/ CONYERS DILL & PEARMAN

Attention: Board of Directors

Re: Tax Opinion for the Initial Public Offering of Marvell Technology Group Ltd.

Ladies and Gentlemen:

We have been requested to render an opinion concerning the matters of United States federal income tax law in connection with the initial public offering of Marvell Technology Group Ltd. ("Marvell").

It is our opinion that the section of the Form S-1 entitled "Taxation of Shareholders -- United States Federal Income Tax Considerations" summarizes the material United States federal income tax considerations that apply to the ownership and disposition of Marvell common stock held by prospective United States Holders, as that term is defined therein, as of the date of the Form S-1.

You should be aware that an opinion of counsel represents only counsel's best legal judgment, and has no binding effect or official status of any kind, and that no assurance can be given that contrary positions may not be taken by the Internal Revenue Service or that a court considering the issues would not hold otherwise. We undertake no responsibility to advise you of any subsequent developments in the application, operation or interpretation of the United States federal income tax laws.

This opinion is being delivered solely for use in connection with the initial public offering of Marvell. This opinion may not otherwise be relied upon or utilized for any other purpose or by any other person or entity, and may not be made available to any other person or entity, without our prior written consent.

Very truly yours,

/s/ FENWICK & WEST LLP

FENWICK & WEST LLP

[MARVELL LOGO]

MARVELL TECHNOLOGY GROUP LTD.
WAFER PURCHASE AGREEMENT

THIS WAFER PURCHASE AGREEMENT (the "Agreement") is entered into as of June 30, 1997 (the "Effective Date"), by and between MARVELL TECHNOLOGY GROUP, LTD., a Bermuda corporation, having its principal place of business at Clarendon House, 2 Churchill Street, Hamilton HM11, Bermuda ("MARVELL"), and TAIWAN SEMICONDUCTOR MANUFACTURING CORPORATION, a Taiwan corporation having its principal place of business at No. 121, PARK AVE. 3, SBIP, Hsio-Chu, Taiwan, R.O.C. ("TSMC").

RECITALS

WHEREAS, MARVELL desires to have certain products of its design manufactured by TSMC for sale by MARVELL; and

WHEREAS, TSMC has the capability of manufacturing MARVELL's products and has agreed to supply to MARVELL certain fabricated silicon wafers.

THEREFORE, in consideration of the foregoing and covenants contained below, the parties agree as follows:

Section 1. Definitions.

1.1 "Acceptance Criteria" shall mean the electrical and visual specifications described in Exhibit A to this Agreement.

1.2 "TSMC Capacity Commitment" shall mean TSMC's commitment as set forth in Section 3.2 below and Exhibit B attached hereto.

1.3 "Process" shall mean TSMC's mixed mode, double and triple metal logic processes used by TSMC according to this Agreement to manufacture one or more of the Products or any equivalent process developed by TSMC that meets with MARVELL's approval.

1.4 "Product(s)" shall mean MARVELL's integrated circuits which it requests TSMC to manufacture and provide in Wafer form.

1.5 "Proprietary Information" shall mean information that the disclosing party considers to be proprietary and/or confidential, including but not limited to, trade secrets, discoveries, ideas, concepts, know-how, techniques, designs, specifications, drawings, diagrams, data, computer programs, business activities and operations, reports, studies and other technical and business information.

1.6 "Wafer(s)" shall mean silicon wafers manufactured by TSMC and sold exclusively to MARVELL using the Process agreed to by the parties. Wafer requirements shall be stated in six (6) inch equivalents; all Wafers shall be six- (6-) inch or eight- (8-) inch silicon wafers, unless both parties mutually agree otherwise.

Section 2. Process Technical Information.

For each Process, TSMC shall provide MARVELL in writing with all technical information that MARVELL reasonably requires to develop circuit simulation models or data bases, or both. The information to be supplied by TSMC shall include but not be limited to the following:

- (a) detailed design rules;
- (b) process flow outline;
- (c) process parameter specifications;
- (d) electric parameter specifications;
- (e) quality control monitor flow;
- (f) SPICE model parameters; and
- (g) other information as shall be mutually agreed upon by both parties.

Section 3. Wafer Capacity Commitment to MARVELL.

3.1 Manufacturing. Upon MARVELL's orders therefor and subject to qualification pursuant to Section 5 below, TSMC agrees to manufacture and sell Products, and MARVELL agrees to purchase such Products from TSMC, on the terms and conditions set forth herein. TSMC agrees to provide MARVELL access to TSMC wafer fabs which give the best cost, efficiency and lowest defect density available.

3.2 TSMC Capacity Commitment. Effective immediately, TSMC shall reserve for and allocate to MARVELL such minimum wafer manufacturing capacity as is set forth on Exhibit B at the prices set forth in Section 6.

3.3 Reject Wafer Protection. After stable yields have been achieved, the parties shall agree, in good faith, on the average standard yield per wafer sort. If TSMC produces any Wafers which yield twenty percent (20%) or less of the average standard yield at wafer sort, then TSMC shall credit MARVELL for the full price MARVELL paid for such Wafers. If TSMC produces any Wafers which yield between twenty percent (20%) and eighty percent (80%) of the average standard yield at wafer sort, then TSMC shall credit MARVELL for a pro-rata portion of the full price MARVELL paid for such Wafers. If MARVELL requests Wafers to replace those rejected, TSMC shall use reasonable best efforts to replace such Wafers; in any event, TSMC will restart the lots within two weeks of the rejection. In the event TSMC requests an RMA, MARVELL will use reasonable commercial efforts to determine the cause of a low yield and work with TSMC to provide a corrective action. Wafer sort will be done by TSMC at TSMC or an agreed upon location.

Section 4. Mask Tooling Sets.

4.1 Mask Ownership. TSMC acknowledges and agrees that data base and mask tooling sets are proprietary to MARVELL, and shall be and remain the property of MARVELL, be treated as MARVELL's confidential materials, be used only for the purpose of filling MARVELL's needs and for no other purpose, and shall at all times contain MARVELL's trademark, mask work and copyright notices. TSMC is responsible for replacing damaged or broken masks.

4.2 Care and Confidentiality of Masks. TSMC agrees to exercise the same degree of care in protecting the property of MARVELL mask tooling sets as is exercised by TSMC for information which TSMC considers highly confidential and proprietary to TSMC.

4.3 Return of Masks. TSMC shall promptly return MARVELL's mask tooling sets upon MARVELL's request in writing.

4.4 Vendor Selection. TSMC and MARVELL shall jointly agree on mask vendor selection.

Section 5. Qualification and Modification.

5.1 Engineering Lots. MARVELL may order engineering lots where it seeks the qualification of an update to a Product or a Product not previously manufactured by TSMC, or seeks to otherwise improve functionality and yield, or to make any other engineering changes. For purposes of this Agreement, an engineering lot shall contain 12 Wafers. It shall be MARVELL's responsibility to inform and provide TSMC with the specifications for the engineering changes to be made to an engineering lot before production begins.

5.2 Acceptance Criteria. As part of the completion of the qualification process for each Product, the parties shall agree on the Acceptance Criteria to be used for the acceptance of Wafers. Such Acceptance Criteria shall be reduced to writing and attached to this Agreement as Exhibit A and shall constitute the contractual standards according to which MARVELL shall conduct acceptance of the Wafers.

5.3 Successful Qualification. MARVELL shall notify TSMC as soon as is practicable after delivery of prototype Wafers, of MARVELL's determination that the prototype Wafers meet the Acceptance Criteria set forth in Exhibit A.

5.4 Production Wafers Prior to Qualification. Although MARVELL does not expect that production quantities of Wafers of a Product will be manufactured prior to completion of the qualification process under Sections 5.1 through 5.3 above, MARVELL reserves the right to have TSMC manufacture production quantities of such Wafers prior to qualification.

5.5 Modifications After Qualifications.

(a) Changes to Acceptance Criteria. If either MARVELL or TSMC desires to make any changes to the Acceptance Criteria for any Product, it shall notify the other party in

MARVELL TECHNOLOGY GROUP LTD.

writing and negotiate the changes in good faith, including any changes in prices required by such modifications.

(b) Changes to Process.

(i) Changes to Process that TSMC Requests. If, after qualification is completed successfully for any Product to be manufactured under this Agreement, TSMC desires to make Process changes affecting the Product's form, fit or function, TSMC shall request in writing for the permission to make such changes. If the proposed changes are unacceptable to MARVELL, TSMC and MARVELL will meet to discuss such proposed changes with the understanding that should the change in any way affect the performance or yield of a MARVELL device in a negative manner, TSMC will not make the change for a period of not less than one year.

(ii) Changes to Process that MARVELL Requests. If, after Qualification is completed successfully for any product to be manufactured under this Agreement, MARVELL desires to make a change to the Process, MARVELL shall make a written request to TSMC. After reviewing the requested changes, TSMC shall consider such request and, if appropriate, propose a development and qualification plan and any associated charges. After completion of the development, TSMC may propose a reasonable Wafer price change, if any, associated with the Process change.

Section 6. Prices, Charges and Payments.

6.1 Price. The price for Wafers shall be fixed every quarter in good faith by the mutual agreement of both parties and set forth on Exhibit C attached hereto; the price shall be based on the fair market value of such Wafers at the time price is established.

6.2 Hot Lots. Prices for engineering lots ordered by MARVELL to be delivered in less than the normal cycle times determined pursuant to Section 9 below, if any, shall be mutually agreed upon by the parties in good faith.

6.3 Payment Terms. Unless otherwise agreed upon by the parties, payment terms shall be net due thirty (30) days after the receipt of TSMC's invoice.

6.4 Taxes. MARVELL shall be responsible for and shall pay any present or future customs duties or sales, use, excise or other similar tax applicable to the sale of goods covered by this Agreement or MARVELL shall supply TSMC with a reasonably satisfactory tax exemption certificate.

Section 7. Rolling Forecasts.

By the fifteenth working day of each month, MARVELL shall provide TSMC a rolling forecast of its monthly volume requirement for the following twelve (12) months for Wafers by Process manufactured by TSMC (the "Forecast"), the first three (3) months of such Forecast being binding on both parties. The parties hereby agree that the Forecast is subject to a plus or minus change of thirty-three percent (33%) from the stated amounts for months 3 through 6 of

the Forecast, and a plus or minus change of fifty percent (50%) from the stated amounts for months 7 through 12 of the Forecast. In the event MARVELL requires changes to the Forecast, TSMC will use reasonable efforts to consider such changes and reach mutually agreeable changes in good faith.

MARVELL'S forecasts shall constitute good faith estimates of MARVELL's anticipated requirements for Wafers for the periods indicated based on current market conditions (but, in the absence of a purchase order, shall not be a commitment by MARVELL for purchase of Wafers, except as set forth in the proceeding paragraph).

Section 8. Purchase Orders.

8.1 Placement of Purchase Orders. Purchase orders ("Purchase Orders") submitted by MARVELL shall be for a fixed quantity of Wafer lots (a production wafer lot shall contain 24 wafers). TSMC shall accept the Purchase Order offer by written acknowledgment of the Purchase Orders placed. The Purchase Order shall be effective only upon TSMC's acknowledgement by written notice within five (5) business days of receipt of the order; provided, however, if TSMC has not rejected the Purchase Order within such five day period, the Purchase Order will be deemed accepted. The terms and conditions of this Agreement shall control all sales of Products hereunder, and any inconsistent terms or conditions in any purchase order, acknowledgement, notice or similar document shall be of no effect.

8.2 Content of Purchase Orders. Each Purchase Order shall contain:

- (a) Products to be purchased;
- (b) quantities of Wafer lots for each Product;
- (c) requested shipment date;
- (d) destination and requested carriers, and
- (e) confirmation of the price for each Wafer.

Section 9. Cycle Times.

Cycle times, by Process for each Product, from TSMC's acceptance of MARVELL's Purchase Order until delivery of the Product to MARVELL's selected transportation carrier are set forth on Exhibit C attached hereto.

Section 10. Manufacturing Information.

Upon MARVELL's written request, TSMC shall make available for review any process control information including but not limited to: Process and electrical test yield results, calibration schedules and parametric test results.

Section 11. Delivery of Orders

11.1 Transfer of Ownership. Unless otherwise agreed to in writing between the parties, TSMC shall deliver the Products to MARVELL F.O.B. TSMC Taiwan. Title and risk of

loss shall pass to MARVELL upon this delivery. TSMC shall package the Products for secure shipment according to standard industrial manufacturing practices in consideration of the method of shipment chosen.

11.2 Partial Shipments. Partial shipments are allowed, so long as full shipment of the appropriate quantities are made by the delivery dates specified in the Purchase Order acknowledgment. Such partial shipments may be invoiced individually or in combination with all the other partial shipments made for the same Purchase Orders. Invoices for Wafers put on hold under Sections 6.4 and 6.5 above shall be treated as a partial shipment and paid according to the terms in Section 6.7 above.

Section 12. Acceptance, Testing and Inspection.

12.1 Notification of Acceptance. MARVELL shall accept all Wafers delivered under this Agreement that meet the Acceptance Criteria and the minimum good die yield thresholds established by the parties for such Wafers and shall notify TSMC in writing, within forty-five (45) days following the delivery of any Wafers, as to rejection thereof. If no notification indicating rejection is received by TSMC within the above time period, then such Wafers shall be deemed accepted.

12.2 MARVELL Inspection of Product. MARVELL may inspect the Products and carry out testing, prior to acceptance, at its own facilities, to determine if the Products meet the Acceptance Criteria.

Section 13. Proprietary Information

13.1 Restriction on Use and Disclosure of Proprietary Information. Both parties agree to maintain each other's Proprietary Information in strict confidence, now to make use thereof other than for the performance of this Agreement, to release it only to the receiving party's employees who have a reasonable need to know the same, and not to release or disclose it to any third parties, without the prior written consent of the disclosing party. The obligations set forth in this Section shall not apply to any information that: (a) is now or hereafter in public domain or otherwise becomes available to the public other than by breach of this Agreement by the receiving party, (b) has been rightfully in the receiving party's possession prior to receipt from the disclosing party, (c) is rightfully received by the receiving party from a third party, (d) is independently developed by the receiving party, and (e) is authorized by the disclosing party to be released or disclosed.

13.2 Ownership. All Proprietary Information and any copies thereof shall remain the property of the disclosing party, and no license or other rights is granted or implied hereby. The receiving party shall, upon the disclosing party's request, return the original and all copies of tangible Proprietary Information. Any masks generated by TSMC from MARVELL's database tapes shall be the property of MARVELL and shall be immediately returned to MARVELL upon its request.

13.3 Survival of Obligation. Obligations under this Section shall survive any termination of this Agreement.

Section 14. Warranty.

14.1 Product Warranty. TSMC warrants that the Products delivered under this Agreement shall be free from defects in material and workmanship under normal use for a period of one (1) year from the date of shipment. If a Product is mutually determined to be defective, then TSMC shall either repair, replace, or credit MARVELL for such defective Products. Refunds or credits will be made within ten (10) days and replacements products will be provided as soon as practicable, but in no event longer than forty-five (45) days after their return to TSMC. TSMC shall be responsible for all transportation costs associated with MARVELL's exercise of this warranty coverage.

14.2 Limitation on Warranty. THE FOREGOING WARRANTY SHALL BE EXCLUSIVE AND IN LIEU OF ANY AND ALL OTHER WARRANTIES, EXPRESS, IMPLIED OR STATUTORY, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ALL OF WHICH ARE HEREBY EXPRESSLY DISCLAIMED.

Section 15. Intellectual Property.

15.1 Indemnity. With respect to each party's respective proprietary contribution to any Products provided, manufactured, sold or otherwise transferred hereunder, such party agrees to defend, indemnify and hold harmless the other party against any loss, costs, liability or expense arising out of or resulting from any actions or claims brought against such other party to the extent based upon a claim that such contribution infringes any patent, trade secret or other intellectual property right of any third party (collectively, "Third Party Rights"), and agrees to pay any settlements entered into or damages awarded against such other party to the extent based upon such a claim; provided, that the party seeking indemnification provides reasonably prompt notice thereof and reasonable assistance in connection with the defense thereof at the indemnifying party's expense, and allows the indemnifying party full control of the defense and settlement thereof.

Section 16. Limitation of Liability.

IN NO EVENT SHALL EITHER PARTY BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES (INCLUDING LOSS OF PROFITS AND LOSS OF USE) RESULTING FROM, ARISING OUT OF OR IN CONNECTION WITH SUCH PARTY'S PERFORMANCE OR FAILURE TO PERFORM UNDER THIS AGREEMENT, OR RESULTING FROM, ARISING OUT OF OR IN CONNECTION WITH THE PRODUCTION, SUPPLY, AND/OR SALE OF THE PRODUCTS OR WAFERS OR ANY PART THEREOF WHETHER DUE TO A BREACH OF CONTRACT, BREACH OF WARRANTY, TORT, OR NEGLIGENCE OF A PARTY, OR OTHERWISE. THIS SECTION DOES NOT ELIMINATE A PARTY'S LIABILITY FOR ACTUAL DAMAGES.

Section 17. Term and Termination.

17.1 Term. This Agreement shall remain in full force and effect for three years from Effective Date. Either party has the right to terminate this Agreement without cause with a

thirty (30) day prior notice. This Agreement may be renewed by additional periods by mutual written agreement of the parties.

17.2 Termination for Breach. If either party breaches any material term of condition of this Agreement and fails to cure that breach within thirty (30) days after receiving written notice of the breach, the other party shall have the right to terminate this Agreement, on written notice, at any time after the end of such thirty (30) day period.

17.3 Termination for Insolvency. If either party becomes the subject of a voluntary or involuntary petition in bankruptcy or of any proceeding relating to insolvency, receivership, liquidation, or composition for the benefit of creditors, if that petition or proceeding is not dismissed with prejudice within sixty (60) days after filing, the other party may terminate this Agreement on thirty (30) days' notice.

17.4 Return of Material. Upon termination or expiration of this Agreement, TSMC shall return to MARVELL all items supplied to it under this Agreement.

17.5 Survival of Provisions. The rights and obligations of the parties pursuant to Section 13, 15, 16 and 18 shall survive the termination of this Agreement.

Section 18. Miscellaneous.

18.1 Governing Law. This Agreement shall be governed by and interpreted in accordance with the laws of the State of California without reference to conflict of laws principles.

18.2 Arbitration. Any dispute or claim arising out of or in connection with this Agreement shall be finally settled by binding arbitration in San Jose, California under the rules of arbitration of the International Chamber of Commerce by one arbitrator appointed in accordance with said rules. Judgment on the award rendered by the arbitrator may be entered in any court having jurisdiction thereof. Notwithstanding the foregoing, the parties may apply to any court of competent jurisdiction for injunctive relief without breach of this arbitration provision.

18.3 Assignment. Neither party may assign or delegate this Agreement or any of its licenses, rights or duties under this Agreement without the prior written consent of the other, except MARVELL may assign this Agreement to a person or entity into which it has merged or which has otherwise succeeded to all of substantially all of its business and assets, and which has assumed in writing or by operation of law its obligations under this Agreement.

18.4 Authority. Each party represents that all corporate action necessary for the authorization, execution and delivery of this Agreement by such party and the performance of its obligations hereunder has been taken.

18.5 Notices. All notices and other communications required or permitted hereunder shall be in writing and shall be mailed by registered or certified mail, postage prepaid, or

otherwise delivered by hand, by messenger or by facsimile transmission, addressed to the addresses set forth above or at such other address furnished with a notice in the manner set forth herein. Such notices shall be deemed to have been served when delivered or, if delivery is not accomplished by reason of some fault of the addressee, when tendered.

18.6 Partial Invalidity. If any paragraph, provision, or clause thereof in this Agreement shall be found or be held to be invalid or unenforceable in any jurisdiction in which this Agreement is being performed, the remainder of this Agreement shall be valid and enforceable and the parties shall negotiate, in good faith a substitute, valid and enforceable provision which most nearly effects the parties' intent in entering into this Agreement.

18.7 Counterparts. This Agreement may be executed in two (2) or more counterparts, all of which, taken together, shall be regarded as one and the same instrument.

18.8 Waiver. The failure of either party to enforce at any time the provisions of this Agreement shall in no way be constituted to be a present or future waiver of such provisions, nor in any way affect the validity of either party to enforce each and every such provision thereafter.

18.9 Entire Agreement. The terms and conditions herein contained constitute the entire agreement between the parties and supersede all previous agreements and understandings, whether oral or written, between the parties hereto with respect to the subject matter hereof and no agreement of understanding varying or extending the same shall be binding upon either party hereto unless in a written document signed by the party to be bound thereby.

18.10 Section Headings. The section headings contained in this Agreement are for reference purposes only and shall not affect in any way the meaning or interpretation of this Agreement.

18.11 Export Control. Export of Products from Taiwan may require export authorization from the government of either Taiwan or another jurisdiction. TSMC shall be responsible for the cost of obtaining such authorization or any liability resulting from its failure to obtain such authorization.

18.12 Terms to Other Customers. TSMC agrees that the terms and conditions of any wafer purchase, production or supply agreement by and between TSMC and any other customer under similar circumstances shall be no more favorable in any material respect to such customer than those of this Agreement are to MARVELL.
